Public and Private Commercial Water Providers.
(i) Information from Commercial Water Providers. It is the responsibility of the applicant to provide information regarding the availability of water supplies from any source, including public and private commercial water providers. Should the subdivision fall within a water provider's service district, a general water resources report supplied by the provider may be used to evaluate available water resources provided the content meets or exceeds the requirement of the Water Resource Report.

Report revised to address this.

(ii) Water Providers Report.
In those cases where the water provider submits a general Water Resources Report, the water resource report shall be updated annually, by February of each year. Update information shall include:

- Volume of water sold in the previous year;
- New water acquisitions, commitments, augmentation plans, etc.;
- Water trades or other losses of water supplies;
- Anticipated water acquisitions for the upcoming year;
- Legal documentation accompanying new water acquisitions and augmentation plans;
- Major capital improvements accomplished during the past year and anticipated major capital improvements for the upcoming year; and
- Other information which would be useful in evaluating the availability of water supplies.

this should not be in the water report; water and wastewater are separate

Wastewater disposal information removed from report.
