**SUBJECT: Rollin Ridge Filing No. 1 Subdivision
Certification Letter**

Ladies and Gentlemen:

Based upon information gathered from periodic site visits to the project, JPS Engineering, Inc. is of the opinion that the subdivision improvements have been constructed in general compliance with the approved design plans as filed with El Paso County.

The site and adjacent properties (as affected by work performed under the County permit) appear to be stable with respect to settlement and subsidence, sloughing of cut and fill slopes, revegetation or other ground cover, and the improvements (public improvements, common development improvements, site grading and paving) meet or exceed the minimum design requirements.

Drainage improvements for this project include two on-site private Detention Basins. The facilities provide the required storage volume and will meet the required release rates, as documented by the attached MHFD design forms. The As-Built drawings accurately depict the installation of the Detention Basin improvements and verify the detention volume provided.

Sincerely,
JPS Engineering, Inc.
