Hello, attached are the Non-JD Water Impoundment Structure forms for Ponds A, B, and C within the Flying Horse North Filing No. 4 development. Accompanying the forms are the Construction Drawings for the detention ponds with the spillway details and basin grading plans. As these are non-jurisdictional, County criteria has been followed for the freeboard vertical height of 1.0' minimum from the un-detained water surface elevation within the spillway to the top of pond berm. The reported freeboards on the forms are from the spillway crest to the top of pond berm per the detail.

Thank you,

Richie Lyon, PE
