

Meadow Lake Airport Association

13625 Judge Orr Road, Meadow Lake Airport (kFLY), Peyton, CO 80831-6051

Date: November 20, 2020

To: El Paso County Planning and Community Development Department

Subj: **Saddlehorn Ranch – Preliminary Plan**

File: SP196

Ref: (a) C.R.S. 43-10-113 “*Safe Operating Area Around Airports*”
(b) Meadow Lake Airport Master Plan Update and Airport Layout Plan (2018)
(c) FAA Denver Airport District Office (ADO) letter dated October 9, 2018
(d) ACRP Research Report 206: “*Guidebook on Effective Land Use Compatibility Planning Strategies for General Aviation Airports*” (2019)

This proposed development lies entirely under the traffic pattern for Meadow Lake Airport’s primary runway (Runway 15-33) [see Enclosure 1a]. Based on current airport activity, we anticipate approximately 200-300 aircraft per day overflying this area at various altitudes and power settings. In addition, the approach to the crosswind runway (Runway 26) and departure path (Runway 08) is directly over this development [see enclosure 1b]. These facts necessitate appropriate consideration of compatible uses as any residences in the proposed development will be subject to noise and vibration. Moreover, due consideration should be given to the fact that there is a history of aircraft performing emergency landings within the proposed development.

We are encouraged that the applicants have expressed some willingness to work with the airport to minimize risk to persons in aircraft and on the ground, but remain concerned based on the nature of the proposed development and significant issues that must be addressed. The low-density proposal is consistent with the local area and the layout plan does allow some open area for emergency aircraft actions. Such measures are critical to maintain compatibility.

Enclosure (2) is a letter from the FAA Denver Airport District Office (ADO) expressing opposition to a proposed land use development north of and in line with Meadow Lake’s primary runway. The concepts expressed in that letter directly apply with the proposed Saddlehorn Ranch as well.

Enclosure (3) is Appendix H from the National Academies of Science “*Guidebook on Effective Land Use Compatibility Planning Strategies for General Aviation Airports*” (ACRP Research Report 206). Due to the direct impact of the proposed development and Meadow Lake’s existing traffic patterns, we believe that the “Avigation Easement” and a “Real Estate Disclosure” must be a condition for approval of the development plan.

Enclosure (4) is a proposed “Airspace Avigation Easement” that was provided to the applicant during the rezone consideration. We continue to insist that an avigation easement be given as a condition of approval and we are hopeful that the developer will see that an easement benefits all stakeholders by providing record notice and other issues attendant to being in close proximity to an airport. There was some concern expressed over the language of paragraph 3. It is very unlikely that there would be a

violation that would cause action in accordance with this provision. However, if it did become a concern, it would be due to a direct violation of Meadow Lake Airport's Part 77 surfaces [reference b, Airport Layout Plan (ALP), Airport Airspace Drawing-Existing, Sheet 7 of 21], which are the County's obligation to protect under CRS 43-10-113 [reference a].

The Meadow Lake Airport Association (MLAA) continues to express concern over rezoning and/or development of any areas within the Meadow Lake Airport Influence Area (AIA), until such time as El Paso County develops, approves, and publishes a "Compatible Land Use Plan" for the "AIA". The Falcon-Peyton Small Area Master Plan depicts the Airport Influence Area, but does not describe the how it is to be used by land use planners or zoning officials. Without the County's adoption of a "1041" plan for Meadow Lake Airport or otherwise complying with statutory requirements to protect the land areas defined in 14 CFR Part 77, there are no appropriate planning standards with which to evaluate development proposals in the "AIA".

Respectfully,

David E. Elliott

President, MLAA Board of Directors

RE: Meadowlake Ranch Development, EA # EA17227 - File # SKP184

Dear Mr. Dossey:

The Federal Aviation Administration, Denver Airports District Office (FAA) was notified by the Meadow Lake Airport Authority (MLAA) that El Paso County is considering approval of the above referenced residential development, Meadowlake Ranch. The FAA is opposed to residential uses of this proposed project. Due to the close proximity to Meadow Lake Airport's Runway 15/33, residential uses of this proposed development could potentially have negative impacts on persons and property on the ground and the safety and utility of the National Airspace System.

Meadow Lake Airport is a busy General Aviation airport, with approx. 383 based aircraft and 65,000 annual operations (a take-off or landing). It is utilized by a variety of aircraft, ranging from small, single-engine propeller airplanes up to jet aircraft that operate during the day and night. The airport is a Federally-funded, public use airport that is required by Federal law to remain open to all types of aircraft 24 hours a day, 7 days a week.

The Federal Government has made a significant investment of public funds in the Meadow Lake Airport. Under the current Federal airport aid program, the FAA has provided over \$7.5 million in development and planning grants to this airport. This investment requires the MLAA, as the airport sponsor, to comply with specific Federal obligations, known as Federal grant assurances. Among many other requirements, Federal grant assurances require MLAA to preserve and operate Meadow Lake Airport in accordance with FAA regulations and standards and to protect the airport from non-compatible land uses.

Incompatible land use at or near airports may result in the creation of hazards to air navigation and reductions in airport utility due to obstructions to flight paths or noise-related incompatible land use caused by residential construction development too close to the airport. FAA considers residential development adjacent an airport to be a non-compatible land use (see FAA Order 5190.6B, Airport Compliance Manual, Chapter 20, *Compatible Land Use and Airspace Protection*).

The southern boundaries of the proposed Meadowlake Ranch is less than 1,300 feet from the end of Runway 15/33 along the extended centerline of this runway. Runway 15/33 is the primary runway at Meadow Lake Airport, serving approx. 95 percent of the airport's annual aircraft operations. This means residents of Meadowlake Ranch will be subject to an average of 95 overflights daily. These aircraft will be at low altitudes as they approach and depart the airport. In accordance with standard operating procedures, aircraft approaching and departing Runway 15/33 could be operating at altitudes lower than 400 feet above the proposed project. This is particularly the case over higher terrain to the north of the airport.

As a consequence of aircraft overflights, residents would be subjected to considerable "single-event" noise impacts from aircraft overflights, which residents are particularly sensitive to during nighttime hours. In addition, there could be visual (perceptual) impacts from aircraft operating into and out of the airport. While these types of operations represent safe and typical flight procedures, it may be disconcerting to many people due to a perceived hazard of low flying aircraft.

Further, there is no guarantee that noise levels at the proposed development will remain the same. The proposed development is so close to Meadow Lake Airport that any change to aircraft operations, and the type of aircraft that use the airport, could readily increase the amount of aircraft noise and overflight over the proposed development. Please be aware FAA would not support any Federal assistance to mitigate aircraft noise or incompatible land uses associated with this proposed development, including soundproofing, the acquisition of houses and relocation of residents. Per FAA policy, remedial noise mitigation measures for new non-compatible development constructed after October 1, 1998 are not eligible for Federal funding (see FAA Final Policy on Part 150 Approval of Noise Mitigation Measures: Effect on the Use of Federal Grants for Noise Mitigation Projects, dated April 3, 1998).

Although the frequency of aircraft accidents is comparatively very low, the numbers of aircraft using the concentrated airspace of airport approach and departure areas, together with the complexities of takeoff and landing operations, does mean that accidents are proportionately higher in those areas than in other locations farther away from airports. MLAA reports that aircraft annually make emergency landings in the area of the proposed development. Most of these aircraft can be towed back to the airport because they have landed in an open field. The most recent incident was on August 23, 2018, when an aircraft lost power and crashed in the area of the proposed development, approx. a ¼ mile north of Runway 15/33. This aircraft sustained substantial damage. This is why the FAA strongly discourages the congregation of people under airport traffic patterns and approach and departure areas. The proposed Meadowlake Ranch development is within the approach and departure areas for Runway 15/33.

The FAA works with airport sponsors and their surrounding communities to keep approach and departures areas near an airport as clear as possible in order to protect people and property on the ground. In particular, land uses involving large congregations of people, including schools, churches and hospitals are strongly discouraged under approach and departures paths. The State of Colorado also has enacted similar requirements to protect persons and property near airports (see Colorado Revised Statute 24-65.1-202, Criteria for Administration of Areas of State Interest, and 43-10-133, Safe Operating Areas Around Airports).

In accordance with Title 14 of the Code of Federal Regulations (14 CFR) Part 77, *Safe, Efficient Use, and Preservation of the Navigable Airspace*, and Colorado state law, the developer of Meadowlake Ranch must request an airspace analysis of the proposed developed to determine potential aeronautical hazards in advance of construction to prevent or minimize the adverse impacts to the safe and efficient use of navigable airspace. In particular, multi-storied buildings in the proposed development must be analyzed to determine to if they need to be lowered and/or lighted with obstruction lights.

FAA reviews construction proposals through the submittal of FAA Form 7460-1, *Notice of Proposed Construction or Alteration*. If any portion of the proposal is located within 20,000 feet of a public use runway (and breaks a 100:1 plane coming off the nearest point of the nearest runway); or, is more than 200 feet above ground level at any location, the FAA requires the project's proponent to file a Form 7460-1. If the proposal does not meet any of the criteria above, it may still be necessary to file a Form 7460-1 if the structure requires an FCC license or there is a potential for navigational equipment interference. The FAA uses information provided on this form to conduct an aeronautical review to determine if the proposal will pose an aeronautical hazard and to minimize the adverse effects to aviation. FAA Form 7460-1 can be filed electronically at www.oa.faa.gov.

For the reasons discussed above, the FAA cannot support the construction of residences so close to Meadow Lake Airport. We recommend El Paso County not approve residential development as proposed and explore alternative uses of this land that better conform with Federal, state and industry recommendations for compatible land uses near airports.

If you have questions regarding the above comments or would like to meet to discuss our concerns, please contact me at (303) 342-1259.

Sincerely,

John P. Bauer
Manager
FAA/Denver Airports District Office

APPENDIX H

Sample Buyer Awareness Documents

Buyer Awareness Measures

Buyer awareness is an umbrella category for several types of implementation documents all of which have the objective of ensuring that prospective buyers of airport area property, particularly residential property, are informed about the airport's impact on the property. Samples of such implementation documents are included in this appendix.

- **Avigation Easement**—Avigation easements transfer certain property rights from the owner of the underlying property to the owner of an airport or, in the case of military airports, to a local government agency on behalf of the federal government (the U.S. Department of Defense is not authorized to accept avigation easements). Once an Airport Compatibility Zoning Ordinance (AZO) is established, dedication of an avigation easement can be obtained as a condition for approval of development on property subject to high noise levels or a need to restrict heights of structures and trees to less than might ordinarily occur on the property. Also, airports may require avigation easements in conjunction with programs for noise insulation of existing structures in the airport vicinity. A sample of a standard avigation easement is included in Figure H1.
- **Recorded Overflight Notification**—An overflight notification informs property owners that the property is subject to aircraft overflight and generation of noise and other impacts. No restrictions on the heights of objects, requirements for marking or lighting of objects, or access to the property for these purposes are included. An overflight notification serves only as buyer acceptance of overflight conditions. Suggested wording of an overflight notification is included in Figure H2. Unlike an avigation easement, overflight easement, or other type of easement, an overflight notification is not a conveyance of property rights. However, like an easement, an overflight notification is recorded on the property deed and therefore remains in effect with sale of the property to subsequent owners. Overflight notifications are generally appropriate in areas outside the highly noise-impacted areas, outside high-risk areas, and within areas where the height of structures and other objects would not pose a significant potential of being airspace obstruction hazards.
- **Real Estate Disclosure**—Some states, such as California, have adopted laws mandating notification of an airport's proximity as part of certain real estate transactions. The advantage of this type of program is that it applies to previously existing land uses as well as to new development. Disclosure is most important with regard to residential property but may also be appropriate for transactions regarding nonresidential property. California's law, which applies only to residential property, requires disclosure of a property's location within an airport influence area under any of the following three circumstances: (1) sale or lease of subdivided lands; (2) sale of common interest developments; and (3) sale of residential real property. In each case, the disclosure statement to be used is defined by state law as follows:

NOTICE OF AIRPORT IN VICINITY

This property is presently located in the vicinity of an airport, within what is known as an airport influence area. For that reason, the property may be subject to some of the annoyances or inconveniences associated with proximity to airport operations (for example: noise, vibration, or odors). Individual sensitivities to those annoyances can vary from person to person. You may wish to consider what airport annoyances, if any, are associated with the property before you complete your purchase and determine whether they are acceptable to you.

TYPICAL AVIGATION EASEMENT

For [Airport Name]

This indenture made this _____ day of _____, 20____, between _____ hereinafter referred to as Grantor, and the [County Name], a political subdivision in the State of [state name], hereinafter referred to as Grantee.

The Grantor, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, does hereby grant to the Grantee, its successors and assigns, a perpetual and assignable easement over the following described parcel of land in which the Grantor holds a fee simple estate. The property which is subject to this easement is depicted as _____ on "Exhibit A" attached and is more particularly described as follows:

[Insert legal description of real property]

The easement applies to the Airspace above an imaginary plane over the real property. The plane is described as follows:

The imaginary plane above the hereinbefore described real property, as such plane is defined by Part 77 of the Federal Aviation Regulations (14CFR Part 77), and consists of a plane [describe approach, transition, or horizontal surface]; the elevation of said plane being based upon the [Airport Name] official runway end elevation of [distance in feet] feet Above Mean Sea Level (AMSL), as determined by the Airport Layout Plan, the approximate dimensions of which said plane are described and shown on Exhibit A attached hereto and incorporated herein by reference.

The aforesaid easement and right-of-way includes, but is not limited to:

- (1) For the use and benefit of the public, the easement and continuing right to fly, or cause or permit the flight by any and all persons, or any aircraft, of any and all kinds now or hereafter known, in, through, across, or about any portion of the Airspace hereinabove described; and
- (2) The easement and right to cause or create, or permit or allow to be caused and created within all space above the existing surface of the hereinabove described real property and any and all Airspace laterally adjacent to said real property, such noise, vibration, currents and other effects of air illumination and fuel consumption as may be inherent in, or may arise or occur from or during the operation of aircraft of any and all kinds, now or hereafter known or used, for navigation of or flight in air; and
- (3) A continuing right to clear and keep clear from the Airspace any portions of buildings, structures or improvements of any kinds, and of trees or other objects, including the right to remove or demolish those portions of such buildings, structures, improvements, trees, or other things which extend into or above said Airspace, and the right to cut to the ground level and remove, any trees which extend into or above the Airspace; and
- (4) The right to mark and light, or cause or require to be marked and lighted, as obstructions to air navigation, any and all buildings, structures or other improvements, and trees or other objects, which extend into or above the Airspace; and
- (5) The right of ingress to, passage within, and egress from the hereinabove described real property, for the purposes described in subparagraphs (3) and (4) above at reasonable times and after reasonable notice.

Figure H1 – Typical Avigation Easement

H-4 Guidebook on Effective Land Use Compatibility Planning Strategies for General Aviation Airports

For and on behalf of itself, its successors and assigns, the Grantor hereby covenants with the County of [County Name], for the direct benefit of the real property constituting the [Airport Name] hereinafter described, that neither the Grantor, nor its successors in interest or assigns will construct, install, erect, place or grow, in or upon the hereinabove described real property, nor will they permit or allow any building structure, improvement, tree, or other object to extend into or above the Airspace so as to constitute an obstruction to air navigation or to obstruct or interfere with the use of the easement and rights-of-way herein granted. If Grantor fails to comply with the foregoing obligations within ten (10) days after Grantee gives written notice of violation to Grantor by depositing said notice in the United States mail, Grantee may enter the above-described real property for the purposes described in subparagraphs (3) and/or (4), above, and charge Grantor for the cost thereof.

The easements and rights-of-way herein granted shall be deemed both appurtenant to and for the direct benefit of that real property which constitutes the [Airport Name], in the County of [County Name], State of [state name]; and shall further be deemed in gross, being conveyed to the Grantee for the benefit of the Grantee and any and all members of the general public who may use said easement or right-of-way, in landing at, taking off from or operating such aircraft in or about the [Airport Name], or in otherwise flying through said Airspace.

Grantor, together with its successors in interest and assigns, hereby waives its right to legal action against Grantee, its successors or assigns for monetary damages or other redress due to impacts, as described in paragraph (2) of the granted rights of easement, associated with aircraft operations in the air or on the ground at the airport, including future increases in the volume or changes in location of said operations. Furthermore, Grantee, its successors, and assigns shall have no duty to avoid or mitigate such damages through physical modification of airport facilities or establishment or modification of aircraft operational procedures or restrictions. However, this waiver shall not apply if the airport role or character of its usage (as identified in an adopted airport master plan, for example) changes in a fundamental manner which could not reasonably have been anticipated at the time of the granting of this easement and which results in a substantial increase in the in the impacts associated with aircraft operations. Also, this grant of easement shall not operate to deprive the Grantor, its successors or assigns of any rights which may from time to time have against any air carrier or private operator for negligent or unlawful operation of aircraft.

These covenants and agreements run with the land and are binding upon the heirs, administrators, executors, successors and assigns of the Grantor, and, for the purpose of this instrument, the real property firstly hereinabove described is the servient tenement and said [Airport Name] is the dominant tenement.

DATED: _____

STATE OF } _____

ss

COUNTY OF } _____

On _____, before me, the undersigned, a Notary Public in and for said County and State personally appeared _____, and _____ known to me to be the persons whose names are subscribed to the within instrument and acknowledged that they executed the same.

WITNESS my hand and official seal.

RECORDED OVERFLIGHT NOTIFICATION

This *Overflight Notification* concerns the real property situated in the County of [County Name] and [insert if applicable] the City of _____, State of [State Name], described as _____ [APN No.:_____].

This *Overflight Notification* provides notification of the condition of the above described property in recognition of the property's proximity to the [Airport Name].

NOTICE OF AIRPORT IN VICINITY: This property is located in the vicinity of an airport and within the airport influence area. The property may be subject to some of the annoyances or inconveniences associated with proximity to an airport and aircraft operations (for example: noise, vibration, overflights or odors). Individual sensitivities to those annoyances can vary from person to person. You should consider what airport annoyances, if any, affect the Property before you complete your purchase and whether they are acceptable to you.

The Federal Aviation Administration (FAA) has regulatory authority over the operation of aircraft in flight and on the runway and taxiway surfaces at [Airport Name]. The FAA is, therefore, exclusively responsible for airspace and air traffic management, including ensuring the safe and efficient use of navigable airspace, developing air traffic rules, assigning the use of airspace and controlling air traffic. Please contact the FAA for more detailed information regarding overflight and airspace protection issues associated with the operation of military aircraft.

The airport operator, the County of [County Name], maintains information regarding hours of operation and other relevant information regarding airport operations. Please contact your local airport operator for more detailed information regarding airport specific operational issues including hours of operation.

This *Overflight Notification* shall be duly recorded with the [County Name] Assessor's Office, shall run with the Property, and shall be binding upon all parties having or acquiring any right, title or interest in the Property.

Effective Date: _____, 20__

Figure H2 – Sample Recorded Overflight Notification

AIRSPACE AVIGATION EASEMENT

This indenture, made this ___th day of _____, 20___, between _____ (hereinafter "GRANTOR"), and the Meadow Lake Airport Association (hereinafter "GRANTEE"), provides that:

A. The GRANTOR for and in consideration of fulfillment of a condition of project approval and other good and valuable consideration, the receipt of which is hereby acknowledged, does hereby grant to the GRANTEE, its successors and assigns, a perpetual and assignable easement in and over that certain parcel of real property more particularly identified and described in Exhibit A attached hereto and made a part hereof (said parcel hereinafter referred to as PARCEL), and a right-of-way for the free and unrestricted passage and flight of aircraft of the class, size and category as is now or hereinafter may be operationally compatible with Meadow Lake Airport, in, through, across and about the airspace above imaginary planes, as such those planes as defined by Part 77 of the Federal Aviation Regulations; Federal Aviation Administration (FAA) *Airport Design* Advisory Circular (current version); and *United States Standard for Terminal Instrument Procedures (TERPS)* (current version) over said PARCEL, as described below (hereinafter "Airspace").

B. The Airspace for avigation easement purposes above said PARCEL consists of the following, further depicted on Exhibit B attached hereto:

all of the air space above the imaginary planes that are described by Part 77 of the Federal Aviation Regulations.

all of the air space above the relevant imaginary planes that are described by the latest version of the FAA *Airport Design* Advisory Circular (AC 150/5300-13A).

all of the air space above the relevant imaginary planes that are described by the latest version of the *United States Standard for Terminal Instrument Procedures (TERPS)* as described in the FAA Order 8260.3E

C. The aforesaid easement and right-of-way described in Paragraphs A and B includes but is not limited to:

1. For the use and benefit of the public, the easement and continuing right to fly, or cause or permit the flight by any and all persons or aircraft, of the class, size and category as is now or hereinafter may be operationally compatible with Meadow Lake Airport, in, through, across or about any portion of the Airspace hereinabove described; and

2. The easement and right to cause or create, or permit or allow to be caused or created within the Airspace, such noise, dust, turbulence, vibration, illumination, air currents, fumes, exhaust, smoke and all other effects as may be inherent in the proper operation of aircraft, now known or hereafter used for navigation of or flight in air; and

3. The continuing and perpetual right to keep the Airspace clear of any portions of buildings, structures, or improvements of any and all kinds, and of trees, vegetation, or other objects, which extend into said Airspace; and

4. The right to mark and light, or cause or require to be marked or lighted, as obstructions to air navigation, any and all buildings, structures, or other improvements, and trees or other objects now upon, or that in the future may be upon, said PARCEL, and which extend into the Airspace may be required to mark according to FAA regulations or other regulation(s), rules, or order(s); and

5. The right of ingress to, passage within, and egress from said PARCEL, solely for the above stated purposes.

D. GRANTOR, on behalf of itself, its successors and assigns hereby covenants with the GRANTEE, Meadow Lake Airport Association, as follows:

1. GRANTOR, its successors and assigns, will not construct, install, permit or allow any building, structure, improvement, tree, or other object on said PARCEL, to extend into the Airspace, or to constitute an obstruction to air navigation, or to obstruct or interfere with the use of the easement and right-of-way herein granted; and

2. GRANTOR, its successors and assigns, will not hereafter use or permit the use of said PARCEL in such a manner as to create electrical or electronic interference with radio communication or radar operation between any installation upon Meadow Lake Airport and any aircraft.

E. The easement and right-of-way herein granted shall be deemed both appurtenant to and for the direct benefit of that real property which now or hereinafter constitutes Meadow Lake Airport, and shall further be deemed in gross, being conveyed to the GRANTEE for the benefit of the GRANTEE, and any and all members of the general public who may use said easement or right-of-way, taking off from, landing upon, or operating such aircraft in or about the Meadow Lake Airport or in otherwise flying through said Airspace.

F. This grant of aviation easement shall not operate to deprive the GRANTOR, its successors or assigns, of any rights that it may otherwise have from time to time

against any individual or private operator for negligent or unlawful operation of aircraft.

G. It is understood and agreed that these covenants and agreements run with the land and shall be binding upon the heirs, representatives, administrators, executives, successors, and assigns of the GRANTOR, and that for the purposes of this instrument, the PARCEL shall be the servient easement and Meadow Lake Airport shall be the dominant tenement.

H. The avigation easement, covenants and agreements described herein shall continue in effect until the Meadow Lake Airport shall be abandoned or shall cease to be used for public airport purpose, at which time it shall terminate.

I. Grantors agree to waive all damages and claims for damages caused or alleged to be caused by the Grantors violation of any aspect of this easement document.

J. _____, ("LENDER") made a loan to GRANTOR for the PARCEL which is secured by a mortgage and Deed of Trust recorded in the Clerk and Recorders Office of El Paso County on _____ at Reception Number _____ (the "Mortgage"). The Lender is willing to subordinate the Mortgage to this Airspace Aviation Easement in order to facilitate execution of this Airspace Aviation Easement. The Lender agrees that its Mortgage and all rights, interests, claims and remedies under the Mortgage shall be subordinate to this Airspace Aviation Easement and GRANTEE's rights thereunder with the same force and effect as if this Airspace Aviation Easement had been executed and recorded prior to the Mortgage.

IN WITNESS WHEREOF, the GRANTOR has hereunto set its/his/her hands and seals this ____th day of _____, 20__.
