Re: Letter of Commitment for Service for 10659 Maltese Point, Falcon, Colorado

To Whom It May Concern:

This is a letter of commitment for service for the above parcel. The lands are currently within the service area of Woodmen Hills Metropolitan District and Woodmen Hills Metropolitan District intends to provide sanitary sewer service for the property. Sewer flow is anticipated to be no more than 153 gallons per day. WHMD Regional Water Reclamation Facility has 1.3 MGD rated capacity and is currently at approximately 65% capacity. Owner must pay tap fees according to the size tap required. Owner will also install at their own expense the necessary infrastructure to connect to Woodmen Hills Metropolitan District's sanitary sewer system according to District specifications. This would include, if necessary, a sand/oil separator or grease trap. The District's personnel will inspect any and all connections and service lines to assure District specifications are met.

If you have any questions please call the District office.

Respectfully,

Jerry Jacobson
General Manager
Woodmen Hills Metropolitan District
