1.0 INTRODUCTION

This Engineering Design and Operations Plan (EDOP) describes the design, waste acceptance, and operations of the Stericycle Colorado Springs Regulated Medical Waste (RMW) Transfer Facility (Stericycle Facility, or Facility) located in Colorado Springs, Colorado. The Facility will be co-located at 1965 Commercial Blvd at the Waste Management of Colorado, Inc. (WM) Colorado Springs Hauling and Transfer Station (WM Facility) that is permitted separately. Stericycle Facility route vehicles will park overnight at the WM truck facility located at 80 Chambers Street, Colorado Springs, Colorado 80907. Both parcels of land for the purposes of this EDOP will be referred to as the Site. Figure 1 shows the Vicinity Map. Property owners within ½ mile of the Facility, corresponding to the parcels depicted on the Vicinity Map, are listed in Table 1. Figure 2 shows a Site Location Map of the WM/Stericycle Facility.

This EDOP has been prepared in accordance with Colorado Department of Public Health and Environment (CDPHE) Regulations Pertaining to Solid Waste Sites and Facilities 6 Colorado Code of Regulations (CCR) 1007-2 Part 1 (Regulations), Section 13.7.

2.0 GENERAL INFORMATION

Pursuant to Section 13.7.2(A), this section summarizes the general information for the proposed Stericycle Facility, including a description of the facility operations, owner and operator information, physical location and legal description of the Facility, irrigation rights, and location of floodplain areas.

Stericycle, Inc. (Stericycle) is a business services company that specializes in protecting people and reducing risk. Stericycle works with companies in a wide array of industries, such as healthcare, manufacturing, and retail to improve employee and customer safety, maintain regulatory compliance, safely dispose of regulated materials, and manage corporate and personal risk.

The proposed Stericycle Colorado Springs RMW Transfer Facility will be co-located on a property that is currently owned and operated as the WM Colorado Springs Hauling and Transfer Station. On November 4, 2024, Stericycle became a wholly-owned subsidiary of Waste Management Holdings, Inc., (WMHI) a subsidiary of Waste Management, Inc. (WMI) (the Merger). WMI is publicly traded on the New York Stock Exchange in the United States (U.S.) under the symbol WM. Stericycle is the entity that survived the Merger and remains as a legal entity, continuing to operate under that name, with the same tax identification number. While there was a change in the corporate officers of Stericycle upon closing, there are no operational changes as a result of the Merger.

Stericycle is proposing to add their RMW services to the existing WM property, which is the purpose of submitting this EDOP. This will consist of four Stericycle route vehicles performing collection and then parking at the Facility overnight as well as parking a refrigerated transfer trailer of RMW at the existing WM Facility. There will be no changes to the existing WM operations. No additional structures, stockpiles, and/or retention ponds will be constructed as part of this proposed operational change. There are no water or wastewater services proposed to be added to the Stericycle operations area. The Site has existing electrical infrastructure near the proposed Stericycle operations area that may be utilized to allow for lighting and powering a heat source during the winter months. This work does not increase the existing electrical service size, load calculation, or demand for the Site. There is no plan for extension of gas services for the Stericycle operations area. The transfer operations include route vehicles, trailers, and refrigerated transfer trailers which do not require utilities for operation.

2.1 FACILITY SUMMARIES

The existing WM Facility is a municipal solid waste collection and transportation facility located in El Paso County, Colorado, which is permitted separately. Structures in place at the WM Facility consist of an office building, a maintenance shop, a gatehouse, and a transfer station building. Figure 2 shows the WM Facility buildings.

The proposed Stericycle Facility will temporarily store and transfer RMW, Animal and Plant Health Inspection Service (APHIS) waste (regulated garbage), non-hazardous pharmaceutical waste, and related waste that is treated at Stericycle's autoclave and incineration facilities. (See the Stericycle Waste Acceptance Policy, Appendix A, for types of waste that are managed by Stericycle.) Transfers are conducted in a truck-to-truck manner, including from smaller route trucks to larger transfer trailers by trained personnel. Transfers may occur either directly between the two trucks or via loading dock(s). RMW and APHIS transferred at the Facility are typically transported to the Stericycle facilities, primarily to the Dacono Facility for logistics and/or treatment prior to eventual disposal. Figure 2 shows the Stericycle Facility trailer location and route vehicle parking areas. Figure 3 shows the Stericycle Facility stormwater controls.

2.2 HOURS OF OPERATION

The existing WM Facility typically operates up to 52 weeks a year, five days a week, 24 hours a day, as needed, to manage and process incoming medical waste. Normal business hours are 5:00 a.m. to 5:00 p.m., Monday through Friday. The proposed Stericycle Facility will maintain these same operational hours as they will be co-located at the same Site. A description of the proposed Stericycle Facility operations is provided in Section 7.0 of this EDOP.

2.3 FACILITY CONTACTS

Title	Name	Phone Number	Email Address	Mailing Address
Facility Manager	Stericycle/WM Colorado Springs Facility	719-216-0966	N/A	1965 Commercial Blvd Colorado Springs, CO 80910
Property Owner	Waste Management of Colorado, Inc.	719-216-0966	N/A	Waste Management of Colorado, Inc., 1965 Commercial Blvd., Colorado Springs, CO 80906
Emergency Contacts				
Facility Manager	Jason Cloward	801-330-8574	Jason.Cloward@stericycle.com	5355 Colorado Blvd., Dacono, CO 80514

Environmental, Health, and Safety (EHS) Manager	Marc Wasyliw	262-237-4118	Marc.Wasyliw@stericycle.com	5355 Colorado Blvd., Dacono, CO 80514
Permitting Manager	Jay Vance	801-971-2042	Jay.Vance@stericycle.com	5355 Colorado Blvd., Dacono, CO 80514

2.4 LEGAL DESCRIPTION

The existing WM Facility occupies two parcels (APN 6429101013 and 6429400038) in Section 29 of Township 14 South (T14S), Range 66 West (R66W), Mount Diablo Base and Meridian (MDB&M) as shown in Figure 4.

2.5 FLOODPLAINS

The existing WM Facility is located outside of the 100-year flood plain, as identified by the Federal Emergency Management Agency Flood Insurance Rate Map for El Paso County, Colorado (Panel 741 of 1300). Floodplains within one-half (1/2) mile are shown in Figure 5.

3.0 LIST OF OPERATING PERMITS

The proposed Stericycle Facility will operate under the following permit:

- A Certificate of Designation (CD) to be issued by the City of the Colorado Springs Planning Commission

4.0 JOB RESPONSIBILITIES AND TRAINING REQUIREMENTS

At the proposed Stericycle Facility, job responsibilities and training requirements are clearly defined to provide safe and compliant medical waste management. Detailed job titles, duties, and descriptions for employees are outlined in Appendix B and specific training requirements tailored to each role are provided in Appendix C. Site personnel receive training on the contents of the EDOP, and their training records are maintained through Stericycle's web-based training platform.

To provide personnel safety, personal protective equipment (PPE) requirements are established for tasks involving potential contact with RMW (including sharps), which are summarized in Table 2. These requirements apply to both route and transfer trailer drivers as well as other employees who could potentially come into contact with medical waste.

Training is conducted, at a minimum, as follows:

- Upon hire;
- When an existing employee is assigned additional duties related to medical waste management (e.g., through a reassignment or promotion);
- When medical waste management procedures are changed or new procedures implemented; and
- On an annual refresher basis.

Employee training will include topics pertinent to the job description as per the applicable CDPHE and U.S. Department of Transportation (USDOT) Regulations as directed by the Facility Manager.

5.0 WASTE CHARACTERIZATION, ACCEPTANCE, AND HANDLING PLAN

Pursuant to Section 13.7.2(C)(4) of the Regulations, this section summarizes the Waste Characterization, Acceptance, and Handling Plan (WCAP) for the proposed Stericycle Facility, including waste screening methods and waste exclusion procedures. Procedures for managing and handling non-conforming or unacceptable (prohibited) waste are also provided.

5.1 WASTE ACCEPTANCE POLICY

The proposed Stericycle Facility will accept RMW generated in a broad range of medical, diagnostic, therapeutic, and research activities, in accordance with Stericycle's Regulated Medical Waste Acceptance Policy (Appendix A). Herein, the term "medical waste" includes biohazardous, biomedical, infectious, or RMW as defined by federal, state, or local laws, rules, regulations, and guidelines.

Unless defined otherwise by state regulations, excluding from medical waste are the following:

- Resource Conservation and Recovery Act (RCRA) hazardous waste;
- RCRA hazardous waste pharmaceuticals;
- Drug Enforcement Administration (DEA) scheduled drugs (including controlled substances and bulk chemotherapy drugs);
- Waste containing mercury or other heavy metals (RCRA hazardous waste);
- Universal waste (e.g., batteries);
- Cauterizers;
- Non-infectious dental waste;
- Chemicals (e.g., solvents, reagents, corrosives, ignitable) classified as hazardous;
- Regular garbage; and
- Gas cylinders.

The proposed Stericycle Facility cannot accept these excluded materials packaged as RMW. Additionally, the proposed Stericycle Facility cannot accept bulk liquids, radioactive materials, or complete human remains. Unacceptable waste, when identified at a Stericycle facility, is rejected from treatment and from forwarding transportation and is instead managed as non-conforming waste. Such waste is kept in a designated non-conforming waste storage area while arrangements are made for proper off-site disposition of non-conforming waste.

The proposed Stericycle Facility will also accept "sharps," defined herein as an object contaminated with a pathogen or that may become contaminated with a pathogen or that may be

contaminated with a pathogen through handling or during transportation, and also capable of cutting or penetrating skin or a packaging material. Sharps may include needles, syringes, scalpels, sutures, broken glass, culture slides, suture dishes, broken capillary tubes, broken rigid plastic, and exposed ends of dental wires. These wastes are handled by Stericycle personnel only within closed containers as directed by the EHS Manager and/or the Facility Manager.

The proposed Stericycle Facility may also be permitted to accept U.S. Department of Agriculture (USDA) APHIS-regulated garbage via a compliance agreement with the U.S. Department of Homeland Security (DHS) Customs and Border Protection (CBP) (copies of which are held, including electronically, and accessible at the Site). Regulated garbage includes certain types of plant and animal material wastes originating from a means of conveyance that has been in port outside the U.S. and Canada (e.g., food waste from international flights or military transport vehicles, quarantined materials).

The proposed Stericycle Facility may also accept for transfer the following wastes:

- Trace chemotherapy-contaminated waste, including vials, syringes and needles, spill kits, tubing and bags, contaminated gloves and gowns, and related materials as defined in applicable laws, rules, regulations, or guidelines;
- Pathological waste (including human or animal body parts, organs, tissues, and surgical specimens);
- Non-RCRA hazardous waste pharmaceuticals (excluding DEA scheduled drugs and controlled substances); and
- Information storage media (e.g., paper goods and magnetic tapes) for confidential data destruction.

5.2 WASTE SCREENING, RECEIPT, AND HANDLING

Waste received at the proposed Stericycle Facility will come from Stericycle collection routes. Generator education/certification (e.g., via Stericycle.com) and driver education are the primary screening mechanisms to prevent unacceptable waste from entering the Facility. Generators must demonstrate compliance with contractual provisions regarding waste content by providing signed documentation with each load picked up by Stericycle. Driver education and training is an additional screening mechanism. The driver training requirements are provided in Appendix C of this EDOP.

Stericycle is to follow rules and policies for transporting waste:

- Transporters shall not accept waste that is improperly packaged;
- Regulated medical waste shall be transported in a manner that prevents leakage of the contents of the package;
- The integrity of the package shall be maintained at all times;
- The labelling and marking of the package shall be maintained at all times;
- Loads containing regulated medical waste shall be covered during transportation;
- The operator of each vehicle shall be knowledgeable of the Emergency Response and Contingency Plan (ERC Plan, provided in Appendix D of this EDOP);
- Vehicles used for storage and/or transport of regulated medical waste shall be marked with the biohazard symbol; and
- Vehicles used for the transportation of regulated medical waste shall be thoroughly cleaned and disinfected before being used for other purposes and in the event of leakage from packages.

Stericycle reserves the right to reject waste for pickup if the package is as follows:

- Leaking;
- Packaged incorrectly;
- Not labeled or labeled incorrectly;
- Structurally compromised; or
- Known to contain other forms of unacceptable waste.

Identifiable unacceptable waste is not to be offered for transportation by the generator nor removed from the generator by Stericycle personnel.

5.3 PROCEDURES IN THE EVENT OF RECEIPT OF NON-CONFORMING WASTE

Packaged waste that is identified at the Stericycle Facility as unacceptable waste (waste not meeting required specifications, including, but not limited to, radioactive waste) is managed as non-conforming waste. The following actions will be considered:

- Notify the generator or return the non-conforming waste to the generator;
- Segregate the waste containers and place within the non-conforming waste storage area;
- Require the generator or a certified third-party hazardous or radioactive waste company to remove the container(s) from the Dacono Facility; and

- Document the receipt and proper management of the non-conforming waste and place documentation in operating records of the transfer facility and Dacono autoclave facility.

5.4 UNACCEPTABLE WASTE HANDLING

Inadvertent unacceptable waste (non-conforming waste), upon identification at the Stericycle Facility, will be returned to the generator or segregated until arrangements are made to complete removal of and off-site disposition of the non-conforming waste from the Stericycle Facility, including applicable special handling or segregation.

6.0 WASTE TRACKING SYSTEM

The waste tracking system employed at the proposed Stericycle Facility is conducted in accordance with Section 13.7.2(C)(7) of the Regulations and other relevant requirements.

An electronic waste tracking system will be used to document the date received, source, weight, and types of waste being transported or stored by Stericycle. Barcode labels on containers may be used as part of the tracking system. Manifest records may be maintained electronically.

7.0 OPERATIONAL PROCEDURES

Pursuant to Section 13.7.2(C), this section summarizes the operational procedures for the proposed Stericycle Facility necessary to reduce threats to public health and eliminate the possibility of releases. This section provides details of the day-to-day site activities including maximum storage time, records and tracking procedures, and storage area cleaning procedures. Procedures for managing and handling non-conforming or unacceptable (prohibited) waste are also provided. This EDOP will be accessible on site, including electronically.

7.1 WASTE TRANSFER

Acceptable waste may be transferred or forwarded using tracking as described in Section 6.0. Tracking records will be kept for a minimum of one year. Reusable containers and handling and washing systems may be used. Stericycle-approved waste handling equipment and practices may be changed as directed by the Facility Manager, based on operational efficiency and/or equipment upgrades.

7.2 WASTE STORAGE

Waste is stored in accordance with applicable regulations in manner and location that prevents leakage and maintains the integrity of the packaging. Waste may be stored in route trucks and refrigerated transfer trailers that are constructed of impervious, corrosion-resistant materials that can be cleaned and disinfected. Trailers that are being loaded or unloaded will be parked in areas that provide adequate drainage and are free of standing water.

Trained personnel are to be present during transfer operations. Route vehicles and trailers are labeled in accordance with transportation requirements regarding the type of waste being transported or handled. Unauthorized personnel are not allowed in waste storage areas. The exteriors of trucks and waste storage containers are marked clearly with universal biohazard symbols. A sign will be posted on the perimeter fence to read: “Caution – Biohazardous Waste Storage Area – Unauthorized Persons Keep Out.”

Trailers of waste may be hauled to a permitted Stericycle facility, including the autoclave treatment facility located in Dacono, Colorado. If the medical waste is stored for longer than 24 hours and/or if odors or nuisance conditions develop, the waste will be refrigerated to 45 °F or less, or the waste will be transported off-site to an approved treatment or disposal facility. Pursuant to 6 CCR 1007-2, Section 13.7.2.C(6)(iii), medical waste shall be stored for no more than 14 calendar days from the date of receipt at the storage facility before being transported to an approved treatment or disposal facility. Stericycle typically stores RMW on-site for no longer than 72 hours; however, scheduling may require additional time to transport the RMW to the appropriate treatment facility.

Stericycle will not exceed the maximum storage time set forth in 6 CCR 1007-2, Section 13.7.2.C(6)(iii).

No waste materials will be stored outdoors outside of the trailers. Cargo areas of trailers and vehicles store waste will be locked and secured. Parking areas for transfer trailers and route vehicles are locked and secured when the WM and Stericycle Facility are vacated.

7.3 MEDICAL WASTE CONTAINER REQUIREMENTS

Generators are solely responsible for properly segregating, packaging, and labeling of RMW prior to pick up by Stericycle or prior to delivery and are educated by Stericycle on infectious waste packaging requirements. Transportation containers for medical waste are made of rigid, non-bulk packaging that conform to the USDOT packaging requirements, which require that waste be stored, packaged, contained, and transported in a manner that prevents release of waste material and in a manner to prevent the occurrence of nuisance conditions. RMW being transported is accompanied by a properly completed shipping document (in accordance with 49 CFR 172.202).

Incoming waste at the proposed Stericycle Facility will typically be received in the following types of containers:

- Reusable plastic tubs
- Plastic sharps containers:
 - Reusable
 - Disposable
- Disposable corrugated fiberboard containers
- Pallets and secure bags/boxes of shredded paper waste

Disposable sharps containers and RMW are to be received in reusable plastic tubs/containers or fiberboard boxes that are in closed, leak-resistant, moisture impervious orange/red plastic biohazard-labeled bags to prevent leakage or loss of containment of waste materials. Puncture-resistant sharps containers (both disposable and reusable) typically do not use liners and are sealed for transportation. Biohazard bags used as transportation liners will meet current and applicable USDOT regulations and American Society for Testing and Materials (ASTM) standards. Transport containers are closed and/or sealed prior to transportation to prevent leakage or loss of containment of waste materials.

USDA APHIS-regulated garbage is transported and handled in accordance with facility permits, CDPHE rules, and current DHS CBP Compliance Agreement.

Stericycle reserves the right to reject waste for forwarding to treatment if the packaging is not labeled correctly.

7.4 CONTROLS AND INSPECTIONS

7.4.1 Nuisance Condition Control

Procedures and practices may be implemented by the Facility Manager regarding fugitive dust, litter, odors, leaking or broken containers, equipment malfunctions, and disease vectors. Waste materials will not be stored outdoors or outside of the locked trailers or trucks.

7.4.2 Emergency Response and Contingency Plan

The proposed Stericycle Facility ERC Plan describes response to emergencies such as fires, natural disasters, and spills. A copy of this plan can be found in Appendix D.

If the Stericycle Facility is ever unable to handle incoming waste, the waste will be redirected to another properly licensed facility.

8.0 DESIGN

This section summarizes the design criteria to demonstrate that the proposed Stericycle Facility is designed and operated to meet certain requirements within the existing WM Facility. This section provides details about the existing WM Facility design in addition to the proposed Stericycle Facility design, which includes overall design, access points and traffic routes, structures, treatment and disposal areas, security, litter control, and stormwater management.

8.1 DESIGN OF FACILITY

8.1.1 Facility Access Points and Traffic Routing

The existing WM Facility includes designated access points and clearly defined traffic routes to promote the safe and efficient movement of vehicles in and around the Site (Figure 2). Existing access roads provide entry for waste transport vehicles, employee traffic, and service providers. Internal driveways and designated circulation paths guide the flow of traffic within the Facility to minimize congestion and verify separation between public and operational areas. The existing WM Facility includes signage, gate controls, and dedicated traffic lanes to enhance site flow and security.

The proposed Stericycle Facility will follow the same designated access points, traffic routes, signage, gate controls, and dedicated traffic lanes as set by the existing WM Facility to promote the safe and efficient movement of vehicles in and around the Site. The proposed Stericycle Facility will be located on the east side of the existing Site (Figure 2), in the hauling and container storage area, to prevent interruption of existing WM operations.

8.1.2 Buildings

The existing WM Facility includes multiple existing buildings that are used only for WM Colorado Springs Hauling and Transfer Station operations. The WM Facility includes an office building, a maintenance shop, gatehouse, transfer station and Conex box storage areas.

The proposed Stericycle Facility operation is not envisioned to utilize the existing WM buildings for their operations; instead, Stericycle's principal operations will take place on the east side of the Site, in the hauling and container storage area, as shown in Figure 2. Section 7.0 of this Facility Plan describes the Stericycle RMW operations, which will take place at the same facility as the WM waste operations; however, in separate areas of the Site.

8.1.3 Treatment and Disposal Areas

The proposed Stericycle Facility will include no treatment or disposal operations. As described in Section 7.0, the Stericycle Facility operation will consist of managing route trucks and refrigerated transfer trailers that collect and transfer RMW off-site for treatment and processing. At the proposed Stericycle Facility, RMW will be transferred among route vehicles, trailers, including refrigerated transfer trailers. Dock plates may be used between the trailers, vehicles and trucks to facilitate operations. RMW may be hauled off-site to a permitted Stericycle treatment facility, including the Stericycle autoclave in Dacono, Colorado, or other designated off-site facilities.

8.1.4 Fences and Gates

The existing WM Facility is equipped with permanent fencing and secure gates to restrict unauthorized access and verify the safety and containment of biohazardous medical waste. The fencing fully encloses the waste handling and storage areas, and access gates will remain locked when not in use by authorized personnel.

The proposed Stericycle Facility will be located within the boundary of existing WM Facility perimeter fencing and secure gates and will also be kept secure to restrict unauthorized access. Figures 2 and 3 show the location of WM Facility operations as well as the Stericycle Facility operations.

8.1.5 Stormwater Management Structures

The existing WM Facility includes appropriate stormwater management structures designed and maintained to prevent contamination of surface water and to control runoff from operational areas. These consist of graded surfaces, curbing, storm drains, and other engineered control systems that direct stormwater away from waste handling and storage areas and to prevent the unintentional release of contaminants into the environment. Stormwater Controls are shown in Figure 3.

The existing WM Facility maintains a Stormwater Pollution Prevention Plan (SWPPP) to address monitoring, inspections, and best management practices (BMPs) for pollution control. The SWPPP is available on-site.

8.1.6 Areas for RMW Handling and Storage

Figure 2 shows the areas to be used for Stericycle's RMW operations as well as the location of WM hauling and transfer areas.

8.2 UNIVERSAL BIOHAZARD SYMBOL

Stericycle vehicles used for the storage and transport of regulated medical waste must be clearly marked with the universal biohazard symbol. In compliance with this requirement, the exteriors of trucks and waste storage containers are visibly labeled with universal biohazard symbols, and a sign posted on the perimeter fence reads: “Caution – Biohazardous Waste Storage Area – Unauthorized Persons Keep Out.” Access to areas designated for waste storage is limited to authorized personnel.

8.3 CONTAINER MATERIALS

Containers for RMW will be constructed of durable, non-porous materials that are resistant to moisture, chemicals, and microbial contamination. These surfaces are designed to be easily cleaned and disinfected to maintain a sanitary environment and prevent the absorption or retention of biohazardous materials. The construction materials selected support compliance with medical waste handling regulations and are suitable for environments where frequent decontamination is required. Containers will be maintained in good repair to promote ongoing protection against leaks, spills, and potential contamination as directed by the Facility Manager.

8.4 SPILL MANAGEMENT AND RESPONSE

Section 8.1.5 of this EDOP contains information on how the Stericycle Facility will utilize the existing stormwater management structures at the WM Facility to manage stormwater in their designated area on-site. Transport containers are closed and/or sealed prior to transportation to prevent leakage or loss of containment of waste materials. A spill kit will be readily available for use. Spill response procedures are provided in Appendix D. These features are intended to verify proper containment and disposal of accidental spills, supporting safe and compliant operation of the facility.

8.5 ENVIRONMENTAL PROTECTIONS

RMW will be staged in accordance with applicable regulations in manner and location that prevent leakage, maintain the integrity of the packaging, and provide protection from water, precipitation, and wind. Storage units, consisting of route trucks and trailers, including refrigerated transfer trailers, are constructed of impervious, corrosion-resistant materials that can be cleaned and disinfected. Trailers that are being loaded or unloaded will be parked in areas that provide adequate drainage and are free of standing water. RMW will be stored in enclosed trailers to protect RMW from stormwater exposure.

9.0 SECURITY AND ACCESS CONTROL

The proposed Stericycle Facility can be accessed via two driveways on Commercial Blvd., with trucks able to enter and exit through the west entrance, as shown in Figure 2. The site building will be equipped with a security system, including surveillance and coded entry doors, which will remain locked. Trailers will also be locked and secured when not in active use. Before beginning work on-site, contractors must complete relevant training and agree to follow Stericycle's applicable safety policies as directed by the Facility Manager.

10.0 CLOSURE PLAN

10.1 NOTIFICATIONS

The CDPHE, the City of Colorado Springs, and current customers (as determined by the Facility Manager) will be notified in writing at least 60 days in advance of the proposed closure date. The closure date for the proposed Stericycle Facility will be determined by the Facility Manager.

Within 30 days of completing closure activities, the proposed Stericycle Facility will provide written notification to the CDPHE and the City of Colorado Springs to document that proper management of wastes has taken place in accordance with the closure requirements presented herein and that the closure requirements have been satisfied.

10.2 MEASURES TAKEN TO REMOVE THE REMAINING REFUSE AND RESIDUE

The Facility will not accept new or additional waste deliveries for storage or transfer within 14 days ahead of the proposed closure date.

Within 14 days after receiving the final load of waste, materials will be transported from the proposed Stericycle Facility to an appropriate solid waste storage or processing facility. Equipment will be thoroughly cleaned, disinfected, and removed from the Facility. Additionally, the Facility and waste containers will be properly cleaned and sanitized.

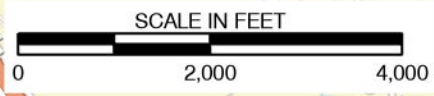

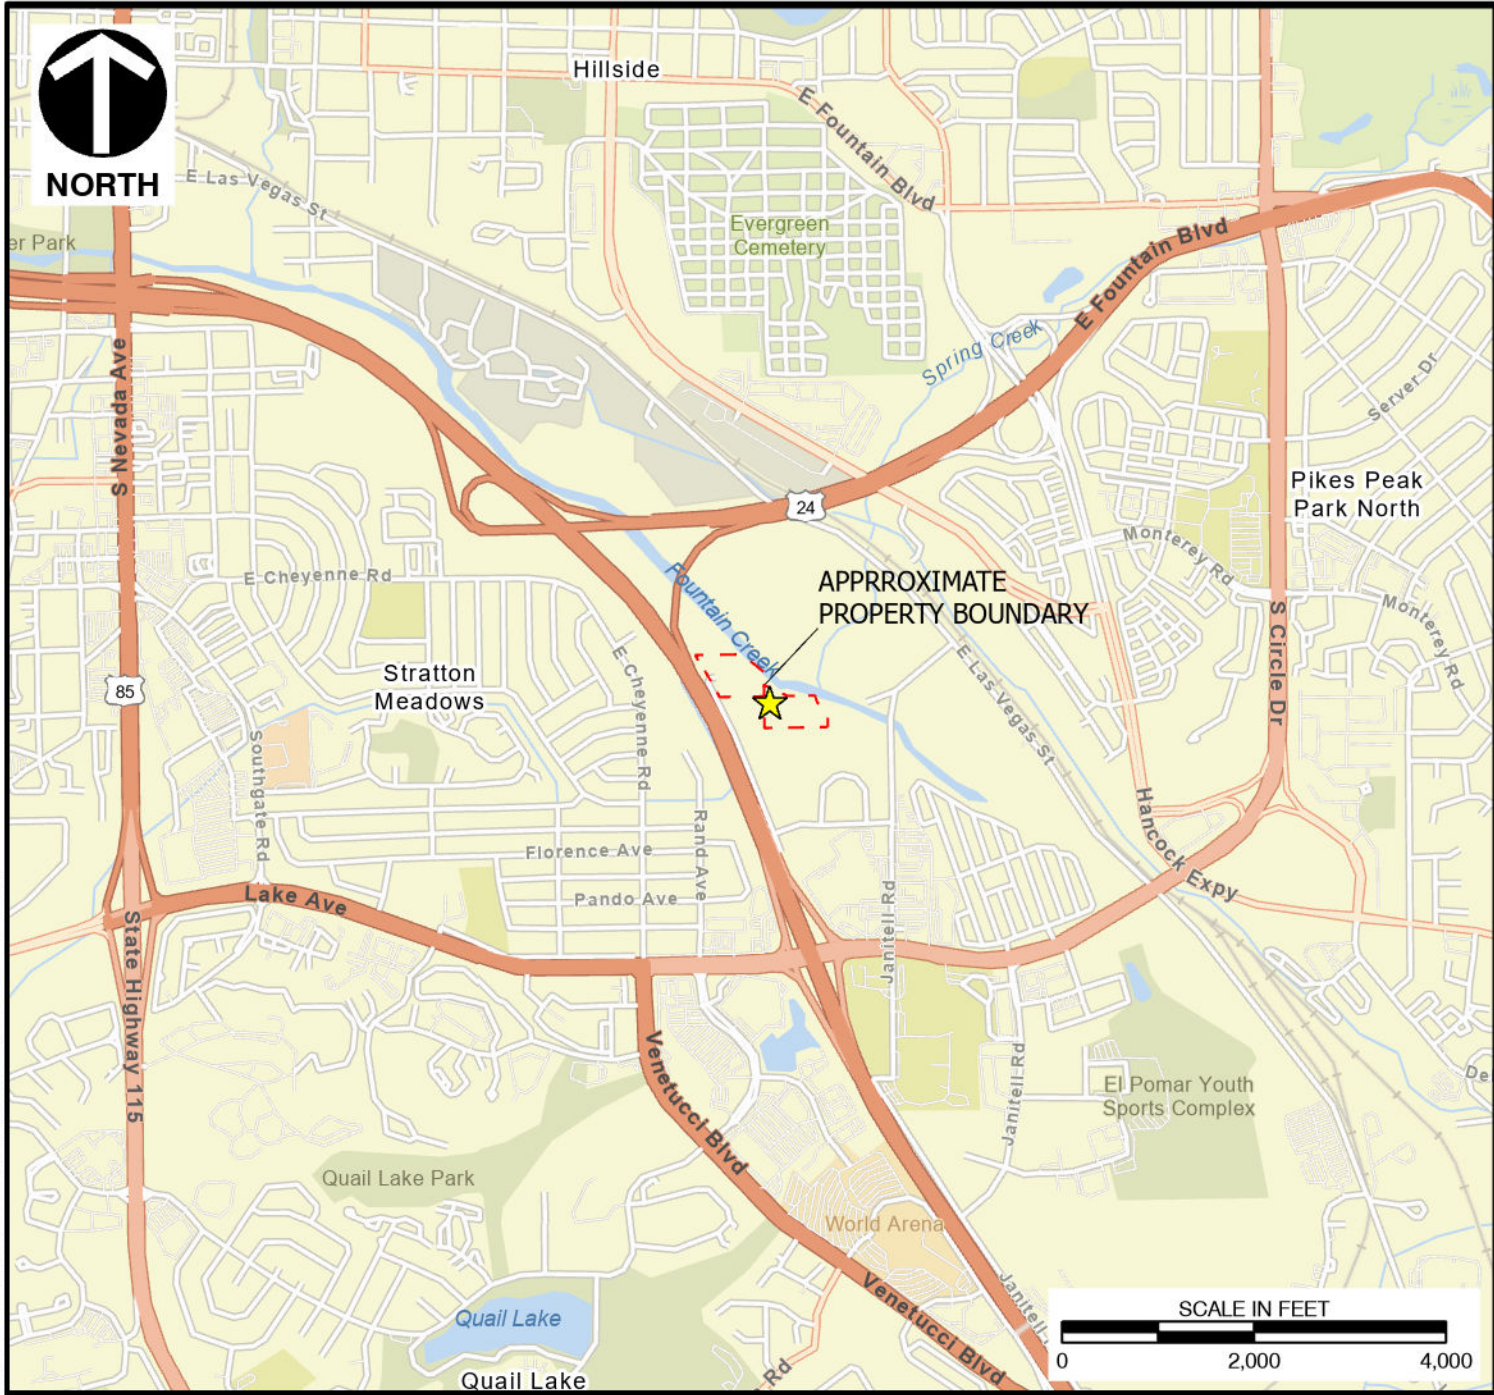

11.0 RECORDKEEPING

Records for the proposed Stericycle Facility will generally be maintained electronically and will be accessible at the proposed Stericycle Facility. Records will typically include the following:

- The Facility's Certificate of Designation;
- The Facility's approved EDOP;
- Copies of waste manifests;
- Records of ERC Plan action; and
- Copies of daily inspections.

Operating records will be provided to the CDPHE upon request. Additionally, site records required by Section 13.8.5 of the Regulations will be maintained by Stericycle for a minimum period of three years.

APPENDIX A

STERICYCLE REGULATED MEDICAL WASTE ACCEPTANCE POLICY

Regulated Medical Waste Acceptance Policy

Stericycle policy requires compliance with all applicable regulations regarding the collection, transportation and treatment of regulated medical waste. Federal Department of Transportation (DOT) regulations require the generator of regulated medical waste to certify that the packaging and documentation of transported regulated medical waste complies with DOT regulations regarding waste classification, packaging, labeling and shipping documentation. To ensure that neither Stericycle nor the generator of regulated medical waste violates applicable regulations, it is imperative that all parties understand the rules regarding proper identification, classification, segregation and packaging of regulated medical waste. The purpose of this policy is to summarize the minimum requirements for preparing your medical waste for collection, transportation and treatment. Additional facility or state-specific waste acceptance policies may apply based on permit specifications. Please contact your local representative for further information or email customer@stericycle.com.

REGULATED MEDICAL WASTE

Stericycle accepts medical waste generated in a broad range of medical, diagnostic, therapeutic and research activities. The term "medical waste" includes biohazardous, biomedical, infectious or regulated medical waste as defined under federal, state or local laws, rules, regulations and guidelines. Except as defined by specific state regulations, this **excludes** RCRA hazardous waste pharmaceuticals, all DEA scheduled drugs including controlled substances, bulk chemotherapy, waste containing mercury or other heavy metals, batteries of any type, cauterizers, non-infectious dental waste, chemicals such as solvents, reagents, corrosives or ignitable materials classified as hazardous waste under Federal and/or state-specific EPA Regulations. In addition, Stericycle **cannot accept** bulk liquids, radioactive materials, or complete human remains (including heads, full torsos and fetuses). Stericycle **cannot accept** these excluded materials packaged as regulated medical waste. All lab wastes or materials which contain or have the potential to contain infectious substances arising from those agents listed under 42 CFR Part 73 (HHS), 7 CFR Part 331 (USDA-Plant Protection and Quarantine), and 9 CFR Part 121 (USDA-Veterinary Services) are strictly prohibited from medical waste by federal law and must be pretreated prior to disposal. Separate protocol and packaging requirements may apply for the disposal of non-hazardous pharmaceuticals. Hazardous waste transportation services may be offered in certain geographical locations, under separate contract. Please contact your local representative for details and packaging specifications.

**Un-dispensed from DEA Registrant*

WASTE SEGREGATION AND PACKAGING

The generator is solely responsible for properly segregating, packaging and labeling of regulated medical waste. Proper segregation and packaging reduces the potential for accidental release of the contents and exposure to employees and the general public. DOT regulations (49 CFR 173.197) require that all packages of regulated medical waste be prepared for transport in containers that meet all of the following requirements: rigid, leak resistant, impervious to moisture, of sufficient strength to prevent tearing or bursting under normal conditions of use and handling, sealed to prevent leakage during transport and puncture resistant for sharps. All regulated medical waste must be accompanied by a properly completed shipping document (See 49 CFR 172.202).

MANAGEMENT OF NON-CONFORMING WASTE

As required by regulation and company policy, Stericycle employees may refuse containers that are non-conforming because of their contents or are improperly packaged, leaking, damaged or likely to create a risk of exposure to employees or the general public. Any waste found to be non-conforming to this Waste Acceptance Policy identified in route to, or at a Stericycle location, may be returned to the generator for proper packaging and disposal, or may be rerouted for appropriate destruction; this may include improperly marked regulated medical waste which should have been identified for incineration (i.e. pathological, chemotherapy or non-hazardous pharmaceuticals). Proper segregation and packaging is essential to ensure compliant and safe handling, collection, transportation and treatment of regulated medical waste.

STERICYCLE REGULATED MEDICAL WASTE ACCEPTANCE POLICY CHECKLIST

ACCEPTED REGULATED MEDICAL WASTE

- Sharps - Means any object contaminated with a pathogen or that may become contaminated with a pathogen through handling or during transportation and also capable of cutting or penetrating skin or a packaging material. Sharps includes needles, syringes, scalpels, broken glass, culture slides, culture dishes, broken capillary tubes, broken rigid plastic and exposed ends of dental wires.
- Regulated Medical Waste or Clinical Waste or Biomedical Waste - Means a waste or reusable material derived from the medical treatment of an animal or human, which includes diagnosis and immunization, or from biomedical research, which includes the production and testing of biological products.

ACCEPTED REGULATED MEDICAL WASTE WHICH MUST BE IDENTIFIED AND SEGREGATED FOR INCINERATION

- Trace Chemotherapy Contaminated Waste: RCRA Empty drug vials, syringes and needles, spill kits, IV tubing and bags, contaminated gloves and gowns and related materials as defined in applicable laws, rules, regulations or guidelines.
- Pathological Waste: Human or animal body parts, organs, tissues and surgical specimens (decanted of formaldehyde, formalin or other preservatives as required per hazardous waste rules).
- Non-RCRA Pharmaceuticals: Must be characterized and certified as non-RCRA hazardous material by the generator. Excludes all DEA scheduled drugs, including controlled substances.*
- **California Only** - Solidified Suction Canisters: Suction canisters that have been injected with solidifier materials to control liquids or suction canisters made of high heat resistant plastics such as polysulfone.

OTHER REGULATED MEDICAL WASTES NOT ACCEPTED AS REGULATED MEDICAL WASTE BY STERICYCLE

- Untreated Category A Infectious Substances
- Complete Human Remains (including heads, full torsos and fetuses)
- Bulk Chemotherapy Waste
- Mercury-Containing Dental Waste: Non-contact and contact amalgam and products, chairside traps, amalgam sludge or vacuum pump filters, extracted teeth with mercury fillings and empty amalgam capsules
- Mercury Containing Material or Devices: Any mercury thermometers, sphygmomanometers, lab or medical devices
- RCRA Hazardous Pharmaceutical Waste and all DEA Federal and state controlled substances*
- Chemicals: Formaldehyde, formalin, acids, alcohol, waste oil, solvents, reagents, fixer developer, fluorescein
- Compressed Gas Cylinders, Canisters, Inhalers and Aerosol Cans
- Hazardous or Universal Waste: Any other waste determined by Federal or State EPA regulations including but not limited to batteries, bulbs, heavy metals, etc.
- Radioactive Waste: Any container with a radioactivity level that exceeds regulatory or permitted limits; lead-containing materials

**Consult Stericycle Representative for specific requirements*

Additional waste acceptance policies may apply based on state or permit specific requirements. Hazardous waste transportation services may be offered in certain geographical locations, under separate contract. Please refer to your local Stericycle Representative for additional information and options for possible hazardous waste handling. For additional information on container and labeling requirements contact our Stericycle Customer Service Department at customer@stericycle.com.

APPENDIX B

STERICYCLE JOB DESCRIPTIONS

JOB DESCRIPTION

Date:	September 2025	Job Class Code:	DRIVLH
Department:	Transportation	Position Title:	Driver Long Haul
Version:	Revised - FINAL	Work Location:	Various
Reports To:	Transportation Supervisor Transportation Manager	Grade/Band:	
		FLSA Status:	Non-Exempt

Position Purpose: Briefly summarize the purpose of this position in one or two sentences.

Responsible for transporting waste from either a Stericycle location or customer location, to a transfer location or processing location.

Key Job Activities: List the ongoing day—to—day essential job responsibilities in priority order (it is not necessary to list every activity—you may just list the most important 7 — 10. Indicate the estimated percentage of time spent on each of these activities.

Activities

**Duties and responsibilities may vary based on location, design of facility,
customer base and staffing process.**

**% Of Time
Spent**

- | | |
|--|-----|
| <p>1 Manages assigned routes ensuring that medical waste is transported in a timely and accurate manner.</p> <ul style="list-style-type: none"> - Responsible for picking up and transporting waste safely according to all federal, state, and local rules and regulations. - Plans daily schedule based on Stericycle or customer needs by reviewing daily paperwork, e.g., manifest, route sheets, previous VCR, etc. provided by Transportation Manager/Supervisor or Dispatcher. - Communicates any issues to Transportation Manager/Supervisor and/or Dispatcher for resolution. - Ensures load is secured prior to operating vehicle on public highway. | 70% |
| <p>2 Ensures that assigned paperwork is completed legibly, neatly, accurately, and completely and returned to Transportation Manager/Supervisor or Dispatcher, at the time of debriefing, for processing.</p> | 10% |

This copy of the position description is a formal company document. It is for internal use only.

JOB DESCRIPTION

- 3 Communicates with Stericycle Transportation Manager/Supervisor and/or Dispatcher regarding any change to pickups. Ensures that Route Manager servicing the specific route is aware of any situations outside the norm in order to provide the highest level of customer service. Reports any problems/ issues with accounts to the Transportation Manager/Supervisor and/or Dispatcher before the close of business each day. 10%
- 4 Performs a documented pre—trip inspection on vehicles prior to leaving yard to commence route. Performs a documented post—trip inspection on vehicles prior to being debriefed for the day. Reports any maintenance problems to Transportation Manager/Supervisor and/or Dispatcher for follow—up. 10%
- Ensures all defects have been corrected prior to operating the vehicles again.

Scope of Work: Briefly describe the level/type of contacts that will interact with the position; impact of the position on the business, level/type of authority, independence, complexity, analysis, judgement and decisions; and number of people reporting to this position and their titles

Contacts
(Internal/External): Regular contact with Stericycle plant and transportation employees in the transportation of waste.
Occasional contact with various levels of personnel at assigned customer sites in the picking up of waste.
Occasional contact with external inspectors and maintenance repair personnel.

Financial Responsibility:* Manage route to minimize productivity costs and vehicle maintenance costs.

Direct Reports:
Indirect Reports:
Other:

*Financial Responsibility i.e., revenue, assets, budgets, number of accounts, expenditures, etc.

Education and Experience Required (including certifications and/or software requirements for the position):
Education equivalent to graduation from high school, or the equivalent LED.
Completion of an accredited driving school, or previous Commercial Driving experience required.
Previous route management experience a plus.

JOB DESCRIPTION

Maintains current Commercial Driver's License (CDL), with an excellent driving record. Demonstrates ability to read a map.

Demonstrates general computer skills and knowledge of internet.

Must be able to obtain a Medical Examiner's Certificate from a doctor approved by Stericycle. May require mandatory immunizations and credentialing based on customer requirements.

Must work safely and carefully to prevent injury to self and others while driving, loading, and unloading vehicle. Requires constant mental and visual attention relative to the safe operation of the vehicle.

Key Competencies (Non—technical Behavioral Skills, i.e. presentation, negotiation, customer service skills), you may just list the most important 7-10, in priority order:

Demonstrates the following skills:

- Customer Focus
- Priority Setting
- Ethics and Values
- Organizing
- Interpersonal Savvy
- Integrity and Trust
- Process Management Skills
- Dealing with Ambiguity

Other (i.e. physical requirements, travel, etc. that is not covered above: Position requires the following physical activity:

Climbing — ascending or descending ladders, stairs, ramps and the like using feet and legs and/or hands and arms. Body agility is emphasized;

Balancing — maintaining body equilibrium to prevent falling and walking, standing or crouching on narrow, or slippery surfaces.;

Stooping — bending body downward and forward by bending spine at the waist;

Kneeling — bending legs at knee to come to a rest on knee or knees;

Crouching — bending the body downward and forward by bending leg and spine;

Reaching — extending hand (s) and arm (s) in any direction;

Standing — for sustained periods of time;

Walking — moving about on foot to accomplish tasks;

Pushing — using upper extremities to press against something with steady force in order to thrust forward, downward or outward;

Pulling — using upper extremities to exert force in order to draw, haul or tug objects in a sustained motion;

JOB DESCRIPTION

Lifting — raising objects from a lower to a higher position or moving objects horizontally from position—to—position;
Fingering — typing with the fingers, separating pages of documents, etc.;
Grasping — applying pressure to an object with the fingers and palm;
Talking — expressing or exchanging ideas by means of the spoken word;
Hearing — perceiving the nature of sounds at normal speaking levels with or without correction;
Repetitive motion — substantial movements (motions) of the wrists, hands and/or fingers;
Sitting — for extended periods of time.

Position requires physical requirements of exerting up to 1 00 pounds of force occasionally and/or up to 50 pounds of force frequently and/or up to 20 pounds of force constantly to lift, push, or pull objects.

Position requires incumbent to have visual acuity (include colors, depth, perception and field vision) to operate a motor vehicle.

The conditions the worker will be subject to in this position:

The worker is subject to both environmental conditions. Activities occur inside and outside.

The worker is subject to hazards. Includes a variety of physical conditions such as proximity to moving vehicles, electrical current, and exposure to chemicals.

Potential exposure to infectious materials is a risk. Use of company—provided personal protective equipment is required.

Position does require traveling on an assigned route daily.

** Completed training within 90 days of Date of Hire.

Note(s):

1 - Forklift Training must be completed within 30 Days of Date of Hire for required personnel and prior to driving. Refresher Training will be conducted triennially.

2 – Lockout/Tagout – Authorized is required within 10 days of Date of Hire for required personnel.

3 – Permit Required Confined Space – Authorized is required 10 Days of Date of Hire for required personnel.

4 – Where applicable.

APPENDIX D

EMERGENCY RESPONSE AND CONTINGENCY PLAN

**Colorado Springs, CO
MEDICAL WASTE
EMERGENCY RESPONSE CONTINGENCY PLAN**

EMERGENCY PROCEDURES:

A. *Fire or Explosion:*

1. Call City of Colorado Springs Emergency Dispatch - **911**
2. Notify any persons to evacuate the area.
3. Non-fire-fighting employees gather at the Rally Point and get a head count.
4. Employees trained in first aid will provide first aid to any injured person.
5. All employees trained in fire safety procedures are authorized to fight fires with appropriate fire fighting equipment.
6. Notify Emergency Coordinator(s) immediately. (see page 3).

Fire Extinguishers

The primary lessor provides properly maintained fire extinguishers of appropriate class/type for use by trained personnel during emergencies. As described in Appendix B of the facility EDOP, Stericycle personnel are trained in fire extinguisher use.

B. *Tornado, Earthquake or Natural Disaster:*

1. Find cover or a safe place to avoid falling or flying objects, and remain there until the situation has subsided.
2. Provide first aid to any injured persons.
3. Notify Emergency Coordinator(s) immediately (see page 3).

C. *Personal Injury:*

1. Determine the nature and extent of the injury.
2. Call emergency medical technicians if necessary: **911**
3. Administer first aid as necessary or, if not trained, notify first aid trained co-worker.
4. Notify supervisor or Emergency Coordinator(s) immediately (see page 3).

D. *Major Medical Waste Spill (not including in-facility spills):*

1. Determine, and write down, the location and severity of incident.
2. If there are any injuries refer to *Personal Injury* section.
3. Notify Emergency Coordinator(s) immediately (see page 2).
4. The Emergency Coordinator should notify the Colorado Dept of Public Health and Environment (CDPHE) Emergency Preparedness and Response Division (**877**) **518-5608** and provide necessary information.
5. If the spill is manageable, in the opinion of the Emergency Coordinator, respond with a truck to the spill with the following spill supplies.
 - Absorbent materials (flat pads, socks, kitty litter or granular absorber, solidifier)
 - 1:10 parts bleach solution or Virkon S 1% solution
 - Red bags
 - Spray bottle
 - Water
 - Paper mask
 - Tyvek coveralls
 - Gloves (Chemical and nitrile)
 - Rubber overboots
 - Barricade tape
 - Safety glasses and face shield
 - Tongs
 - Hand broom and dust pan
 - Empty regulated medical waste containers
 - Blank manifest

Colorado Springs, CO
MEDICAL WASTE
EMERGENCY RESPONSE CONTINGENCY PLAN

6. Spills determined to be unmanageable should be reported to CHEMTREC and Emergency Response and Training Solutions (ERTS) to clean up the spill.

Contact Information:

CHEMTREC - (800) 424-9300

ERTS - (800) 210-6804

E. *Natural & Man-Made Disasters*

Stericycle maintains the necessary supplies on-site to service our customers in the event of a natural or man-made disaster. Extra equipment, containers and supplies are stored on-site for use in the event of an emergency. In addition, Stericycle is a nation-wide company capable of calling in equipment and personnel from across the nation to provide assistance as needed. Our ability to respond in such a manner makes it unlikely that Stericycle customers would suffer lengthy interruption of service due to natural or man-made disasters.

Colorado Springs, CO
MEDICAL WASTE
EMERGENCY RESPONSE CONTINGENCY PLAN

One of the following Emergency Coordinators will always be available:

Jason Cloward, Facility Manager: Phone: 801-330-8574

Shane Tuttle, Plant Manager: Phone: 224-285-9282

Marc Masyliw, EHS Manager: Phone: 262-237-4118

Brandi Lorenzo, District Operations Manager: Phone: 630-546-2589

Emergency Coordinator:

The acting Emergency Coordinator has full authority to decide to implement this plan if he/she believes an emergency at the facility might threaten human health or the environment.

The following potential emergencies might reasonably be expected at this facility and thus call for the implementation of this Emergency Response Plan:

- Fires and explosions;
- Hazardous releases (chemical or biological); or
- Natural disasters.

Emergency Coordinator Duties:

During an emergency, the Emergency Coordinator will do the following:

1. Assess the situation to determine whether an emergency exists requiring activation of emergency procedures;
2. Supervise all efforts, including evacuating employees;
3. Call outside emergency services;
4. Take all necessary measures to contain the hazard and prevent its spread to other nearby areas, with the assistance of emergency personnel;
5. Direct the shutdown of facility operations when required;
6. If the emergency is a biological agent, turn off the ventilation system in the building;
7. If the emergency is a hazardous material spill, ensure that the hazardous material and any material with which it came into contact (gravel, soil, etc.), will be scraped up using shovels and/or brooms;
8. Provide for management of the waste and contaminated material by the emergency crew or outside contractor, as appropriate;
9. Ensure that contaminated soil, liquids, or other material is placed in drums and handled as a hazardous waste;
10. Ensure that the emergency crew restores all emergency equipment to full operational status;
11. Assisted by other qualified persons, begin to investigate the cause of the emergency and take steps to prevent a recurrence of such or similar incidents;
12. Ensure that the cause of the emergency has been investigated and eliminated and that cleanup and restoration have progressed at least to the point of not jeopardizing the health and safety of the employees, and that EPA, state, and local authorities have been notified, if required; and
13. Ensure that for spills or releases involving a hazardous substance at or above its reportable quantity, the following necessary information is recorded and reported: name of chemical(s) involved, whether the substance is listed under 40 CFR 302—extremely hazardous substances, estimated quantity of the released substance, time of the release and duration, medium into which the substance was released, health risks associated with the release, precautions taken to respond to the release, name and telephone numbers of persons who can be contacted for further.

Colorado Springs, CO

MEDICAL WASTE

EMERGENCY RESPONSE CONTINGENCY PLAN

IN THE EVENT OF A PERSONAL INJURY:

Medical arrangements can be accommodated by the Emergency Coordinator at the following facilities:

For non-urgent weekday care

Concentra

5320 Mark Dabling Blvd

Bldg 7, Ste 100

Colorado Springs, CO 80918

(719) 592-1584

For urgent night and weekend care (24 hrs).

Penrose Hospital

2222 N. Nevada Ave.

Colorado Springs, CO

(719) 776-5000

IN THE EVENT OF MAJOR FIRE, NATURAL DISASTER, FATALITY OR MAJOR SPILL:

Emergency Coordinator will notify the following individuals immediately:

Shane Tuttle, Plant Manager: Phone: 224-285-9282

Marc Wasyliw, EHS Manager: Phone: 262-237-4118

IN THE EVENT OF A DISCHARGE OF UNTREATED PROCESS WASTE WATER INTO THE SANITARY SEWER:

Emergency Coordinator will notify the following individuals immediately:

Shane Tuttle, Plant Manager: Phone: 224-285-9282

Marc Wasyliw, EHS Manager: Phone: 262-237-4118

The Emergency Coordinator will, if appropriate, notify the CDPHE Emergency Preparedness and Response Division (EPRD) **(877) 518-5608** and provide necessary information.

CONTINGENCY PLAN:

Facility Shutdown / Alternate Waste Management Plan:

In the event that the Stericycle Colorado Springs facility is unable to store or transfer waste which has been accepted due to an unforeseen circumstance necessitating the suspension of operations, waste will be sent to another approved facility for storage, transfer, treatment and/or disposal.

Should the facility be anticipated to be shut down for a significant period, arrangements shall be made to divert incoming waste to an alternate facility approved to manage the wastes.

APPENDIX E

EXAMPLE INSPECTION CHECKLIST

Document Profile

Title Monitored Cleaning Checklist - HCS

Control No. OSHP-01.20.001

Location North America

Document Date

Program Element OHSM-01.20.000

Content Owner Stericycle Safety Team

Document Type Procedure

Responsibilities District Manager, Affected Team Members

Review Frequency Annual

Replaces N/A

Purpose

Checklists are to be completed by a designated team member at the end of each shift to ensure facilities are clean.

Directions

1. If the item is in clean condition, check the box that reads "Complete".
2. If any box is checked "Incomplete", document corrective actions where cleaning and organizing is still required.

Team Member	Date & Time Completed		
Work Station	Location Colorado Springs, CO Facility		
Site-Specific Housekeeping Items	Completed	Incomplete	N/A
All truck and trailer doors shut and locked when not actively loading			
Check trucks and trailers for leaks, odors, disease vectors			
Refrigerated units are operational, in use when required			
Check for and remove any trash and debris			
Visual inspection of trucks and trailers for any damage, proper markings, and required paperwork			
Check for fully stocked spill kits on each truck.			
Comments:			

Post Inspection Analysis:

Complete/Clean & Organized _____

Incomplete/

Corrective Actions Required _____

Corrective Actions: _____

I, _____ certify that the housekeeping items above have been completed and facility work stations are clean and organized.

Monthly Inspection
Colorado Springs Facility

<u>OK</u>	<u>Fix</u>	<u>Inspection Instructions (what to inspect & acceptable criteria)</u>
		Security Equipment/Systems, warning signs (at entrances), and security fence: Visually inspect for presence, proper function, and integrity
		Communication Equipment: Visually inspect for presence and operation of facility telephone, indicating capability of summoning emergency assistance from local police departments, fire departments, or state or local emergency response teams
		Fire extinguishers / fire sprinkler system: Visually inspect for presence, proper equipment (i.e., ABC fire extinguishers) and current inspection of fire extinguishers
		Safety & Emergency Equipment List Inventory: Visually inspect for presence within the facility for minimum inventory

Equipment	Location	Description	Quantity (min)
Spill Response Kits	WM Warehouse	Clean up small spills	1
Gloves	WM Warehouse	Protection from exposure	10
Uniforms	WM Warehouse	Protection from exposure	5
Eye Protection	WM Warehouse	Protection from exposure	10
First Aid Kits	WM Warehouse	On-site first aid; minor injuries	2
Eye Wash Stations	WM Warehouse	Emergency Wash, Decontamination	1

Applicable additional notation for items marked "Fix" above.
