PERMIT TO USE AN EXISTING WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT

CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) The construction of this well shall be in compliance with the Water Well Construction Rules 2 CCR 402-2, unless approval of a variance has been granted by the State Board of Examiners of Water Well Construction and Pump Installation Contractors in accordance with Rule 18.
- 3) Approved pursuant to CRS 37-90-107(7) and the Findings and Order of the Colorado Ground Water Commission dated January 5, 2022 for Determination of Water Right No. 4278-BD and Replacement Plan No. 4278-RP.
- 4) Approved for the change in use of an existing well constructed under permit no. 195628. The issuance of this permit hereby cancels permit no. 195628.
- 5) The pumping rate of this well shall not exceed 50 GPM.
- 6) The allowed average annual amount of groundwater that may be withdrawn by this well under this permit may not exceed 0.407 acre-feet, subject to the conditions of Determination of Water Right No. 4278-BD and Replacement Plan No. 4278-RP, including but not limited to the allowed maximum annual amount of withdrawal.
- 7) The total amount of groundwater that may be withdrawn by this well under this permit may not exceed a volume of 122.1 acre-feet, subject to the conditions of Determination of Water Right No. 4278-BD and Replacement Plan No. 4278-RP.
- 8) The use of groundwater from this well is limited to domestic including in-house use; domestic animal watering; irrigation of landscape, gardens and greenhouse; commercial; fire protection; recreational; and the watering of stock animals, either directly or after storage. The place of use shall be limited to the 40-acre land area claimed in the above described Order of the Commission.
- 9) Production from this well is restricted to the Dawson aquifer.
- 10) The owner shall mark the well in a conspicuous location with the well permit number and name of aquifer as appropriate, and shall take necessary means and precautions to preserve these markings.
- 11) This well shall be located within 200 feet of the location specified on this permit. This well shall not be located within 600 feet of another large-capacity well completed in the Dawson aquifer.
- 12) The entire length of the hole shall be geophysically logged as required by Rule 9 of the Statewide Nontributary Ground Water Rules prior to installing casing.
- 13) A totalizing flow meter or Commission approved measuring device must be installed on this well and maintained in good working order. Permanent records of all diversions must be maintained by the well owner (collected at least annually) and submitted to the Ground Water Commission upon request.

WELL PERMIT NUMBER 86508-F

RECEIPT NUMBER 10014680

14) The return flows from the inhouse supply component of this well use have been claimed as a replacement source, pursuant to the Findings and Order of the Commission dated January 5, 2022 for Replacement Plan No. 4278-RP. As a result, the return flow from the use of this well must be through an individual waste water disposal system of the non-evaporative type where the water is returned to the same stream system in which the well is located.

NOTE: This well is withdrawing water from a non-renewable aquifer. While the withdrawals from this aquifer are administered based on a 100 year aquifer life, water level declines may prevent this well from diverting the permitted amounts for that 100 years.
