Job No. 211290 Treasured Acres Filing No. 1 DATE June 08, 2021

REVISION December 07, 2021 MS 21-009

## Notes:

- This survey does not constitute a title search by Alessi and Associates, Inc., to determine ownership or easements of record. For information regarding easements, rights of way, Alessi and Associates, Inc. relied upon the Title Policy prepared by Empire Title of Colorado Springs and Stewart Title Guaranty Company, File Number 85511ECS, dated August 05, 2021.
- The property owner, its successors and assigns, and all future lot owners in this development are hereby on notice that they may be required to comply with applicable rules, if any, of the Colorado Ground Water Commission and/or the Upper Black Squirrel Creek Ground Water Management District, which compliance may result in a reduction of well withdrawal limits, and thus a reduction in water availability.
- Basis of Bearings. A line beginning at the East Quarter corner of Section 15, Township 12 South, Range 65 West of the 6th P.M. County of El Paso, State of Colorado, said corner being monumented by a #6 rebar with an aluminum cap, LS 2372 and terminating at a point on the East-West centerline of said Section 15, point being a #4 rebar with an illegible yellow cap with a bearing of S88°58'56"W, a distance of 637.55 feet.
- Sewage treatment is the responsibility of each individual property owner. The El Paso County Health Department and Environment must approve each system and, in some cases the Department may require an engineer designed system prior to permit approval.
- Individual wells are the responsibility of each property owner. Permits for individual wells must be obtained from the State Engineer who by law has the authority to set conditions for the issuance of these permits.
- Water in the Denver Basin Aquifers is allocated based on a 100-year aquifer life; however, for El Paso County planning purposes, water in the Denver Basin Aquifers is elevated based on a 300-year aquifer life. All future owners in the subdivision should be aware that the economic life of a water supply based on wells in a given Denver Basin Aquifer may be less than either the 100 years or 300 years indicated due to anticipated water level declines. Furthermore, the water supply plan should not rely solely upon non-renewable aquifers. Alternative renewable water resources should be acquired and incorporated in a permanent water supply plan that provides future generations with a water supply. Existing Domestic Well Permit and existing well.
- Declaration of Covenants for Treasured Acres Filing No. 1, addresses the water replacement plan and shared driveway as recorded under Reception No. \_\_\_\_\_.
- No driveway shall be established unless an access permit has been granted by El Paso County.
- All Property owners are responsible for maintaining proper storm drainage in and through their property. Public drainage easements as specifically noted on the plat shall be maintained by the individual lot owners unless otherwise indicated. Structures, fences, materials or landscaping that could impede the flow of runoff shall not be placed in drainage easements.
- Mailboxes shall be installed in accordance with all El Paso County Department of Public Works and United States Postal Service regulations.
- Developer shall comply with federal and state laws, regulations, ordinances, review and permit requirements, and other agency requirements, if any, of applicable agencies including, but not limited to, the Colorado Department of Wildlife, Colorado Department of Transportation, U.S. Army Corps of Engineers, the U.S. Fish & Wildlife Service regarding the Endangered Species Act, particularly as it relates to the listed species e.g. Preble's Meadow Jumping Mouse as a listed threatened species.
- The following reports have been submitted in association with this minor subdivision and are on file at the Planning and Community Development Department: Soils and Geological, Water Supply, and Sewage Disposal, Drainage Report submitted by RMG Engineering dated July 31, 2020 and Monson, Cummins & Shohet, LLC, dated May 28, 2021. Available at the El Paso County Planning and Community Development Department.
- The Soils and Geology Study, dated July 27, 2021, prepared by Geoff Webster, P.E. Sr. Geotechnical Project Engineer and Kelli Ziegler Project Geologist, RMG Engineers. Job # 177844.
- The soil and geological conditions determined that the project is feasible for Lots 2 and 3. The conditions are typical of the front range region of Colorado. No bedrock or shallow water conditions were observed by the geologist at time of inspection. Mitigation measures will be required if seasonal shallow ground water is observed during construction. All structural foundations shall be located and designed by a Professional Engineer, currently registered in the State of Colorado. May include engineered drain systems to mitigate high groundwater conditions. Natural drainage locations shall be avoided by construction and site-specific foundation-specific investigations shall be required. Any design by an engineer is subject to revision based on the result of the open hole observation". A site specific soils report and OWTS evaluation may be required for any future proposed structures.
- No Structures or major material storage activities are permitted within the designated drainage easements, except fences; fences shall not impede runoff from reaching drainage swales.
- The addresses exhibited on this plat are for informational purposes only. They are not the legal description and are subject to change.
- Property within this subdivision is subject to the terms and provisions of the El Paso County Road Impact Fee Program (Resolution 19-471) and any subsequent amendments. Fees for each lot within this subdivision shall be paid in full at the time of building permit issuance.
- Driveway Note: Individual lot purchasers are responsible for constructing driveways, including necessary drainage culverts from Hallelujah Trail per Land Development Code Section 6.3.C.2 and 6.3.C.3. Due to their length, some of the driveways will need to be specifically approved by the Black Forest Fire Protection District.
- Access to lots 2 and 3 shall be through the shown access easement. The responsibility and maintenance agreement and all covenants and restrictions contained therein, as recorded at Reception No. \_\_\_\_\_ of the records of El Paso County Clerk and Recorder.

## Total Acreage:

Lot 1 = 5.06 Acres  
Lot 2 = 5.06 Acres  
Lot 3 = 5.06 Acres
