PERMIT TO USE AN EXISTING WELL

ISSUANCE OF THIS PERMIT DOES NOT CONFER A WATER RIGHT
CONDITIONS OF APPROVAL

- 1) This well shall be used in such a way as to cause no material injury to existing water rights. The issuance of this permit does not ensure that no injury will occur to another vested water right or preclude another owner of a vested water right from seeking relief in a civil court action.
- 2) Construction details for this existing well have not been provided to this office; therefore, it is not known if the construction of this well is in compliance with the Water Well Construction Rules, 2 CCR 402-2. The issuance of this permit does not relieve the well owner of responsibility or liability in the event contamination of the groundwater source results from the construction or use of this well, nor does the State Engineer assume any responsibility or liability should contamination occur.
- 3) Approved pursuant to CRS 37-90-107(7) and the Findings and Order of the Colorado Ground Water Commission dated April 29, 2019, for Determination of Water Right No. 3668-BD.
- 4) The use of groundwater from this well is limited to domestic use inside 1 single family dwelling, including the watering of domestic animals and the irrigation of 1 acre of lawns and gardens. The place of use shall be limited to the 5.06 acre land area claimed in the above described Order of the Commission.
- 5) The pumping rate of this well shall not exceed 15 GPM.
- 6) The allowed average annual amount of groundwater that may be withdrawn by this well under this permit may not exceed 1.16 acre-feet, subject to the conditions of Determination of Water Right no. 3668-BD including but not limited to the allowed maximum annual amount of withdrawal.
- 7) The total amount of groundwater that may be withdrawn by this well under this permit may not exceed a volume of 116 acre-feet, subject to the conditions of Determination of Water Right no. 3668-BD.
- 8) Production from this well is limited to the Upper Dawson aquifer.
- 9) A totalizing flow meter or Commission approved measuring device must be installed on this well and maintained in good working order. Permanent records of all diversions must be maintained by the well owner (collected at least annually) and submitted to the Upper Black Squirrel Creek Ground Water Management District and the Ground Water Commission upon request.
- 10) The owner shall mark the well in a conspicuous location with the well permit number and name of aquifer as appropriate, and shall take necessary means and precautions to preserve these markings.
- 11) This well shall be located within 200 feet of the location specified on this permit.
- 12) The return flows from the inhouse supply component of this well use have been claimed as a replacement source, pursuant to the Findings and Order of the Commission dated April 29, 2019. As a result, the return flow from the use of this well must be through an individual waste water disposal system of the non-evaporative type where the water is returned to the same stream system in which the well is located.

NOTE: This well is withdrawing water from a non-renewable aquifer. While the withdrawals from this aquifer are administered based on a 100 year aquifer life, water level declines may prevent this well from diverting the permitted amounts for that 100 years.

WELL PERMIT NUMBER 85875-F

RECEIPT NUMBER 10012839

NOTE: This well is located within the Upper Black Squirrel Creek Ground Water Management District where local District Rules apply which may further limit the withdrawal and use of designated ground water as authorized under this permit. The District requires that records of all diversions be maintained monthly.

Date Issued: 8/5/2021

Expiration Date: N/A
