RE: MDG Project No. 20.1105.004 – Grandwood Ranch: PCM Certification Letter

Dear Sir or Madam,

Based on visual observation, the site and adjacent properties (as affected by work performed under the County permit) are stable with respect to settlement and subsidence, sloughing of cut and fill slopes, revegetation and other ground cover. The improvements (public improvements, common development improvements, site grading and paving) meet or exceed the minimum design requirements.

This letter certifies substantial compliance for dimensions, elevations and volumes of the Grandwood Ranch Pond 1 and Pond 2 within the west side of the development and Pond 3 and Pond 4 within the east side of the development. This certification letter is to confirm the full spectrum detention basins substantially comply with the approved plan documents and Final Drainage Report (FDR: Approved April 16, 2021).

Pond 5 is a minor embankment/impoundment providing a slight reduction in stormwater discharge from the site. It is not an official full spectrum detention or water quality facility.

This letter also certifies the RPA receiving and treating runoff from Grandwood Drive within Sub-basins E2 and E3 have been built in substantial compliance with the construction plans for the development.

As-built survey of the four ponds by a third-party Professional Land Surveyor and a detention pond site walkthrough indicate that the pond volume, trickle channels, two forebays, emergency spillway and outlet structure, as constructed and surveyed, are in substantial conformance with the construction plans.

Caveats: Because the certifier was not involved with construction administration of the pond, the compaction of earthwork in the pond embankment, placement of buried rip rap in the emergency spillway, and/or any other items not specifically mentioned are not certified in this letter. Submittal reviews during the construction phase of the project indicate that the appropriate material submittals were made, but do not certify that these actual materials were placed or whether appropriate means of storage were utilized prior to installation.

From the Colorado Springs Pond certification checklist (“Yes” indicates substantial compliance):

Grading

Pond 1, 2, 3, & 4 & RPA E2/E3

- Grading and Slopes Completed per approved plans Yes

Soil Mixes

- Proper storage of soil mix prior to placement (*see above*) N/A
- Soil Mix Correct per approved plans (*See above*) N/A

Forebay

- Built per approved plans Yes
- Forebay Volume per approved plans Yes

Outlet Works

- Built per approved plans Yes

Spillway structure

- Built per approved plans Yes

WQCV and Elevations

- WQCV per approved plans Yes
- All elevations per approved plans Yes

As built Plans for Permanent BMP

- Built per approved plans Yes

Per coordination with El Paso County and to reduce the maintenance burden for both the county and local HOA, we have revised the official receiving pervious areas (RPAs) and Unconnected Impervious Areas to leave approximately 1 Acre not officially treated as allowed for in the El Paso County MS4 permit (Section: E.4.a.iv.(A).1)). This section of the MS4 allows for up to 20% of the total site area (not to exceed 1 acre) which is impracticable to detain to be excluded from water quality treatment. Please note that the residential lots within the Grandwood Ranch subdivision are covered by the large lot (2.5-acre or greater) development exclusion and are not included in the areas below. None of these exclusions will increase runoff from the site or alter the design discussed in the approved PDR and FDR. The table below summarizes the excluded areas:

| Excluded Areas | | |
|----------------|--------------|------------------------------------------------|
| Sq. Ft. | Acres | Descriptor |
| 2871 | 0.066 | Furrow Rd at Higby Intersection |
| 3682 | 0.085 | North Side of Higby Road |
| 3919 | 0.090 | South Side of Higby Road |
| 12372 | 0.284 | Sub-basin W1 Cul-de-Sac Sunnyvale Court |
| 12254 | 0.281 | Sub-basin W7 Cul-de-Sac Pasture Trail Court |
| 7899 | 0.181 | Secondary Fire Access road |
| 42997 | 0.987 | Total |

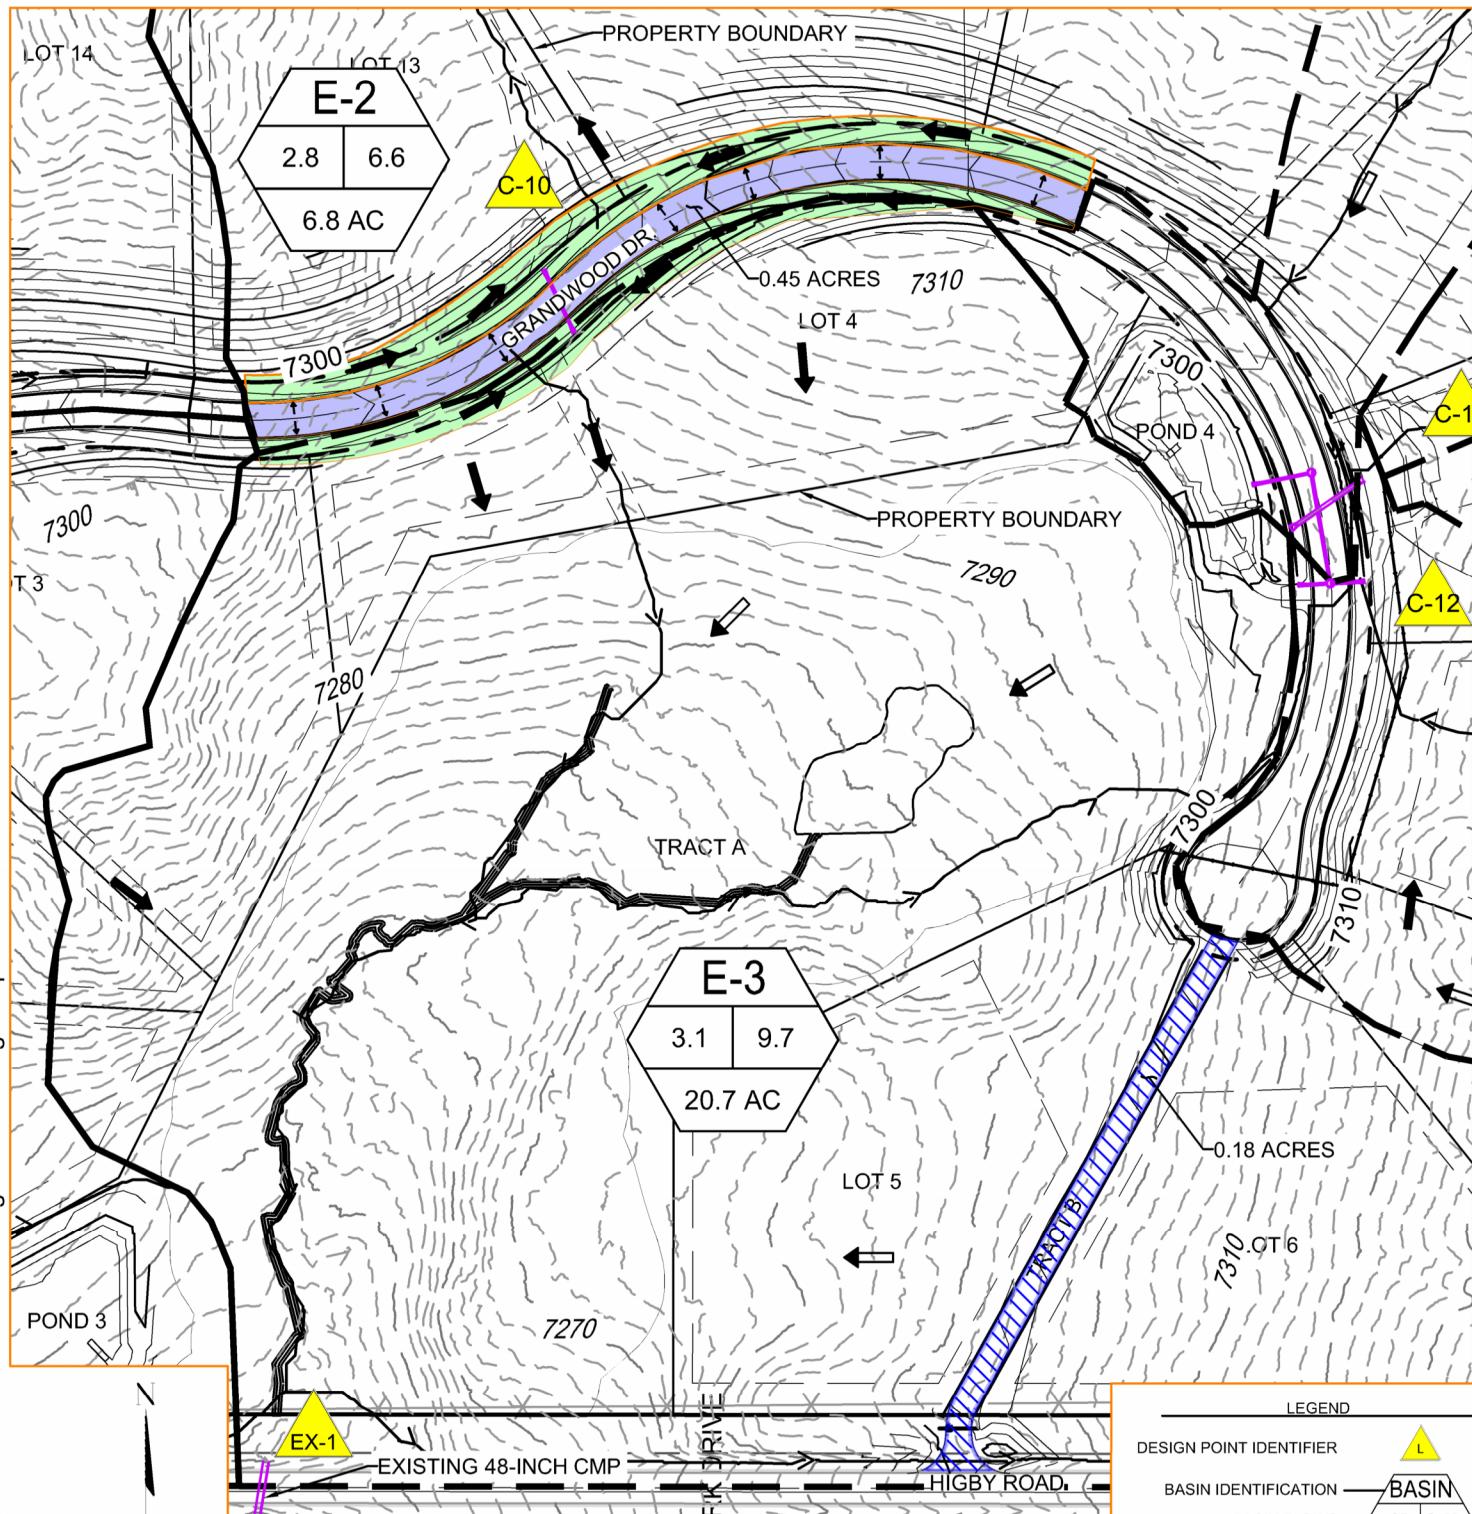

Revised illustrations of the UIA/SPA areas from the original PDR and FDR are attached which demonstrate the above discussion.

If there are any questions regarding this certification, please feel free to contact me by phone: 719-575-0100 or email: corey.petersen@matrixdesigngroup.com.

Thank you,

Corey Petersen, P.E. 56571

| Orifice Area (sq. inches) | | | | | | | |

User Input: Vertical Orifice (Circular or Rectangular)

Invert of Vertical Orifice = **1.79** ft (relative to basin bottom at Stage = 0 ft)
Depth at top of Zone using Vertical Orifice = **2.18** ft (relative to basin bottom at Stage = 0 ft)
Vertical Orifice Diameter = **6.00** inches

Calculated Parameters for Vertical Orifice
Vertical Orifice Area = **0.20** ft²
Vertical Orifice Centroid = **0.25** feet

User Input: Overflow Weir (Dropbox with Flat or Sloped Grate and Outlet Pipe OR Rectangular/Trapezoidal Weir (and No Outlet Pipe))

Overflow Weir Front Edge Height, H_o = **3.21** ft (relative to basin bottom at Stage = 0 ft)
Overflow Weir Front Edge Length = **4.00** feet
Overflow Weir Grate Slope = **0.00** H:V
Horiz. Length of Weir Sides = **4.00** feet
Overflow Grate Open Area % = **70%** %, grate open area/total area
Debris Clogging % = **50%** %

Calculated Parameters for Overflow Weir
Height of Grate Upper Edge, H_t = **3.21** feet
Overflow Weir Slope Length = **4.00** feet
Grate Open Area / 100-yr Orifice Area = **6.34** N/A
Overflow Grate Open Area w/o Debris = **11.20** ft²
Overflow Grate Open Area w/ Debris = **5.60** ft²

User Input: Outlet Pipe w/ Flow Restriction Plate (Circular Orifice, Restrictor Plate, or Rectangular Orifice)

Depth to Invert of Outlet Pipe = **0.22** ft (distance below basin bottom at Stage = 0 ft)
Outlet Pipe Diameter = **18.00** inches
Restrictor Plate Height Above Pipe Invert = **18.00** inches

Calculated Parameters for Outlet Pipe w/ Flow Restriction Plate
Outlet Orifice Area = **1.77** ft²
Outlet Orifice Centroid = **0.75** N/A feet
Half-Central Angle of Restrictor Plate on Pipe = **3.14** radians

User Input: Emergency Spillway (Rectangular or Trapezoidal)

Spillway Invert Stage = **4.02** ft (relative to basin bottom at Stage = 0 ft)
Spillway Crest Length = **30.00** feet
Spillway End Slopes = **4.00** H:V
Freeboard above Max Water Surface = **1.00** feet

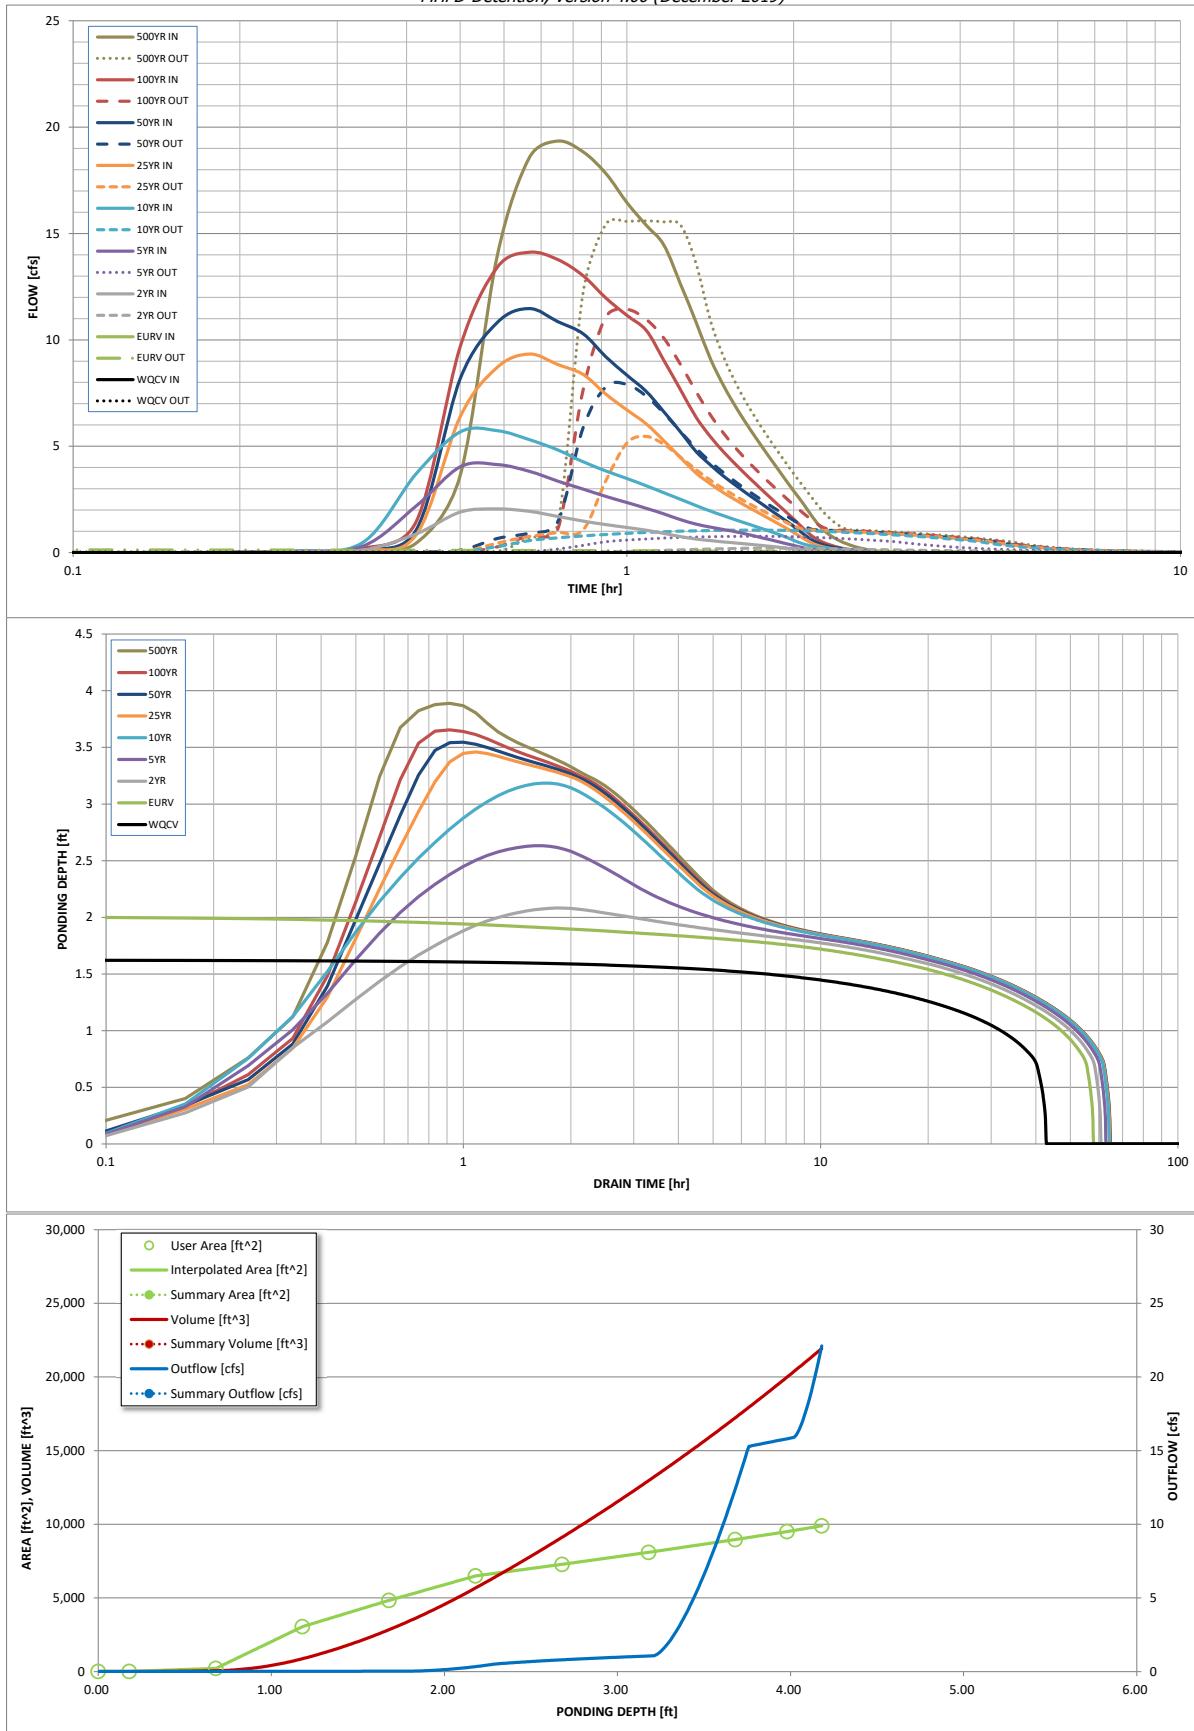

Calculated Parameters for Spillway
Spillway Design Flow Depth = **0.28** feet
Stage at Top of Freeboard = **5.30** feet
Basin Area at Top of Freeboard = **0.23** acres
Basin Volume at Top of Freeboard = **0.50** acre-ft

Routed Hydrograph Results

| The user can override the default CHP Hydrograph and run volumes by entering new values in the Inflow Hydrograph table columns A through K. | | | | | | | | | |
