SWMP & GEC

Amended Preliminary Plat (PCD File No. SP197)

The Storm Water Management Plan (SWMP) is not required as this is a preliminary plat. This is something that gets submitted with the final plat and we will provide when we submit this application. This includes the SWMP checklist that was requested.

In addition, the grading and erosion control checklist will be provided at the final plat as the grading plan provided for this application is preliminary and the checklist states final grading.
