---

Mr. Howser,

I would like to go on record as STRONGLY OPPOSING the rezone of Meadow Lake Industrial Park to I-3 from its current zoning. As a property owner in the area, the rezoning of the current zoning to Heavy Industrial negatively impacts the reasons for my property ownership and compromises the safety of our aircraft in the airport area. First, there is demonstrable evidence of these types of zoning activities being directly responsible for the safety of aircraft crews, passengers, and collaterally, persons and structures on the ground. The FAA has distributed accident reports, listing that the causes of these accidents stem from activities in heavy industrial areas bordering airports. The accidents of record include critical damage to engines, resulting in accidents with severe injuries or loss of life not only to aircraft crews and passengers, but also to people on the ground. This directly impacts the safety of all those in the area and all those who engage in aviation, commercially and generally.

Second, quality of life for property owners is negatively impacted by heavy industrial activities. Many of us have owned property in the vicinity for an extended period of time and we purchased property in this location because it is a quiet, peaceful and our quality of life will be strongly and negatively changed if this zoning change is allowed to proceed. The developers would have people believe that the current zoning around the area is "not residential", as they have stated in many meetings I have attended, leading up to this one. This is simply NOT true and the residential owners would have to contend with heavy industrial activities where none now exist. This will reduce the value of their properties and will cause more noise, inhibit their right to quiet enjoyment of their ownership rights, and result in an overall decline in quality of life.

Please DO NOT allow this rezoning to occur.

**Paeleigh (Mary Ann) Reid**
