RE: Water/Sewer Service Commitment – Forest Lakes Filing #7

Dear Mr. Dossey:

The purpose of this letter is to provide you assurance that the Forest Lakes Metropolitan District has the necessary water resources and sewer treatment capacity and is prepared to construct the necessary related infrastructure to provide water and wastewater services to the 79 lots contained within Forest Lakes Filings #7. The District's water supply resources – including the Dillon Well and the District's renewable water to be treated in the recently completed surface water treatment plant – are more than adequate to supply this demand at 27.89 AF and the water demands of the previously approved Filings #1, #2A, #2B, #3, #4, #5 and #6.

Other services provided by the District include the construction, ownership and operation of parks, trails and open spaces; the construction of public roads; and the construction and maintenance of stormwater drainage systems. The District's Service Plans, which were approved by Board of County Commissioners' Resolution No. 03-298 on July 24, 2003, describe the complete array of services to be provided by the District and describe its financial capacity to provide such services.

Please contact me if you need additional information on this matter.

Sincerely,

Ann E. Nichols  
District Manager
