## OWNER, APPLICANT, AND ENGINEER DECLARATION

To the best of my knowledge, the information on this application and all additional or supplemental documentation is true, factual and complete. I am fully aware that any misrepresentation of any information on this application may be grounds for denial. I have familiarized myself with the rules, regulations and procedures with respect to preparing and filing this application. I also understand that an incorrect submittal will be cause to have the project removed from the agenda of the Planning Commission, Board of County Commissioners and/or Board of Adjustment or delay review until corrections are made, and that any approval of this application is based on the representations made in the application and may be revoked on any breach of representation or condition(s) of approval.

**DEVIATION REQUEST** (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in Section **ECM section 3.3.3 Open Channel Design Standards** of the Engineering Criteria Manual (ECM) is requested for the Sand Creek Channel Design – Channel Perimeter Fencing.

Identify the specific ECM standard which a deviation is requested:

Per ECM Section 3.3.3, Item K.4. Fencing is required for all channels abutting residential development schools, parks and pedestrian walkway based on the following criteria;

- All constructed channels steeper than 4:1 where design frequency storm has a velocity that exceed 5 feet per second and 2 feet in depth or a combination thereof, for a factor of ten
- When the above condition is met, Fencing shall be chain link, a minimum of 6 feet in height with a top rail and vinyl coated for natural color compatibility (green or brown)

State the reason for the requested deviation:

Sterling Ranch is requesting to use a more aesthetically pleasing split rail fence design as shown in exhibit A

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

The vast majority of the channel side slopes or 4:1 or flatter, however in some isolated areas a 3:1 slope is necessary and those areas will require fencing. When that condition exists Sterling Ranch proposes to use split rail fencing similar to the detail shown in Exhibit A.

**LIMITS OF CONSIDERATION**

(At least one of the conditions listed below must be met for this deviation request to be considered.)

- The ECM standard is inapplicable to the particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

Sterling Ranch is master planned development with open space areas and parks which have utilized the more aesthetically pleasing split rail fencing. The Sand Creek corridor acts as a regional open space corridor, the access road on western side of the channel will also function as a regional trail and the majority of the east side abuts a community park and open space tracts. To install chain link fencing would be visually obtrusive.

**CRITERIA FOR APPROVAL**

Per ECM section 5.8.7 the request for a deviation may be considered if the request is **not based exclusively on financial considerations**. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with **all of the following criteria**:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

This request is not based on financial considerations. The primary reason for the use of split rail fencing is to be consistent with other fencing choices within the master planned community.

The deviation will not adversely affect safety or operations.

The deviation will not adversely affect safety or operations. The west side access road is also planned as a regional trail and it is also anticipated that pedestrians may utilize the east side access road in a similar manner. Neither the east side or west side trails is designed to be fully ADA accessible due to longitudinal slope maximums nearing 12 percent in areas.

The deviation will not adversely affect maintenance and its associated cost.

Maintenance requirements should be minimal.

The deviation will not adversely affect aesthetic appearance.

The deviation actually improves aesthetic appearance.

The deviation meets the design intent and purpose of the ECM standards.

Yes, the deviation meets the design intent and purpose of the ECM standards and is a balance of the various ECM and other agency standards for natural channel planning and design.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

Yes, the deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit. As a streambed restoration project, it is exempted from MS4 water quality standards.

**REVIEW AND RECOMMENDATION:**

**Approved by the ECM Administrator**

This request has been determined to have met the criteria for approval. A deviation from Section 3.3.3, Item K.4. of the ECM is hereby granted based on the justification provided.

<b>Approved</b>	
By: <b>Gilbert LaForce, P.E.</b> Engineering Manager	
Date: <b>11/08/2023 9:16:14 AM</b> El Paso County Department of Public Works	

**Denied by the ECM Administrator**

This request has been determined not to have met criteria for approval. A deviation from Section \_\_\_\_\_ of the ECM is hereby denied.

**ECM ADMINISTRATOR COMMENTS/CONDITIONS:**

## **1.1. PURPOSE**

The purpose of this resource is to provide a form for documenting the findings and decision by the ECM Administrator concerning a deviation request. The form is used to document the review and decision concerning a requested deviation. The request and decision concerning each deviation from a specific section of the ECM shall be recorded on a separate form.

## **1.2. BACKGROUND**

A deviation is a critical aspect of the review process and needs to be documented to ensure that the deviations granted are applied to a specific development application in conformance with the criteria for approval and that the action is documented as such requests can point to potential needed revisions to the ECM.

## **1.3. APPLICABLE STATUTES AND REGULATIONS**

Section 5.8 of the ECM establishes a mechanism whereby an engineering design standard can be modified when if strictly adhered to, would cause unnecessary hardship or unsafe design because of topographical or other conditions particular to the site, and that a departure may be made without destroying the intent of such provision.

## **1.4. APPLICABILITY**

All provisions of the ECM are subject to deviation by the ECM Administrator provided that one of the following conditions is met:

- The ECM standard is inapplicable to a particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship on the applicant, and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

## **1.5. TECHNICAL GUIDANCE**

The review shall ensure all criteria for approval are adequately considered and that justification for the deviation is properly documented.

## **1.6. LIMITS OF APPROVAL**

Whether a request for deviation is approved as proposed or with conditions, the approval is for project-specific use and shall not constitute a precedent or general deviation from these Standards.

## **1.7. REVIEW FEES**

A Deviation Review Fee shall be paid in full at the time of submission of a request for deviation. The fee for Deviation Review shall be as determined by resolution of the BoCC.
