

N88°27'27"E 277.40'

MARKED BY P.N.
(NORTH)

The Site Map must be drawn to scale, show the entire lot, and include the following:

- Total percent imperviousness of the site, to include both existing and proposed development in calculation. Consider all structures, porches, decks, patios, driveways, etc.
- Flow arrows or contour lines showing the direction of stormwater flow on the lot
- Proposed limits of disturbance
