## **Ellicott Sand and Gravel Site Development Plan, Phase 1, PPR-23-4**

Please accept the following comments from El Paso County Public Health regarding the sand mining project referenced above:

- **Water and wastewater services were not specified or proposed as part of the expansion request. The use of portable toilets was included in the Letter of Intent and are an acceptable option for wastewater generated on the site due to the necessity to relocate the portables as the mining footprint expands. The portables must be maintained by a licensed company and properly anchored to help prevent accidental spills during high winds.**
- **Earthmoving activities greater than 25 acres require a Construction Activity Permit from the Colorado Department of Public Health and Environment, Air Pollution Control Division. Go to: <https://www.colorado.gov/pacific/cdphe/general-air-permits>**
- **Water quality basins, if any, must have mosquito control responsibilities included as a part of the construction design and maintenance plan to help control mosquito breeding habitat and minimize the potential for West Nile Virus**
