Onsite Wastewater Treatment System Installation Permit

PERMIT DETAILS			
Permit No.: 137172	Record ID: ON0051463	Issued: October 9, 2022	Expires: October 9, 2023
SYSTEM INFORMATION			
OWTS Location: 16315 Rickenbacker Ave, Monument CO 80132			
Owner: Chris Jeub	Schedule #: 7127001011	Permit Type: New	
Proposed Use: Commercial	No. of Bedrooms: NA	Design Flow (gpd): 1200	
System Type: Gravity	Treatment Level: TL1	Water Source: Well	
PERMIT REQUIREMENTS			
Tank: 2500	Pump Tank: NA	STA: 2016 sq ft (168 Q4/ 134 ARC 36)	Media: Chamber/bed
STA Depth: 48" maximum	Sand Filter: No	Depth: NA	O&M Req: No
Design Document: GeoQuest	Document ID#: 22-0086	Date: 3.7.2022	
ADDITIONAL COMMENTS			
<ul style="list-style-type: none"> - An Engineered OWTS system to be installed on site due to installation OWTS supporting commercial campsites 4 plumbed (2 occupants per site @75 gpd) /4 non-plumbed (2 occupants per site @ 75 gpd) , requiring a Tier II licensed installer. - TIER II LICENSED INSTALLER MUST BE NAMED AND VERIFIED PRIOR TO FINAL APPROVAL OF SYSTEM. - FLOODWAY on property – FW crosses the N property line ~294’ from the NW property corner, crosses the S property line ~412’ from the SW property corner. STA appears to be outside the FP - Changes to approved design document must be submitted to EPCPH and design engineer prior to installation of changes - All horizontal setbacks must be maintained through system installation. In addition, system must remain completely uncovered, including the tank size, for final inspection. - The well must be installed at time of final inspection, or final approval will not be given until well installation is verified. Must maintain 100' set back to all wells on property or neighboring property. - Engineered systems require the as built drawing and certification letter from the engineer be submitted to Public Health prior to final approval and Regional Building sign off - Ensure that all work is completed prior to contacting and requesting final line for inspection, otherwise additional fees may be incurred. - During excavation, if bedrock, groundwater, changes in soil type from that previously identified, or other notable soil changes are encountered, all excavation must cease and EPCPH is to be contacted for an evaluation to determine if additional tests are required - Issuance of this permit allows construction of the system as proposed. It does not imply or guarantee final system installation approval. System design or construction changes may be required based upon changed or newly discovered site conditions. 			

This permit is issued in accordance with 25-10-106 Colorado Revised Statutes. The PERMIT EXPIRES upon completion/installation of the Onsite Wastewater Treatment System, or at the end of twelve (12) months from date of issue, whichever occurs first. If both a Building Permit and an Onsite Wastewater Treatment System Permit are issued for the same property and construction has not commenced prior to the expiration date of the Building Permit, the Onsite Wastewater Permit shall expire at the same time as the Building Permit. This permit is revocable if all stated requirements are not met. The Onsite Wastewater Treatment System must be installed by an El Paso County Licensed System Contractor, or the property owner.

The Health Officer shall assume no responsibility in case of failure or inadequacy of an Onsite Wastewater Treatment System, beyond consulting in good faith with the property owner or representative. Access to the property shall be authorized at reasonable time for the purpose of making such inspections as are necessary to determine compliance with the requirements of this law (permit).

Inspection request line: Call (719) 575-8699 before 3:00 p.m. the business day prior to the requested inspection date or 1:00 p.m. the business day prior to a holiday. There are NO final inspection on Wednesdays.

 Kat McGarvy, M.S., R.E.H.S.

General Contractor	Isaiah Jeub	Phone/Email	(719) 625-8268
System Installer	Maxus Escavating	Phone/Email	850-399-0620
All engineered-design systems <i>must</i> be installed by a Tier II licensed installer.			

PERMIT FEES AS ESTABLISHED BY EL PASO COUNTY BOARD OF HEALTH	
<input checked="" type="checkbox"/> New Permit	\$750.00 (EPCPH Charge) + \$147.00 (EPC Planning Dept. Surcharge) + \$23.00 (CDPHE Surcharge) = \$920.00
Permit fee includes: Application design review, site evaluation, and 1 final inspection. Additional inspections incur additional fees	
<input type="checkbox"/> Modification Permit	\$675.00 (EPCPH Charge) + \$23.00 (CDPHE Surcharge) = \$698.00
Permit fee includes: Application design review, site evaluation, and 1 final inspection. Additional inspections incur additional fees	
<input type="checkbox"/> Major Repair Permit	\$535.00 (EPCPH Charge) + \$23.00 (CDPHE Surcharge) = \$558.00
Permit fee includes: Application design review, site evaluation, and 1 final inspection. Additional inspections incur additional fees	
<input type="checkbox"/> Minor Repair Permit	\$245.00 (EPCPH Charge) + \$23.00 (CDPHE Surcharge) = \$268.00
Permit fee includes: Application review, 1 final inspection. Additional inspections incur additional fees	
All Payments are due at the time of application submittal; by check or major credit card (Visa / MC) Permits expire one year from the date of issuance, unless otherwise noted.	

REQUIRED: ADDITIONAL PROPERTY INFORMATION

System Type Engineered Design Conventional Design Number of Structure(s) to be connected: 4

Written Scope of Work:
Installation of new septic system as per engineers specifications and design criteria and El Paso County regulations.

Please provide directions to the property from a main highway:
Take exit Hwy 105 from I-25, head West down 2nd street. Turn left on Mitchell. Turn right on Arnold. Turn left on Fairchild. Turn left on Chennault. Turn right on Rickenbacker. Third house on the left.

- Property address or lot number must be clearly marked and visible from the road
- Profile excavation test pit and/or soil profile holes must be clearly marked
- Proposed and alternate soil treatment areas must be protected from compaction and disturbance
- Locked gates require the gate code or lock combination be provided on front of application

Failure to comply with the above information may result in an additional charge for a return trip.

COMPLETE APPLICATION INCLUDES

EPCPH will only accept submissions when all required components are included in submission.

Colorado Professional Engineer (P.E.) stamped soils report:55147

Soils report: including at least 2 soil profile excavation pits, in accordance with section 8.5 A-F of OWTS regulations

Calculation/Design Worksheet

Clear legible 8.5'x11' Design Document

Design document must include proposed and alternate locations, profile pit locations with respect to system layout, all setbacks to pertinent structures and features in table 7-1.

I certify that the information provided on this application is in compliance with the Chapter 8 Onsite Wastewater System (OWS) Regulations of the El Paso County Board of Health. I also authorize the assigned representative of El Paso County Public Health to enter onto this property in order to obtain information necessary for the issuance of a permit.

Applicant Signature: Chris Jeub

Date: Aug 1, 2022

Submit application to HEASepticinfo@elpasoco.com

6825 Silver Ponds Heights #101
Colorado Springs, CO 80908
(719) 481-4560

To Whom It May Concern,

Attached are the results of the Profile Pit Evaluation performed for your site. **Completion of the report does NOT automatically place you in the queue to complete a design.** We require the following information is provided to us prior to placing a job in the queue.

1. Accurate number of bedrooms either proposed or existing in the house. Be sure to include all rooms with closets.
2. Designs for new construction also requires submittal of a site plan. This shall include at a minimum the following: all property lines dimensioned with lengths and angles, accurate dimensions from the house to property lines and corners, proposed construction of all buildings, location of Well with dimensions from structures and property lines, location of driveway, drawings **MUST** be to Scale, and slope or topography lines. **Additional fees will be assessed for incomplete and unclear site plans.** A surveyor's CADD file is preferred (.DWG or .DXF). It is your responsibility to provide correct information. Additional fees will be assessed if any information changes.
3. Site plans that are provided as DWG / DXF Files are exempt from redrawing fees. PDF Files of Surveyor's Site Plans for New Builds **WILL** incur a \$50 Redrawing Fee. Hand drawn Site Plans for New Builds **WILL** incur a \$200-\$400 Redrawing Fee and a site walk will be required. Septic Repair Designs do **NOT** incur Additional Fees.

Please read the evaluation to determine if the system for your site shall be designed by a licensed engineer or if a conventional design is allowed. If a conventional system is allowed, a design document is still required by the health department, this may be provided by an engineer, installer, or builder familiar with On-Site Wastewater Treatment System (OWTS) regulations. OWTS Designs and Record Drawings are done at an additional cost. Please contact the office for pricing. If installing in El Paso County, an Engineer's Record Drawing (additional fee) is required for final acceptance by the health department. If installing in a different county please verify with the installer who will be completing the Record Drawing. We are happy to complete this for an additional fee.

Per county and state regulations, the Soil Treatment Area (STA), commonly referred to as the leach field, shall be installed adjacent to the test pit locations. **Any alteration or deviation from the tested locations will require additional testing at an additional cost.**

The homeowner shall be made aware of the responsibilities of owning a septic system. Please contact your local health department for homeowner responsibilities and Do's and Don'ts.

Geoquest, LLC provides no warranty for the evaluation or design (should this be completed). This evaluation and design have been prepared in compliance with the state and the local governing public health department's regulations. However, the test procedures are limited in determining soil absorption across the proposed STA. Many factors contribute to soil absorption outside of our control as well as unknown water usage. It is important to follow proper OWTS installation practices to minimize risk.

Please feel free to contact us at (719) 481-4560, if you have any questions.

PROFILE PIT EVALUATION

FOR

CHRISTOPHER JEUB

JOB #22-0086

Lot #2, Block #1,
Vans Subdivision,
16315 Rickenbacker Avenue,
El Paso County,
Colorado

Sincerely,

Douglas J Pretzer

Douglas J. Pretzer, P.E.
Civil Engineer

PROFILE PIT FINDINGS

Enclosed are the results of the profile pit for the septic system to be installed at **Lot #2, Block #1, Vans Subdivision, 16315 Rickenbacker Avenue, El Paso County, Colorado**. The location of the test pits was determined by Christopher Jeub. The residence will not be on a public water system. The number of bedrooms in the design for the residence is unknown. Due to the natural slope of the property, the entire system will feed to the east at approximately **15% at least 20** feet. All applicable portions of the El Paso County Public Health Department Onsite Wastewater Treatment System Regulations (OWTS) must be complied with for the installation of the treatment system.

The inspection was performed on February **4, 2022**, in accordance with Table 10-1 of the **E.P.C.P.H. OWTS Regulations**.

Soil Profile #1:

- 0 to 4"** - Topsoil - loam, organic composition.
- 4" to 8'** - USDA soil texture sandy loam, soil **type 2A**, structure shape **massive**, structure grade 0, non-cemented, LTAR 0.50, dark brown in color, 10 YR 3/3, **18% rock**.

Soil Profile #2:

- 0 to 4"** - Topsoil - loam, organic composition.
- 4" to 8'** - USDA soil texture sandy loam, soil **type 2A**, structure shape **massive**, structure grade 0, non-cemented, LTAR 0.50, very dark grayish brown in color, 10 YR 3/2, **15% rock**.

Groundwater was not encountered during the inspection. **Bedrock was not encountered** during the inspection. No known wells were observed within 100 feet of the proposed system. **All setbacks shall conform to county regulations.**

Due to a **multi-family system being required**, the septic system to be installed on this site shall be designed by a Colorado Licensed Engineer. Based on the observed conditions, we feel a design based on an **LTAR of 0.50 GPD/SF** (USDA 2A, treatment soil, treatment level 1) is reasonable. Maximum depth of the installation shall not be deeper than 4 feet below the existing grade.

If during construction of the field itself, subsurface conditions change considerably or if the location of the proposed field changes, this office shall be notified to determine whether the conditions are adequate for the system as designed or whether a new system needs to be designed.

Weather conditions at the time of the test consisted of clear skies with freezing temperatures.

CALCULATIONS (New OWTS):

Multi-Family Camping Site
 Up to 4 Plumbed "Premium" Campsites (2 Occupants/Site)
 Bathroom Serving up to 4 "Off-Grid" Campsite (2 Occupants/Site)
 n=16 Occupants
 q=75 GPD/Occupant

LTAR = 0.50 Gallons per Day per Square Foot (GPD/SF).
USDA Soil Type 2A per Profile Pit 2/4/2022

$Q = (16 \text{ Occupants}) \times (75 \text{ GPD/Occupant})$
 $Q = 1,200.0 \text{ GPD}$

$A = \frac{Q}{LTAR} = \frac{1,200.0 \text{ GPD}}{0.50 \text{ GPD/SF}}$

$A = 2,400.0 \text{ SF}$

Gravity Fed Chamber Beds:

$A = (2,400.0 \text{ SF}) \times (1.2) = (0.7)$
 $A = 2,016.0 \text{ SF}$ Required

CHAMBER BED SYSTEM (Gravity Fed):

Infiltrator Systems Inc. Quick 4 Standard Chambers
 # Chambers = SF RQD / 12.0 SF per Chamber
 # Chambers = 2,016.0 SF / 12.0 SF = Min. 168 Chambers
 Install 2 Zones: 4 Rows x 21 Chambers Long
 # Chambers Provided = 168 Total
 Total Contact Area = 2,016.0 SF Actual
 Total Contact Area = 2,016.0 SF Required

Note: Use of Alternative Chambers is Acceptable.
 For ARC 36 Standard Chambers (15.0 SF / Chamber, Min. 135 Chambers). Install 2 Zones with 4 Rows of 17 Chambers (136 Total). Contact Engineer for Clarification.

MAXIMUM DEPTH:

48" As Measured on the Up-Hill Side of the Excavation

TANK SIZES:

Main Tank Size = Min. 2,500 Gallons (Two-Compartment)
 OR 1,500 Gallon (One-Compartment) + 1,000 Gallon (One-Compartment)
 OR (2) 1,250 Gallon (One-Compartment)
 EPCHD Approved Effluent Filter on Outlet

Geoquest, LLC. has provided this Design in Accordance with the Standards of Practice Common to the Area. However, as with All Underground Absorption Fields, Guarantee from Failure is Impossible. Even with Proper Installation, as Outlined for this Proposed Construction, There Can Remain Many Uncertainties, and Difficulties Can Still Arise in the Operation of the System in the Future. Proper Design, Construction, and Maintenance can Assist in Minimizing Uncertainties, but Cannot Entirely Eliminate Them. Homeowners Should be Advised of Maintenance and Special Considerations for Septic Systems. Refer to El Paso County Public Health Brochure: "Maintaining Your Septic System" for Additional Information. Due to the Possibility of Unknown Water Usage Factors, Geoquest, LLC. Provides No Warranty of this Design or Installation Against Failure or Damage of Any Type. Therefore, the Limits of Liability Extend Only to the Fee Rendered for the Professional Services Provided.

GENERAL NOTES:

All Work per El Paso County Board of Health Regulations Chapter 8: On-Site Wastewater Treatment Systems (OWTS) Criteria.

All Setbacks Shall Conform to El Paso County Regulations (See Table 7-1 in the Regulations for Additional Information). Contractor/Homeowner Must Verify All Setbacks and Obtain Utility Clearances Prior to Construction.

Contractor/Homeowner is Responsible for Permit. Contractor/Homeowner Must Obtain Approval of Engineered OWTS from the El Paso County Health Department.

All Bends Limited to 45 Degree Ells or Long Sweep Quarter Bends. Areas Under Driveways Shall Be Protected as Per El Paso County Health Department Regulations.

Building Sewer Clean-Outs Shall Be Installed within 5 FT of the Structure and at Intervals Not to Exceed 100 FT in Straight Runs, Upstream at Each Change of Direction Greater Than 45°, and at Any Combination of Bends Greater Than 45° within a 40 FT Section of Building Sewer.

Grade Surrounding Area to Drain Away from the Soil Treatment Area (STA).

Paving, Planting of Trees/Shrubs, Irrigation, Vehicular Traffic or Hoofed Animal Traffic of Any Kind Over the STA may Cause Premature Failure and is Prohibited.

Refer to Sheet 2, 3, and 4 for Additional Details and Information.

Drawn by: djp	Sch. No. 7127001011
Checked by: djp	El Paso County, Colorado

CHAMBER BED SYSTEM (Gravity Fed):

Infiltrator Systems Inc. Quick 4 Standard Chambers

Chambers = SF RQD / 12.0 SF per Chamber

Chambers = 2,016.0 SF / 12.0 SF = Min. 168 Chambers

Install 2 Zones: 4 Rows x 21 Chambers Long

Chambers Provided = 168 Total

Total Contact Area = 2,016.0 SF Actual

Total Contact Area = 2,016.0 SF Required

Note: Use of Alternative Chambers is Acceptable.

For ARC 36 Standard Chambers (15.0 SF / Chamber, Min.

135 Chambers). Install 2 Zones with 4 Rows of 17 Chambers

(136 Total). Contact Engineer for Clarification.

4" Ø PVC Solid Pipe from Each Structure to the Septic Tank, with Cleanouts within 5 FT of Each Structure and at Intervals Not to Exceed 100 FT in Straight Runs. Upstream at Each Change of Direction Greater Than 45°, and at Any Combination of Bends Greater Than 45° within a 40 FT Section of Building Sewer. Maintain 2.0% Min. Grade on Pipe Feeding the Septic Tank. Exact Location of the Discharge Line from the House per Plumbing Design by Others.

Min. 2,500 Gal. Precast Concrete Two Compartment Septic Tank (or Combination of Tanks) w/ EPCPH Approved Effluent Filter on Outlet (Requires Regular Maintenance). Inlet Approx. 24" Below Existing Grade. Risers to Grade with Secure Access Cover (Water Tight, Min. 3" Above Finish Grade, Typ. All Septic Tank Access Locations). Exact Location to be Field Determined.

Minor Rotation or Curvature (ie. Less Than 15°) of the Soil Treatment Area (STA) Beds to Best Fit the Site Topography is Acceptable (i.e. Parallel to Site Contours). STA shall Maintain the Approximate Orientation Shown w/ Respect to Buildings and Lot Lines. Contact Engineer for Clarification.

Install Drainage Swale Between the House and Soil Treatment Area to Ensure Surface Runoff is Diverted Around the STA. Downspouts near the STA Shall Discharge into the Swale or Extended Beyond the STA.

Distribution Box w/ Speed Levelers to Ensure Equal Distribution. Install a Secure Access Riser to Grade to Allow for Future Speed Leveler Adjustment.

Quick4 Plus Standard Chambers:

34" W x 48" L x 12" H Each

2 Zones: 4 Rows x 21 Chambers Long (168 Total).

Max. Depth of Installation 48" Below Native Grade (As Measured on the Uphill Side). See STA Layout and Cross-Section for Additional Detail and Clarification.

Inspection Port / Vent at Each Corner of Each Bed (Typ. of 8 Total). See Detail on Page 3 for Additional Information.

OWTS to be Roped Off (Caution Tape or Temporary Construction Fencing is Acceptable) Prior to and During Construction to Prevent Construction Traffic from Compacting Surface Soils and Protect the STA from Traffic After Installation.

Vans Subdivision,	
Sch. No. 7127001011	
El Paso County, Colorado	

Site Plan

* Indicates Geoquest, LLC. Profile Pit Test Locations
Location from Northwest Lot Corner to Profile Pit #1: S. 45° E. - 346'
Location from Profile Pit #1 to Profile Pit #2: N. 12° E. - 60'
GPS Coordinates Profile Pit #1: N. 39° 04' 5.0", W. 104° 52' 28.9"
GPS Coordinates Profile Pit #2: N. 39° 05' 5.5", W. 104° 52' 28.8"

84'-0" (Approximate Length of Each Chamber Bed, Not Including End Caps)

4" Ø PVC Solid Pipe Level Manifold (Typ. Each Zone)

4" Ø PVC Solid Pipe from Distribution Box to the Middle of Each Level Manifold

Native Slope: ~15%

Distribution Box w/ Speed Levelers to Ensure Equal Distribution. Install a Access Riser or Sprinkler Box to Grade to Allow for Future Speed Leveler Adjustment.

4" Ø PVC Solid Pipe from Septic Tank to Distribution Box

Quick4 Plus Standard Chamber Modules
34" W x 48" L x 12" H Each (Typ.)
Install 2 Beds: 4 Rows x 21 Chambers Long (168 Total Chambers)

Special Note: STA Layout Illustrates the General Design Layout. Minor Rotation or Curvature (ie. Less Than 15°) of the Soil Treatment Area (STA) Beds to Best Fit the Site Topography is Acceptable.

Note: Use of Alternative Chambers is Acceptable.
For ARC 36 Chambers (15.0 SF / Chamber, Min. 135 Chambers)
Install 2 Beds: 4 Rows x 17 Chambers Long (136 Total Chambers).
Contact Engineer for Clarification.

Note: Min. 6 FT Undisturbed Native Soil Between Zones. Each Bed Shall be Level End to End and Side to Side. Step Beds as Required by Native Slope. Max. 4 FT to the Bottom of the Chambers from Finished Grade as Measured on the Uphill Side of Each Chamber Bed.

Soil Treatment Area (STA) Layout (Chamber Beds)

SCALE: 1" = 10'

4" Ø Solid Pipe w/ Removable Cap (Min. 6" Above Finish Grade). Drill Min. (4) 1/8" Ø Holes Above Grade to Allow System to Vent. Install per Chamber Manufacturers Recommendations.

Provide Min. 12" (36" Max.) Cover Over Top of Chambers with Min. 6" Topsoil. Install a Continuous Crowned Slope Over All Chamber Beds to Prevent Ponding of Precipitation. It is Acceptable to Cover Each Bed Individually if Desired. Special Care Shall be Taken to Grade the Area Between Beds to Prevent Ponding of Precipitation.

Plant w/ Native Grasses and Maintain (See Notes)

Native Slope: ENE @ ~15%

Roughen Sidewall Surface to Eliminate Bucket Smear (Typ. All Sides of Each Excavation)

Remove All Native Topsoil within STA Footprint and Stockpile for Re-Use (Approx. 4" Native), then Remove Approx. 20"-32" Native Material in the Area Each Chamber Bed. Scarify Bottom of Each Bed and Eliminate Bucket Smear on All Excavation Sidewalls (Prior to Placing Chambers, Typ. Each Bed). Max. 48" to the Bottom of the Chambers from Finished Grade as Measured on the Uphill Side of Each Chamber Bed.

Note: Min. 6 FT Undisturbed Native Soil Between Zones. Each Bed Shall be Level End to End and Side to Side. Step Beds as Required by Native Slope. Max. 48" to the Bottom of the Chambers from Finished Grade as Measured on the Uphill Side of Each Chamber Bed.

Special Note: STA Layout Illustrates the General Design Layout. Minor Rotation or Curvature (ie. Less Than 15°) of the Soil Treatment Area (STA) Beds to Best Fit the Site Topography is Acceptable.

Soil Treatment Area (STA) Cross-Section (Chamber Beds)

Not to Scale

- Topsoil (Min. 6" on Final Cover)
- Native Topsoil (Approx. 4", Remove All from STA Footprint and Stockpile for Re-Use on Final Cover)
- Approved Material to Provide Cover (Min. 12", Max. 36" Total, Including Topsoil)
- Native Soil - Sandy Loam (USDA 2A, Approx. 4" - 8" Below Existing Grade)
