Re: Professional Engineer's Certification of Public Storm Improvements
Flying Horse North Filing No. 3

This letter serves as a Professional Engineer of Record Certification for public storm infrastructure improvements for Flying Horse North Filing No. 3. The filing consists of public RCP culvert pipes, rip-rap energy dissipation pads at pipe inlet and outlet points, curb inlets, and RCP storm main.

Based upon site visits during construction and two final inspection site visits of the storm improvements, HR Green Development, LLC. is of the opinion that the public storm infrastructure has been constructed in general compliance with the approved design plans and specifications, including any redlined as-built plans, prepared by HR Green Development, LLC., as filed with El Paso County.

The site and adjacent properties (as affected by work performed under the County permit) are stable with respect to settlement and subsidence, sloughing of cut and fill slopes, revegetation or other ground cover, and that the improvements (public improvements, common development improvements, site grading and paving) meet or exceed the minimum design requirements.

It is formally requested with this certification letter that the two-year warranty period begin.

Engineer of Record Statement:
To the best of my knowledge, information and belief, the referenced public storm improvements have been constructed in general compliance with the approved design plans and specifications as filed with El Paso County.

Sincerely,

Richard D Lyon

Richard Lyon, PE (CO PE License No. 53921)
