DEVIATION REQUEST AND DECISION FORM

Updated: 6/26/2019

PROJECT INFORMATION

Project Name :	**Villages at Sterling Ranch**
Schedule No.(s) :	52000-00-573
Legal Description :	See attached

APPLICANT INFORMATION

Company :	Classic SRJ Land, LLC
Name :	Loren Moreland
	☒ Owner ☐ Consultant ☐ Contractor
Mailing Address :	2138 Flying Horse Club Drive
	Colorado Springs, CO 80921
Phone Number :	719-592-9333
FAX Number :	N/A
Email Address :	Lmoreland@classichomes.com

ENGINEER INFORMATION

Company :	Classic Consulting		
Name :	Catherine M. Tessin, P.E.	Colorado P.E. Number :	45004
Mailing Address :	619 North Cascade Ave.		
	Colorado Springs, CO 80903		
Phone Number :	719-785-0790		
FAX Number :	N/A		
Email Address :	Ctessin@classicconsulting.net		

OWNER, APPLICANT, AND ENGINEER DECLARATION

To the best of my knowledge, the information on this application and all additional or supplemental documentation is true, factual and complete. I am fully aware that any misrepresentation of any information on this application may be grounds for denial. I have familiarized myself with the rules, regulations and procedures with respect to preparing and filing this application. I also understand that an incorrect submittal will be cause to have the project removed from the agenda of the Planning Commission, Board of County Commissioners and/or Board of Adjustment or delay review until corrections are made, and that any approval of this application is based on the representations made in the application and may be revoked on any breach of representation or condition(s) of approval.

V.P. 5/30/2025

06/16/25

PCD File No. SF2439

DEVIATION REQUEST (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in Section **8.2.3** of the Drainage Criteria Manual (DCM) is requested.

Identify the specific DCM standard which a deviation is requested:

Section 8.2.3 in the DCM – At changes in pipe size, match crowns of pipes

State the reason for the requested deviation:

Utility conflicts and providing the required 18” min. clearance at all utility crossings

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

The proposed design does not match crown of pipes in all locations of pipe size change, however, still meets all other pipe design criteria related to slope and velocity and all pipe HGL design meets DCM criteria.

LIMITS OF CONSIDERATION
(At least one of the conditions listed below must be met for this deviation request to be considered.)

☐ The ECM standard is inapplicable to the particular situation.
☒ Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
☐ A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

The proposed storm design meets utility crossing clearance criteria of 18" min. along with all other storm pipe design and HGL design criteria.

CRITERIA FOR APPROVAL

Per ECM section 5.8.7 the request for a deviation may be considered if the request is **not based exclusively on financial considerations**. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with **all of the following criteria**:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

The proposed storm design meets all other design criteria and most importantly provides the required safe HGL design.

The deviation will not adversely affect safety or operations.

The proposed pipe design remains in a standard location within the public roadway and thus has no affect on safety or operations.

PCD File No. SF2439

The deviation will not adversely affect maintenance and its associated cost.

The proposed storm design has no significant bearing , no adverse affects on maintenance/cost are anticipated as the storm pipe sizing is the same and the pipe locations are the same. Thus, the maintenance and associated cost on this system is not adversely affected.

The deviation will not adversely affect aesthetic appearance.

The nature of this deviation relates to a buried storm pipe and thus has no affect on aesthetic appearance.

The deviation meets the design intent and purpose of the ECM standards.

The proposed deviation indeed meets the design intent and purpose of the ECM standards by providing a safe HGL design for the proposed storm system along with providing all necessary utility pipe clearances of 18" min.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

This deviation continues to provide a safe storm system design and thus meets the County's MS4 permit. The proposed design is a buried pipe system change and does not impact surface drainage or ponds. Thus, all El Paso County MS4 requirements on the surface (i.e. ponds, swales and other BMPs) are still being provided.

REVIEW AND RECOMMENDATION:

Approved by the ECM Administrator
This request has been determined to have met the criteria for approval. A deviation from Section **8.2.3** of the ECM is hereby granted based on the justification provided.

Denied by the ECM Administrator
This request has been determined not to have met criteria for approval. A deviation from Section _____ of the ECM is hereby denied.

ECM ADMINISTRATOR COMMENTS/CONDITIONS:

PCD File No. SF2439

1.1. PURPOSE

The purpose of this resource is to provide a form for documenting the findings and decision by the ECM Administrator concerning a deviation request. The form is used to document the review and decision concerning a requested deviation. The request and decision concerning each deviation from a specific section of the ECM shall be recorded on a separate form.

1.2. BACKGROUND

A deviation is a critical aspect of the review process and needs to be documented to ensure that the deviations granted are applied to a specific development application in conformance with the criteria for approval and that the action is documented as such requests can point to potential needed revisions to the ECM.

1.3. APPLICABLE STATUTES AND REGULATIONS

Section 5.8 of the ECM establishes a mechanism whereby an engineering design standard can be modified when if strictly adhered to, would cause unnecessary hardship or unsafe design because of topographical or other conditions particular to the site, and that a departure may be made without destroying the intent of such provision.

1.4. APPLICABILITY

All provisions of the ECM are subject to deviation by the ECM Administrator provided that one of the following conditions is met:

- The ECM standard is inapplicable to a particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship on the applicant, and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

1.5. TECHNICAL GUIDANCE

The review shall ensure all criteria for approval are adequately considered and that justification for the deviation is properly documented.

1.6. LIMITS OF APPROVAL

Whether a request for deviation is approved as proposed or with conditions, the approval is for project-specific use and shall not constitute a precedent or general deviation from these Standards.

1.7. REVIEW FEES

A Deviation Review Fee shall be paid in full at the time of submission of a request for deviation. The fee for Deviation Review shall be as determined by resolution of the BoCC.

LEGAL DESCRIPTION

A PARCEL OF LAND LOCATED IN THE WEST HALF OF SECTION 34, TOWNSHIP 12 SOUTH, RANGE 65 WEST OF THE SIXTH PRINCIPAL MERIDIAN, COUNTY OF EL PASO, STATE OF COLORADO; SAID PARCEL MORE PARTICULARLY DESCRIBED AS FOLLOWS WITH **BEARINGS REFERENCED** THE EASTERLY RIGHT-OF-WAY LINE OF STERLING RANCH ROAD AS DEDICATED IN HOMESTEAD NORTH AT STERLING RANCH FILING NO. 1 RECORDED ON MAY 19, 2023 UNDER RECEPTION NO. 223715150, BEING MONUMENTED AT EACH END BY NO.5 REBAR WITH 1-1/2" ALUMINUM SURVEYORS CAP STAMPED "JR ENG LS 38252" FOUND FLUSH WITH GRADE; DETERMINED FROM GPS OBSERVATIONS TO BEAR SOUTH 13°28'38" WEST, A DISTANCE OF 1168.84 FEET.

BEGINNING AT THE NORTHEASTERLY CORNER OF SAID STERLING RANCH ROAD ALSO BEING THE NORTHEAST END OF THE ABOVE-DESCRIBED BEARING REFERENCE;

THENCE ON THE EASTERLY RIGHT-OF-WAY LINE OF SAID STERLING RANCH ROAD, NORTH 58°28'29" EAST A DISTANCE OF 49.50 FEET;

THENCE SOUTH 76°31'31" EAST, ON SAID RIGHT-OF-WAY AND ITS SOUTHEASTERLY EXTENSION, A DISTANCE OF 1,434.77 FEET;

THENCE SOUTH 13°28'29" WEST A DISTANCE OF 310.01 FEET;

THENCE SOUTH 76°31'31" EAST A DISTANCE OF 66.21 FEET;

THENCE SOUTH 13°28'29" WEST A DISTANCE OF 690.84 FEET;

THENCE NORTH 76°31'31" WEST A DISTANCE OF 1,535.98 FEET TO SAID EASTERLY RIGHT-OF-WAY LINE;

THENCE NORTH 13°28'29" EAST, ON SAID EASTERLY RIGHT-OF-WAY LINE, A DISTANCE OF 965.84 FEET TO THE **POINT OF BEGINNING**.

THE ABOVE DESCRIPTION PRODUCES A CALCULATED AREA OF 1,516,147 SQUARE FEET (34.80595 ACRES) AND IS DEPICTED ON THE ATTACHED GRAPHICAL EXHIBIT FOR REFERENCE.

- A Froude number of 0 indicates that pressured flow occurs (adverse slope or undersized pipe).

- If the sewer is not pressurized, full flow represents the maximum gravity flow in the sewer.
- If the sewer is pressurized, full flow represents the pressurized flow conditions.

- Bend and Lateral losses only apply when there is an outgoing sewer. The system outfall, sewer #0, is not considered a sewer.
- Bend loss = Bend K * V_fi ^ 2/(2*g)
- Lateral loss = V_fo ^ 2/(2*g)- Junction Loss K * V_fi ^ 2/(2*g).
- Friction loss is always Upstream EGL - Downstream EGL.

System Input Summary – STM-01: 5-YR HGL REPORT

Rainfall Parameters

Rainfall Return Period: 5
Rainfall Calculation Method: Formula

One Hour Depth (in): 0.42
Rainfall Constant "A": 28.5
Rainfall Constant "B": 10
Rainfall Constant "C": 0.786

Rational Method Constraints

Minimum Urban Runoff Coeff.: 0.20
Maximum Rural Overland Len. (ft): 500
Maximum Urban Overland Len. (ft): 300
Used UDFCD Tc. Maximum: Yes

Sizer Constraints

Minimum Sewer Size (in): 18.00
Maximum Depth to Rise Ratio: 0.90
Maximum Flow Velocity (fps): 18.0
Minimum Flow Velocity (fps): 4.0

Backwater Calculations:

Tailwater Elevation (ft): 7068.76

- A Froude number of 0 indicates that pressured flow occurs (adverse slope or undersized pipe).
- If the sewer is not pressurized, full flow represents the maximum gravity flow in the sewer.
- If the sewer is pressurized, full flow represents the pressurized flow conditions.

- Calculated diameter was determined by sewer hydraulic capacity rounded up to the nearest commercially available size.
- Sewer sizes should not decrease downstream.
- All hydraulics where calculated using the 'Used' parameters.

- A Froude number of 0 indicates that pressured flow occurs (adverse slope or undersized pipe).
- If the sewer is not pressurized, full flow represents the maximum gravity flow in the sewer.
- If the sewer is pressurized, full flow represents the pressurized flow conditions.

- Calculated diameter was determined by sewer hydraulic capacity rounded up to the nearest commercially available size.
- Sewer sizes should not decrease downstream.
- All hydraulics where calculated using the 'Used' parameters.

- Bend and Lateral losses only apply when there is an outgoing sewer. The system outfall, sewer #0, is not considered a sewer.
- Bend loss = Bend K * V_fi ^ 2/(2*g)
- Lateral loss = V_fo ^ 2/(2*g)- Junction Loss K * V_fi ^ 2/(2*g).
- Friction loss is always Upstream EGL - Downstream EGL.
