Water Resources Report & Waste Water Resources Report.

Executive Summary: We have discussion and review of the proposed project with the Cherokee Metropolitan District. It has determined that there is adequate water supply and wastewater system and treatment capacity to provide services for the proposed project. We are currently working with JDS Hydro Consultants at this time to develop the reports required for submittal for both the Water Resources Report and Waste Water Resources Report. These reports will be submitted with the second submittal package for this Subdivision process.

Thank You,

Darin C. Weiss AIA
