BSK Investment Contractors Equipment Yard, PPR-19-024

Please accept the following comments from El Paso County Public Health for the special use request referenced above:

- An existing private well provides water service for the operation.
- Wastewater service is an approved 2004 onsite wastewater treatment system (OWTS). The OWTS was designed by a Colorado Registered Professional Engineer and includes a 500-gallon oil/sand separator located off the SW corner of the main building. The OWTS is adequate for the operation.
- The owner must comply with all federal, state, and local regulations regarding the proper storage and disposal/recycling of batteries, and other automotive fluids generated that may be a part of the operation.
