Eron,

After searching the FCC database for assignments, I only found three – 1965-1970 MHz, 2170-2180 MHz, and the 3700-3860 MHz. May I get a copy of the other assignments. I keep these on file so if we encounter any interference, I have a phone contact.

Thanks for your assistance,
Fran

Eron,

This is the information that we need for now. However, when we get the answers to these questions, it may cause us to ask additional questions.

Have a good day,
Ms. Roberts

Good morning Roberts,

I am still pending the information you requested from Verizon.

I am providing the information you requested below just to make sure we are on the same page:

- Why is the power increasing so much? (The 746-757 MHZ is to increase from 80W to 120W. The 2115-2130 MHz is doubling.)
- Which way is the A4 panel going to be pointing?
- Need to provide a coverage plot of the existing system, and one of the proposed system to see how they will differ because of the increased power.

Upon receiving this email, please confirm that this is the only information you are pending to get this project moving forward.

Best of all,

Eron Haxhimehmeti

Eron,

Just checking in to see if you are making progress with the spectrum plots. These are highly pivotal as to whether we can concur or non-concur with your upgrade plans. We also need to know if the panels are directional and what direction you plan on pointing them.

v/r

Fran

Can we get spectrum plots from their transmitters, and if these will be directional with what directions they intend to radiate?

Some people who received this message don't often get email from ehaxhimehmeti@fullerton-us.com. [Learn why this is important](#)

Good morning,

I have just received the information requested below and I want to update you with some answers:

- 1) Will you be using the same frequencies on the new panels that you are currently using on the old panels? – **Yes, plus some new frequencies, all licensed by the FCC:**
 - **746-757 MHz**
 - 880-890 MHz**
 - 2115-2130 MHz**
 - 2170-2180 MHz**
 - 1965-1970 MHz**
 - 3550-3860 MHz**
- 2) Will the power levels change any from the old to the new? – **Yes, the power levels will change from the old to new ones.**
- 3) Will all of the panels be using the same frequencies? – **No. (Please see question 1)**

Please let me know if you have any other questions from my end to get this project moving forward.

Thank you for your patience and hope to hear from you soon.

Best of all,

Eron,

Sorry for the delayed response. I am dealing with computer issues in trying to respond.

I have the following questions:

- 1) Will you be using the same frequencies on the new panels that you are currently using on the old panels?
- 2) Will the power levels change any from the old to the new?
- 3) Will all of the panels be using the same frequencies?

I appreciate your assistance with this project,

Fran

Some people who received this message don't often get email from ehaxhimehmeti@fullertonengineering.com. [Learn why this is important](#)

Good morning Darren and Frances,

I have been advised to reach out to you from Joe, regarding the Verizon project located at 1100 S. Enoch Road.

I remember speaking over the phone with one of you I think and during the phone call we agreed that you would email me regarding the topic you had but I haven't received anything yet.

Would you please let me know what you need in order to get this project approved?

Thank you in advance and hope to hear from you soon.

Best of all,

Eron Haxhimehmeti
Zoning & Permitting Specialist

Good morning Eron,

Your project review completion deadline is today January 9th, however Schriever Space Force Base reached out to me requesting a small extension to their project review timeline. They also requested you contact them as soon as possible - darren.horstmeier@spaceforce.mil & frances.roberts@spaceforce.mil

Thank you!

Joe Letke

For zoning review, this will be the only fee. I cannot speak for any building permit fees that are administered by the Pikes Peak Regional Building Department.

Thank you,

Good morning,

I am writing to initiate a Commercial Over the Counter project. This is a Verizon equipment upgrade project on an existing telecommunication tower located at:

- **Site Address: 1100 S. Enoch Road, COLORADO SPRINGS, CO 80930**
- **Parcel ID: 4422000002**
- **Lat/Long: 38.81704125 -104.53794495**

Please find attached:

- **Construction Drawings**
- **Structural Analysis**

Please let me know if anything else is needed.

Kind regards,

Eron Haxhimehmeti
