Subject: Re: [EXTERNAL] RE: Request for Concurrence/Technical Assistance: Renehan Subdivision Project - El Paso County, Colorado

Hello Stephen,

Thank you for contacting the U.S. Fish and Wildlife Service (Service). The Service has reviewed the Renehan Subdivision project and has no concerns with this project resulting in impacts to species listed as candidate, proposed, threatened, or endangered.

We appreciate your efforts to ensure the conservation of threatened and endangered species. Thank you for contacting us and please let me know if you have any further questions.

Sincerely,

Emily Berchem

This email has been received from outside of DOI - Use caution before clicking on links, opening attachments, or responding.

Good afternoon,

I'm writing to follow up on the Request for Concurrence/Technical Assistance submitted on Feb 16, 2023. While not consultation is not required under Section 7 of the ESA, El Paso County is requiring a "no effect" determination from the USFWS in order to approve the plat for this parcel. We would greatly appreciate further coordination with USFWS regarding this project.

Thanks and have a great day,
Stephen.

Subject: Request for Concurrence/Technical Assistance: Renehan Subdivision Project - El Paso County, Colorado

To whom it may concern,

On behalf of Renehan Subdivision, I would like to submit the Threatened and Endangered Species Habitat Assessment for the Renehan Subdivision Project in El Paso County, Colorado. We respectfully request concurrence on the attached assessment in compliance with the Endangered Species Act. Should you determine

any disagreement with this assessment, please contact me at 813-556-6671 or stephen.myers@kimley-horn.com within thirty (30) days of receipt of this letter to set up a web conference to go over the details of your findings and discuss project-related specifics.

Thank you and have a wonderful day,
Stephen.

Celebrating 15 years as one of FORTUNE's 100 Best Companies to Work For

February 16, 2023

Drue DeBerry, Colorado and Nebraska Field Supervisor
U.S. Fish and Wildlife Service
Colorado Field Office
P.O. Box 25486
Denver Federal Center, (MS 65412)
Denver, CO 80225

**Subject: Threatened and Endangered Species Habitat Assessment – Renehan Subdivision
5740 Burgess Road, Colorado Springs, El Paso County, Colorado 80908**

Dear Mr. DeBerry:

Renehan Subdivision (Renehan) is submitting a subdivision application to El Paso County for its review and approval for the proposed subdivided lots located at 5740 Burgess Road, Colorado Springs, El Paso County, Colorado (**Figure 1 – Project Location Map, Figure 2 – USGS Map**). Renehan retained Kimley-Horn and Associates, Inc. (Kimley-Horn) to assess the project site for the presence of potential habitat for the federally threatened Preble’s meadow jumping mouse (*Zapus hudsonius preblei*) and prepare this letter report to meet the requirements of El Paso County regarding compliance with the Endangered Species Act (ESA). Kimley-Horn, on behalf of Renehan, is requesting Technical Assistance from the U.S. Fish and Wildlife Service (USFWS) regarding the Preble’s meadow jumping mouse.

Project Location

The project site is located at 5740 Burgess Road, Colorado Springs, CO 80908. The project site is in Section 13, Township 12 South, Range 66 West in El Paso County, Colorado (**Figure 1**). The center latitude/longitude of the project site is 39.001544N, -104.720994W. The average elevation of the project site is approximately 7,185 feet above sea level (ASL).

Project Description

The Project is anticipated to consist of the subdivision of the existing property into three individual lots to be used for single family residential. The property is currently zoned: Rural Residential (RR-5) allowing for 5 acre lots. The proposed development will include Lot 1 within the southern region of the project site of 8.62 acres, Lot 2 within the central/northeast region of the project site of 17.06 acres, and Lot 3 within the northwestern region of the project site of 8.69 acres. The site will also include a shared private driveway with access to Burgess Road and a no build wildlife easement within Lot 3 of 0.57 acres. A site plan for the proposed project is included in **Appendix A**.

Site Description

The project site consists of undeveloped land with an unimproved driveway running north along the western boundary of the site. The site is surrounded by residential lots with Kettle Creek flowing west approximately 200 feet north of the site and the Burgess River flowing west approximately 500 feet north of the site (**Figure 3 – Aquatic Resource Location Map**). Dominant vegetation includes mature and sapling lodgepole pine (*Pinus contorta*). Groundcover is low with small areas of western wheatgrass (*Pascopyrum smithii*) and Kentucky bluegrass (*Poa pratensis*). The project site is bound to the north by La Foret Conference and Retreat Center forested land, to the west and east by residential housing, and to the south by Burgess Road. The project site has remained undeveloped since the earliest aerial of 1985. Existing topography slopes from east to west and south to north. According to the National Wetland Inventory (NWI), no wetlands or surface waters occur on the project site. Representative photos of the site are included in **Appendix B**.

Threatened, Endangered, and Candidate Species and Critical Habitat

Kimley-Horn accessed the USFWS Information, Planning, and Conservation (IPAC) online system (<http://ecos.fws.gov/ipac/>) to determine if any federally listed species could potentially occur in the vicinity of the project site (**Appendix C**). A site visit was conducted by Kimley-Horn on January 9, 2023, to conduct a land survey and an assessment of potential listed species habitat. The following species are federally listed and were identified with the potential to occur within the vicinity of the project site (**Table 1**).

Table 1. Federally Listed, Proposed, and Candidate Species Known to or That May Occur within the Project Site in El Paso County, Colorado

Common Name	Scientific Name	Federal Listing Status	Habitat Preference
Mammals			
Preble's meadow jumping mouse	<i>Zapus hudsonius preblei</i>	Threatened	Inhabits well developed riparian habitat with adjacent, undisturbed grassland communities, and a nearby water source (USFWS 2018).

Endangered Species Act Compliance

Preble's meadow jumping mouse is a nocturnal mouse that occupies the eastern edges of the Front Range in Colorado. Habitat for Preble's is typically comprised of well-developed riparian vegetation with adjacent, relatively undisturbed grassland communities and a nearby water source (USFWS 2018). Preble's riparian habitats are close to creeks, typically within the 100-year floodplain, and feature dense, multi-story horizontal cover of shrubs and trees with an understory of forbs and grasses. Upland habitats are usually immediately adjacent to the riparian habitats or within 300 feet of the 100-year floodplain. The USFWS has designated critical habitat, as well a block clearance area for this species. Block clearance areas are portions of land where Preble's meadow jumping mouse ESA precautions are no longer necessary. The project site is outside of the Colorado Springs block clearance by approximately one (1) mile to the north and not located within critical habitat. No positive trapping results for the Preble's meadow jumping mouse have been documented within the project site (CNHP 2019) or nearby vicinity. Seven (7) trapping surveys along Kettle Creek and the Burgess River within three (3) miles of the project site have also yielded negative results. No suitable habitat is present within the project site and the species was not observed during the site visit on January 9, 2022.

Determination of the Effects from the Proposed Project

Rationale for Excluding the Project Site as Potential Preble's Meadow Jumping Mouse Habitat

The proposed project is not anticipated to impact Preble's meadow jumping mouse habitat for the following reasons:

- **Lack of Suitable Habitat:** The project site lacks the well-developed, riparian vegetation, which typically includes a dense combination of grasses, forbs and shrubs, that Preble's meadow jumping mouse require.
- **Project Site is Not Identified as Critical Habitat:** The project site does not contain designated critical habitat for Preble's meadow jumping mouse and no positive trapping results have been documented within three (3) miles of the project site.

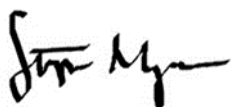

Given the above information, it is unlikely the project site supports a population of Preble's meadow jumping mouse or that the continued existence of this species would be adversely affected by the proposed project. It is anticipated that the proposed project will have *no effect* on Preble's meadow jumping mouse.

Conclusion

Kimley-Horn, on behalf of Renehan respectfully requests concurrence on this determination in compliance with the ESA. Should you determine any disagreement with this assessment, please contact me at 719-581-7962 or stephen.myers@kimley-horn.com within thirty (30) days of receipt of this letter to set up a web conference to go over the details of your findings and discuss project-related specifics.

Thank you for your time and consideration.

Sincerely,

Stephen Myers, PWS
Environmental Scientist
Kimley-Horn and Associates, Inc.

Subject: List of threatened and endangered species that may occur in your proposed project location or may be affected by your proposed project

To Whom It May Concern:

The enclosed species list identifies threatened, endangered, proposed and candidate species, as well as proposed and final designated critical habitat, that may occur within the boundary of your proposed project and/or may be affected by your proposed project. The species list fulfills the requirements of the U.S. Fish and Wildlife Service (Service) under section 7(c) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*).

New information based on updated surveys, changes in the abundance and distribution of species, changed habitat conditions, or other factors could change this list. Please feel free to contact us if you need more current information or assistance regarding the potential impacts to federally proposed, listed, and candidate species and federally designated and proposed critical habitat. Please note that under 50 CFR 402.12(e) of the regulations implementing section 7 of the Act, the accuracy of this species list should be verified after 90 days. This verification can be completed formally or informally as desired. The Service recommends that verification be completed by visiting the ECOS-IPaC website at regular intervals during project planning and implementation for updates to species lists and information. An updated list may be requested through the ECOS-IPaC system by completing the same process used to receive the enclosed list.

The purpose of the Act is to provide a means whereby threatened and endangered species and the ecosystems upon which they depend may be conserved. Under sections 7(a)(1) and 7(a)(2) of the Act and its implementing regulations (50 CFR 402 *et seq.*), Federal agencies are required to utilize their authorities to carry out programs for the conservation of threatened and endangered species and to determine whether projects may affect threatened and endangered species and/or designated critical habitat.

A Biological Assessment is required for construction projects (or other undertakings having similar physical impacts) that are major Federal actions significantly affecting the quality of the human environment as defined in the National Environmental Policy Act (42 U.S.C. 4332(2)

(c)). For projects other than major construction activities, the Service suggests that a biological evaluation similar to a Biological Assessment be prepared to determine whether the project may affect listed or proposed species and/or designated or proposed critical habitat. Recommended contents of a Biological Assessment are described at 50 CFR 402.12.

If a Federal agency determines, based on the Biological Assessment or biological evaluation, that listed species and/or designated critical habitat may be affected by the proposed project, the agency is required to consult with the Service pursuant to 50 CFR 402. In addition, the Service recommends that candidate species, proposed species and proposed critical habitat be addressed within the consultation. More information on the regulations and procedures for section 7 consultation, including the role of permit or license applicants, can be found in the "Endangered Species Consultation Handbook" at:

<http://www.fws.gov/endangered/esa-library/pdf/TOC-GLOS.PDF>

Migratory Birds: In addition to responsibilities to protect threatened and endangered species under the Endangered Species Act (ESA), there are additional responsibilities under the Migratory Bird Treaty Act (MBTA) and the Bald and Golden Eagle Protection Act (BGEPA) to protect native birds from project-related impacts. Any activity, intentional or unintentional, resulting in take of migratory birds, including eagles, is prohibited unless otherwise permitted by the U.S. Fish and Wildlife Service (50 C.F.R. Sec. 10.12 and 16 U.S.C. Sec. 668(a)). For more information regarding these Acts see <https://www.fws.gov/birds/policies-and-regulations.php>.

The MBTA has no provision for allowing take of migratory birds that may be unintentionally killed or injured by otherwise lawful activities. It is the responsibility of the project proponent to comply with these Acts by identifying potential impacts to migratory birds and eagles within applicable NEPA documents (when there is a federal nexus) or a Bird/Eagle Conservation Plan (when there is no federal nexus). Proponents should implement conservation measures to avoid or minimize the production of project-related stressors or minimize the exposure of birds and their resources to the project-related stressors. For more information on avian stressors and recommended conservation measures see <https://www.fws.gov/birds/bird-enthusiasts/threats-to-birds.php>.

In addition to MBTA and BGEPA, Executive Order 13186: *Responsibilities of Federal Agencies to Protect Migratory Birds*, obligates all Federal agencies that engage in or authorize activities that might affect migratory birds, to minimize those effects and encourage conservation measures that will improve bird populations. Executive Order 13186 provides for the protection of both migratory birds and migratory bird habitat. For information regarding the implementation of Executive Order 13186, please visit <https://www.fws.gov/birds/policies-and-regulations/executive-orders/e0-13186.php>.

We appreciate your concern for threatened and endangered species. The Service encourages Federal agencies to include conservation of threatened and endangered species into their project planning to further the purposes of the Act. Please include the Consultation Code in the header of this letter with any request for consultation or correspondence about your project that you submit to our office.

Project Type: Residential Construction
Project Description: 5740 Burgess Road, El Paso County, Colorado
Project Location:

Approximate location of the project can be viewed in Google Maps: <https://www.google.com/maps/@39.0010847,-104.72054686236487,14z>

Counties: El Paso County, Colorado

Endangered Species Act Species

There is a total of 8 threatened, endangered, or candidate species on this species list.

Species on this list should be considered in an effects analysis for your project and could include species that exist in another geographic area. For example, certain fish may appear on the species list because a project could affect downstream species. Note that 3 of these species should be considered only under certain conditions.

IPaC does not display listed species or critical habitats under the sole jurisdiction of NOAA Fisheries¹, as USFWS does not have the authority to speak on behalf of NOAA and the Department of Commerce.

See the "Critical habitats" section below for those critical habitats that lie wholly or partially within your project area under this office's jurisdiction. Please contact the designated FWS office if you have questions.

-
