

WATER SUPPLY INFORMATION SUMMARY

Section 30-28-133(d), C.R.S. requires that the applicant submit to the County, "Adequate evidence that a water supply that is sufficient in terms of quantity, quality and dependability will be available to ensure an adequate supply of water.

1. NAME OF DEVELOPMENT AS PROPOSED
Subdivision name differs

Fox Creek Estates

Water finding must be made for all three existing parcels. Acreage and schedule number only indicate one parcel.

2. LAND USE ACTION Title Vacation and Replat

3. NAME OF EXISTING PARCEL AS RECORDED Schedule No.: 5129300002 - 15630 Fox Creek Lane, Colorado Springs, CO 80908

SUBDIVISION Terra Ridge FILING No. 1 BLOCK Vacant LOT 5 and 6

4. TOTAL ACREAGE 39.77 5. NUMBER OF LOTS PROPOSED 7 PLAT MAP ENCLOSED YES

6. PARCEL HISTORY - Please attach copies of deeds, plats or other evidence or documentation.

Acreage does not include entire proposed subdivision

A. Was parcel recorded with county prior to June 1, 1972? YES NO
B. Has the parcel ever been part of a division of land action since June 1, 1972? YES NO
If yes, describe the previous action _____

7. LOCATION OF PARCEL - Include a map delineating the project area and tie to a section corner. See Water Resource Report - Appendix A

NE 1/4 OF SW 1/4 SECTION 29 TOWNSHIP 11 N S RANGE 65 E W

PRINCIPAL MERIDIAN: 6TH N.M. UTE COSTILLA

8. P Explain in Lol how this number was calculated _____
_____ provided. _____ and drawn sketch Yes No

Provide information and Well #s for proposed subdivision wells

9. E _____ 10. WATER SUPPLY SOURCE

HOUSEHOLD USE # 7 of units	1,562	GPD	1.75	AF
COMMERCIAL USE # N/A of S.F.	=	GPD	=	AF
IRRIGATION # 0.64 of acres	1,687	GPD	1.89	AF
STOCK WATERING # 28 of head	437	GPD	0.49	AF
OTHER	=	GPD	=	AF
	3,687	GPD	4.13	AF

Amount differs from statement in Letter of Intent

EXISTING WELLS DEVELOPED SPRING
WELL PERMIT NUMBERS
53112-F
This well will not be used except for Miles residence as shown on Plat.

NEW WELLS -
 PROPOSED AQUIFERS (CHECK ONE)
 ALLUVIAL UPPER ARAPAHOE
 UPPER DAWSON LOWER ARAPAHOE
 LOWER DAWSON LARAMIE FOX HILLS
 DENVER DAKOTA
 OTHER _____

MUNICIPAL
 ASSOCIATION
 COMPANY
 DISTRICT
NAME _____
LETTER OF COMMITMENT FOR SERVICE YES NO

WATER COURT DECREE CASE NO.'S

11. ENGINEER'S WATER SUPPLY REPORT YES NO IF YES, PLEASE FORWARD WITH THIS FORM. (This may be required before our review is completed.)

12. TYPE OF SEWAGE DISPOSAL SYSTEM

SEPTIC TANK/LEACH FIELD CENTRAL SYSTEM - DISTRICT NAME _____
 LAGOON VAULT - LOCATION SEWAGE HAULED TO _____
 ENGINEERED SYSTEM (Attach a copy of engineering design) OTHER _____

No court decrees or well information listed

3. Discuss location, construction and production details of existing and proposed production wells. The following shall be included:

Water source will be provided by individual residential wells for 5 acre lots

a. Estimated number, size and short- and long-term yields of wells necessary to serve the proposed subdivision; estimated life expectancy of wells; estimated short- and long-term well development schedule indicating probable timing of bringing additional wells on line

- N/A

b. A map showing locations of wells to be used during the first five (5) years of the subdivision and probably locations of wells in the out years.

- N/A

c. Well drilling logs and well completion reports.

- N/A

d. Pumping test data and analysis, including data and analysis of constant rate and step drawdown tests

- N/A

e. Surface water sources: - No surface water sources will be used to serve the subdivision

1) List each surface water supply to be used. Identify each source as tributary, nontributary, or from a designated basin. Discuss the need for and the status of any augmentation plans required to use the proposed supply.

- N/A

2) Describe the annual and the three hundred (300) year quantity of water available from each proposed surface water supply.

- N/A

3) Calculate the number of years of water supply. For phased projects the calculation shall delineate the years of water available for each phase.

- N/A

C. Determination of sufficient dependability of water supply:

1. Proof of ownership or right of acquisition of use of existing or proposed water rights sufficient in quality, quantity and dependability to serve the proposed use. Include well permits, court decrees, well permit applications, export permits, etc.

- N/A

2. Financial plan and capital improvements plan of water provider.

- N/A

3 Description of the water supply, location shown on maps, and, when appropriate, engineering designs of existing and proposed water supply facilities, including wells, storage facilities, major transmission lines, etc.

- N/A

4. Calculations demonstrating that the aquifers are capable of supplying the required quantity of water and analysis showing the wells are capable of producing the required water supplies, if ground water is to be used.

- N/A

5. If a public or private water source is to be used, evidence that the source can and will supply water to the proposed subdivision stating the amount of water available for use within the subdivision and the feasibility of extending service to the area. This evidence shall, in addition to the data required in Sections 49.5 and 51.2, include the following information:

No public or private offsite water source is intended to serve the subdivision

a. A letter indicating a commitment to serve.

- N/A

b Name and address of the municipality, quasi-municipality, or water company which will supply the water.

- N/A

- c. Current capacities of the existing system. - N/A
- d. Total amount of current and committed use. - N/A
- e. Amount and timing of water to be supplied to the subdivision. This requirement does not apply to subdivisions to be supplied by individual wells. - N/A

6. Evidence that short-term water supply needs of the subdivision can be met to satisfy fire demand and reduction of supplies as a result of flooding, and damaged or otherwise incapacitated systems. Short-term dependability can be satisfied by such features as reservoirs, standby wells and standby connections with other water supply or distribution systems. - N/A

D. Determination of sufficient quality and potability of water:

- 1. Chemical analyses of proposed water from each proposed source. - Section 3.3, Appendix E
- 2. Evidence of compliance with County and/or State water quality standards. - Section 3.3
- 3. Discussion of potential for water quality degradation from onsite and off-site sources. - N/A

E. Requirements of the State Engineer:

State statute requires the State Engineer to review all proposed water supplies. The State Engineer requires a narrative discussion. The following is the minimal information requirements of the State Engineer for "minor subdivisions":

- 1. Plat and legal description of the property and a description of previous actions of the State Engineer's Office regarding the property (e.g. previous exemptions, well permit applications). - Appendix A
- 2. Well permit number or numbers of existing and permitted wells when available. Names of previous owners, dates of well construction, depth, etc., if permit numbers are not available. - Appendix C
- 3. Use of water supply on the property as it now exists. Include number and locations of dwellings supplied, area of irrigated lawn and garden, water use for livestock, etc. - Appendix C
- 4. Proposed water supply. Description of wells or water provider to be used for each lot and what aquifer(s) the applicant intends to use. - Section 3.1, Section 3.2
- 5. Water requirements for each proposed lot. Include quantity to be used for dwellings, irrigation and livestock. It is not necessary to include this information for subsection 8.c. as a separate discussion item provided it is included in the Water Resources Report. - Section 2.1, Appendix B

F. Public and private commercial water providers:

Although it is the responsibility of the applicant to provide information regarding the availability of water supplies from any source, including public and private commercial water providers, many providers have elected to submit a general Water Resource Report. Such a report may then be used to evaluate the water resources available for a series of projects within their service area.

No public or private commercial water use is intended for the subdivision

1. Water providers report:

In those cases where the water provider submits a general Water Resources Report, it is requested that the report be updated annually, preferably in January or February. Update information should include:

- a. volume of water sold in the previous year, - N/A
- b. new water acquisitions, augmentation plans, etc., - N/A
- c. water trades or other losses of water supplies, - N/A
- d. anticipated water acquisitions for the upcoming year, - N/A
- e. legal documentation accompanying new water acquisitions and augmentation plans, - N/A
- f. major capital improvements accomplished during the past year and anticipated major capital improvements for the upcoming year, and - N/A
- g. other information which would be useful in evaluating the availability of water supplies. - N/A

2. Annual County Report:

The County will prepare preliminary and final reports containing an analysis of the water availability of those water providers who elect to submit an annual Water Resources Report. These County reports will be jointly prepared by the County Hydrogeologist, County Attorney, Planning Department and the County Department of Health and Environment. The preliminary report will be issued in January and will include a summary of the past year's subdivision and building activity. The Final County Report will be issued after receipt of the water providers' Water Resource Reports. After the water provider has had the opportunity to review and comment on the Final County Report, the report will be used for the following twelve (12) months as the basis for evaluating the availability of water supplies for proposed projects.

G. Other relevant information as deemed necessary.

Water Performance Report N/A - all lots are greater than 5 acres

For lots of between two and one-half (2 ½) and five (5) acres, where individual wells are proposed, a report conforming to the following standards shall be submitted in addition to the report outlined in Section 51.2. The report shall be prepared by a registered professional engineer licensed to practice in Colorado and shall include the following information:

- A. A map drawn to the same scale as the preliminary plan, locating all lots, water-forms, drainageways, floodplains, cones of influence (if applicable), aquifers, and surface or subsurface hazards. Individually noted shall be any point sources of water pollution or identified polluted waterforms. Water quality of aquifers and surface waters on and immediately adjacent to the site shall be noted.. - N/A
- B. A report addressing the following:
 - 1. Location, type, depth (estimated maximum), pumping rates capacity of all wells existing or proposed on the site or within three hundred (300) feet of the site. Also noted shall be casing requirements, water table depth, aquifers, and water requirement per well (2.25 ac ft./yrs. shall be the maximum usage rate). - N/A
 - 2. An analysis of soils, subsurface geology, hydrology, aquifer recharge capability, aquifer characteristics, and relationship to surface waterforms. Said analysis shall identify any probably well interference or the interference

with surface waterforms and shall describe the maximum probable cones of influence of wells relative to adjoining wells, waterforms, and leach fields. Analysis shall include identification of probable impacts on adjoining wells, agricultural uses, and general aquifer level stability.

- N/A

3. The report shall identify maximum number of lots and minimum lot sizes.

- N/A

4. The availability of a central water system and the feasibility of inclusion into such a system. If there is a central water system within one (1) mile of the proposed subdivision or if the subdivision is within an organized water district or municipality is incapable of serving the site, exclusive of line extension costs.

- N/A

5. The County Health Department, Planning Director, or State Engineer may require the developer to submit additional engineering or geological reports or data and to conduct a study of the economic feasibility of a public water system prior to making recommendations. No plan or plat shall be forwarded to the County Commissioners for final approval without the approval of the Planning Director and the County Health Department or State Engineer except as otherwise provided for herein.

- N/A
