

MEMORANDUM

DATE: September 19, 2019

TO: Kari Parsons, PCD-Project Manager

FROM: Rich Schindler, Core Engineering Group

SUBJECT: SF-19-013 – Creekside at Lorson Ranch
Second Submittal – response to comments

Final Plat

1. See final plat redlines. **Partially resolved; see updated redlines.** *Response: plat updated*

Transportation / Traffic Impact Study (TIS) *Response: plat updated*

1. Note: the TIS indicates that warrants will likely be met for the signal at Marksheffel Road and Lorson Blvd. upon buildout of this subdivision. With the escrow amount proposed in the traffic memo the costs of the intersection improvements should be mostly covered.
 - a. A decision regarding the County's preferred intersection option is pending and will be provided upon receipt of future warrant study(s).
 - b. A recommended condition of approval will be provided identifying warrant study, design and construction requirements for the required intersection improvements.
 - c. It appears that this signal (or roundabout) will not be reimbursable under the requirements of the Road Fee program (#3 on page 19 of the implementation document).

Final Drainage Report (FDR)

1. Provide a channel design report or add the necessary information to the FDR.
Resolved; see comments below. Provide the approved final channel design report in Appendix F. *Response: we will update the FDR when the channel report is available. This may have to be after the report is signed.*
2. **Resolved.**
3. Submit a copy of the LOMR to PCD (electronic model only will be adequate) when available. *Response: LOMR should be approved in the next week. This will be forwarded to PCD.*
4. **Resolved.**
5. Note: An O&M manual for the permanent stormwater measures in the drainageways will need to be provided; the template for this document will be provided to you when available. **(TBD)** *Response: noted*
6. **Adjust the channel construction costs (page 20) to match revisions to the Kiowa channel costs (currently \$1.9 million vs. \$800,000).** *Response: cost updated.*
7. **Adjust the proposed drainage plans as appropriate for revisions to the channel plans.** *Response: we will update the FDR maps when the channel design is approved. This may have to be after the report is signed.*

Construction Plans / Geotechnical Issues / Grading and Erosion Control Plan / SWMP

1. **through 4 – Resolved.**
5. Ensure that all GEC Plan checklist items (~~attached~~) are provided for both the onsite and channel plans. GEC checklist will be reviewed in detail with the next submittal. **Partially resolved; see redlined checklists.** *Response: checklist updated.*
6. **Provide details in these CDs or the channel CDs showing the detention outfall pipes and how the outfalls integrate with the proposed channel improvements.**
Response: Kiowa will integrate outfalls into the creek cd's.

Channel Construction Plans and Design Report (also in CDR-19-002)

1. **Please provide an electronic print/conversion of the plans to pdf for review (not printed to paper then scanned). A lot of information is not visible (existing contours) or barely shown (utilities?).**
2. **See redlined plans and design report.**
3. **County criteria generally require low-flow channels to be designed for the 10-year event (reference DCM 10.5.4); provide calculations/modeling and discussion addressing this. See redlines regarding channel velocities, degradation and stabilization, and whether or not additional grade control should be provided.**
4. **The channel profile grade labels appear to be spot labels of existing grades. Clarify with additional labels or clearly label the average overall grades between stations based on the design.**
5. **It appears that at least one additional grade control (drop or check) structure is required between the two proposed structures to minimize potential channel degradation. Consider placing a drop or check structure at the location of a drop structure shown in the DBPS corresponding to Station 30+00 on the plans. Reference UDFCD Chapter 9, Section 2.9. Please discuss with Staff.**
6. **Provide an electronic copy of the HEC-RAS model when available.**
7. **An updated ESQCP form is required as part of ECM updates; provide with the next submittal. The form can be found at**
<https://planningdevelopment.elpasoco.com/wp-content/uploads/Engineering/EngineeringDocuments/Erosion-and-Stormwater-Quality-Control-Permitrev.2019.docx>.
8. **Provide the new PBMP Applicability Form, which can be found at:**
<https://planningdevelopment.elpasoco.com/wp-content/uploads/Engineering/EngineeringDocuments/PBMP-Applicability-Form.docx>.
9. **As noted at the beginning of these comments, updated checklists are required, which are to be provided by the design engineer. Provide with the next submittal. Instructions are provided below the list of attachments. Checklists can be found at:** <https://planningdevelopment.elpasoco.com/wp-content/uploads/Engineering/EngineeringDocuments/Copy-of-GEC-SWMP-Checklists.xlsx>. **The GEC Plan and SWMP will be reviewed in detail with the checklists.**
10. **Provide the wetland delineation update and mitigation plan when available.**

Forms / SIA / Financial Assurance Estimate (FAE) Form

1. **Note: Updated FAE quantities and costs will be reviewed in detail with the next submittal. Provide quantities on the new FAE form, which can be e-mailed upon**

request, or is available at <https://planningdevelopment.elpasoco.com/wp-content/uploads/Forms/Collateral/2019-Financial-Assurance-Estimate-final.xlsx>.

- a. **Add costs for the Street Name Signs (\$200 EA?).** *Response: cost added*
 - b. **Replace landscaping and underdrain costs.** *Response: cost added for landscaping and underdrain*
 - c. **See redlines.**
2. **(See comment #7, below.)**
3. Add the grass buffer strips to the PDB/BMP maintenance agreement and easement. Note: An updated PDB/BMP maintenance agreement and easement template is being developed and may be required depending on the date of project approval; Staff will provide this to you when/if it is approved for use prior to project approvals. **Resolved; provide a graphic exhibit with Exhibit B showing the locations of the ponds and buffer strips (similar to the exhibit in the license agreement). (New form is not available at this time.)** *Response: exhibit updated/added*
4. Note: The MS4 Post-Construction Documentation Form and SDI worksheets were reviewed with PUDSP-18-005. The forms for Pond C1-R are not necessary for a retrofit.
5. Note: A license agreement will be required for landscaping in the right-of-way. *Response: agreement included*
6. See attached Engineering Final Submittal Checklist for reference.
7. **Channel improvements FAE:** *Response: will be addressed in CDR 19-002*
 - a. **Add the PCD file number (CDR-19-002).**
 - b. **Provide mulching quantities to match seeding.**
 - c. **Note: quantities and costs will be verified with the next submittal.**
8. **Remove the "X" from Part IV.1.B (Pollutant Removal/80% Total Suspended Solids Removal (TSS)) on the PBMP Applicability Form. (This is a different category than a FSD EDB with WQCV.)** *Response: form updated*
