Hi I am writing to you in an effort to oppose the rezoning proposal that is in effect for the town of Falcon. Falcon is a highly residential town and the majority of the residents live here to escape the dirty city lifestyle. They come to a place that is safe for Thier children and the air is clean. The Industrial area will pollute both the air and land causing harmful chemicals to leak into our drinking water and food supply. And since a vast portion of the region is agricultural and is a major food supplier for other regions has well chemicals and materials from these companies will effect all adjoining towns. The toxic chemicals from the materials in the plants can cause long term effects including cancer. People move away from the city and come here not to the city. Traffic along with the

congestion will get horrific. Who is going to be held liable when our children get cancer? Would anyone want that on their conscience. Who will answer to the lawsuits that will occur It's not, if but when these chemicals from these processing plants will affect our children. We don't want the Industrial plants here take them elsewhere. In return they will also drive real estate prices and the real estate market due to the air pollution, congestion and traffic.
