RE: Mayberry Filing No. 3  
Traffic Technical Memorandum  
El Paso County, CO  
PCD File No. SF221  
LSC #S224210

Dear Mr. Mick:

LSC Transportation Consultants, Inc. has prepared this traffic technical memorandum for the Mayberry Filing No. 3 residential development. The site is located generally south of State Highway (SH) 94 and west of Log Road in the Ellicott area of El Paso County, Colorado. LSC recently prepared a traffic impact study (TIS) for the PUD dated February 17, 2022, which included trips by the currently-proposed filing. This memorandum is intended as a site-specific, final plat traffic report.

**Important Note: This current Filing No. 3 was previously referred to as “Filing No. 4” in recent TIS reports.**

#### RECENT TRAFFIC REPORTS

- The traffic impacts of this subdivision filing were addressed within the *Mayberry Phase 1 PUD Amendment Transportation Memorandum* dated February 17, 2022 (EPC PCD File No.: PUDSP219). This document referenced the study prepared for the 2020 rezone.
- Traffic analysis of this subdivision filing was included in the June 2020 TIS report entitled *Ellicott Town Center Filing 2 [and 3] Traffic Impact Study March 31, 2020\* (\*Note: Minor Revision June 2, 2020)*.
- This current plat submittal for Filing No. 3 is in conformance with the plan upon which the February 2022 study was based. The number of lots has not changed, nor has the proposed internal street network, access points, or proposed functional classifications of streets.
- Note: this current Filing No. 3 was previously referred to as “Filing No. 4” in recent TIS reports for the PUD/Preliminary Plan Amendment and the Rezone TIS Report.

## LAND USE AND ACCESS

Filing No. 3 includes 142 lots for single family homes. Access to Highway 94 for this filing will be at New Log Road (full movement) and Springs Road (right-in/right-out) via the interim street connections internal to the Mayberry development.

The Filing No. 3 plat is consistent with the Phase 1 PUD/Preliminary Plan Amendment studied in the February 2022 TIS. A copy of that TIS is attached for reference. Note: this current Filing No. 3 was previously referred to as "Filing No. 4" in recent TIS reports for the PUD/Preliminary Plan Amendment and the June 2020 Rezone TIS Report. A copy of the subdivision plat, sheet 3 (the overall layout sheet) is attached for reference.

## TRIP GENERATION

Filing No. 3 includes 142 lots for single-family homes. Neither the ITE Land Use code nor the number of dwelling units has changed from the above-referenced prior TIS reports.

Estimates of the vehicle trips projected to be generated by Filing 3 have been made using the nationally published trip-generation rates from Trip Generation, 11th Edition, 2021 by the Institute of Transportation Engineers (ITE). Table 1 (attached) presents the Filing 3 trip generation estimate.

Based on ITE rates, Filing No. 3 is expected to generate about 1,336 vehicle trips on the average weekday (one half entering and one half exiting in a 24-hour period) following expansion. During the morning peak hour, 25 vehicles are projected to enter the site and 72 are projected to exit. Approximately 84 vehicles would enter and 50 vehicles would exit the site during the evening peak.

Table 1 also presents the estimated "cumulative" trip-generation through the current Filing 3 development. This cumulative trip-generation estimate includes trips estimated for the previously approved Filings 1 and 2 plus the currently-proposed Filing No. 3.

## TRAFFIC IMPACT ANALYSIS AND ROADWAY IMPROVEMENTS

### Overall

Please refer to the *Mayberry Phase 1 PUD Amendment Transportation Memorandum* dated February 17, 2022, which references (and identifies some specific updates to) the **June 2020** TIS report entitled *Ellicott Town Center Filing 2 Traffic Impact Study March 31, 2020\** (\*Note: *Minor Revision June 2, 2020*). The El Paso County reference numbers are PCD File Nos. CS192 and SF 1910. These documents addressed the impacts and improvements associated with this filing, as well as all of "Mayberry Phase 1." **Table 12a**, which address El Paso County road improvements, has been updated with the new plat filing numbers and is attached to this report.

Also, regarding CDOT improvements, please refer to the separate “Mayberry Filing No. 3 CDOT Access Permit Memo” included with this submittal. This memo has been prepared to accompany the CDOT access permit application for Filing 3 and is essentially an “addendum” to the **June 2020** TIS report entitled *Ellicott Town Center Filings 2 and 3 Traffic Impact Study March 31, 2020\** (\*Note: *Minor Revision June 2, 2020*). That report addressed the traffic impacts of Mayberry Phase 1 (Filings 1 through 4). As part of this CDOT memo, Improvements Table 12 has been updated/revised and a copy of that table has been attached to this report.

### **New Log Road Phasing**

Following with review of the PUD/Preliminary Plan TIS, the PCD Engineering Manager requested that the phasing of the one-way, New Log Road couplet south of SH 94 be addressed in this report.

The ultimate northbound-only portion of the one-way couplet has been and is proposed for interim use for **both** directions of travel and the separate, southbound-only portion of the couplet would be constructed later as future development occurs.

The trips on New Log Road would not exceed 3,000 vehicles per day (vpd) ADT with the buildout of Filings 1, 2, and 3. Given the northbound “half couplet” would have a similar cross section to an Urban Local roadway, and the design ADT of an Urban Local is 3,000 ADT, staff has indicated this volume as an approximate trigger for construction and use of the southbound lanes of the couplet. As shown in Table 1 the total trip generation for Filings 1-3 (including trips projected to use Springs Road instead of New Log Road) would be below 3,000 ADT.

### **SUBDIVISION STREET CLASSIFICATIONS**

Please refer to the *Mayberry Phase 1 PUD Amendment Transportation Memorandum* dated February 17, 2022, which contains a “Street Classifications” section and an associated exhibit.

### **ROADWAY IMPROVEMENT FEE PROGRAM**

This project will be required to participate in the El Paso County Road Improvement Fee Program. Mayberry Filing 3 will join the ten-mil PID. The ten-mil PID building permit fee portion associated with this option is \$1,221 per single-family dwelling unit. The total building permit fee would be \$172,382 for the 142 dwelling units. Note: This is based on the current rate, which is subject to change. El Paso County updates this rate periodically.

### **DEVIATIONS**

Please refer to the *Mayberry Phase 1 PUD Amendment Transportation Memorandum* dated February 17, 2022, which contains an “Approved Deviations” section.

An additional deviation (PUD Modification) was submitted with the PUD, which modifies the corner clearance across lots on the inside of and adjacent to ninety-degree “knuckles.”

## **ROUNABOUT ANALYSIS & DESIGN**

A modern roundabout with a 120-foot inscribed circle diameter is proposed as the traffic control for the intersection of Mayberry Drive/Springs Road. Exhibits containing roundabout technical analysis are attached, along with a roundabout parameters table.

The horizontal layout, analysis, and roundabout report have been completed using the criteria contained in the Wisconsin DOT roundabout design manual (as required by El Paso County). The attached exhibits and roundabout parameters table contain all the details for the currently-proposed roundabout. The inscribed circle diameter is 120-feet and the design vehicle is a WB-50 truck (per the *ECM*). However, the roundabout has also been designed to accommodate a larger WB-67 truck. The roundabout will also accommodate the standard county snowplow vehicle. The design accommodates pedestrians. Please refer to the attached roundabout parameters table and exhibits for details. Also, please refer to the roundabout design report, which is included with the CD submittal.

## **CDOT ACCESS PERMITS**

The CDOT access permits for New Log Road and Springs Road public street connections (access points) to SH 94 are 218053 and 218054. Both permits have been finalized. These permits were issued for Filings 1 and 2. A new “change of use” access-permit application is being submitted for Filing No. 3. This application has been submitted to CDOT, along with the **addendum memo** to the June 2020 TIS report, which addressed the impacts of the Phase 1 development, including the currently-proposed Filing No. 3. Please refer to the “Filing No. 3 CDOT Access Permits Memo,” which is a separate document included with this submittal.

The number of lots (142) in Filing 3 is the same number as studied in the June 2020 comprehensive TIS report for the commercial rezone submitted to and accepted by CDOT. The Filing No. 3 site circulation and connections to Highway 94 also remain consistent with the 2020 study. The primary change is that Filing No. 3 is being developed ahead of the commercial Filing No. 4 (previously called Filing No. 3 in that 2020 TIS report). The addendum memo addresses this change in development order.

Note: The Improvements Table in the February 2022 PUD TIS report references these approved access permits for all CDOT-facility improvements. This improvements table (Table 12 – CDOT Improvements) has been updated as requested by County staff. Note: Table 12a, which addresses El Paso County road improvements, has also been updated (and is also attached). Table 12 (attached) has been updated with the new plat numbers and contains revisions to address the

improvements associated with this current Filing No. 3, as Filing 3 is proceeding ahead of commercial Filing No. 4.

CDOT has indicated that a new access permit application(s) and accompanying "memo" will be required to process the access permit(s) for the Filing No. 3 development. CDOT acknowledged that this Filing 3 was included in the 2020 TIS report as a basis for the current access permits in-place for New Log Road and Springs Road connections to SH 94. This plat is in conformance with the 2020 TIS report. Phasing of access permits was anticipated. Updates to these permits, in the form of a change-of-use permit(s), to include the 142 lots in this subdivision filing, should not be problematic or difficult as the permits addressed phasing of highway improvements for all of Phase 1, including this filing.

NAME: Christopher S. McGranahan, P.E., PTOE

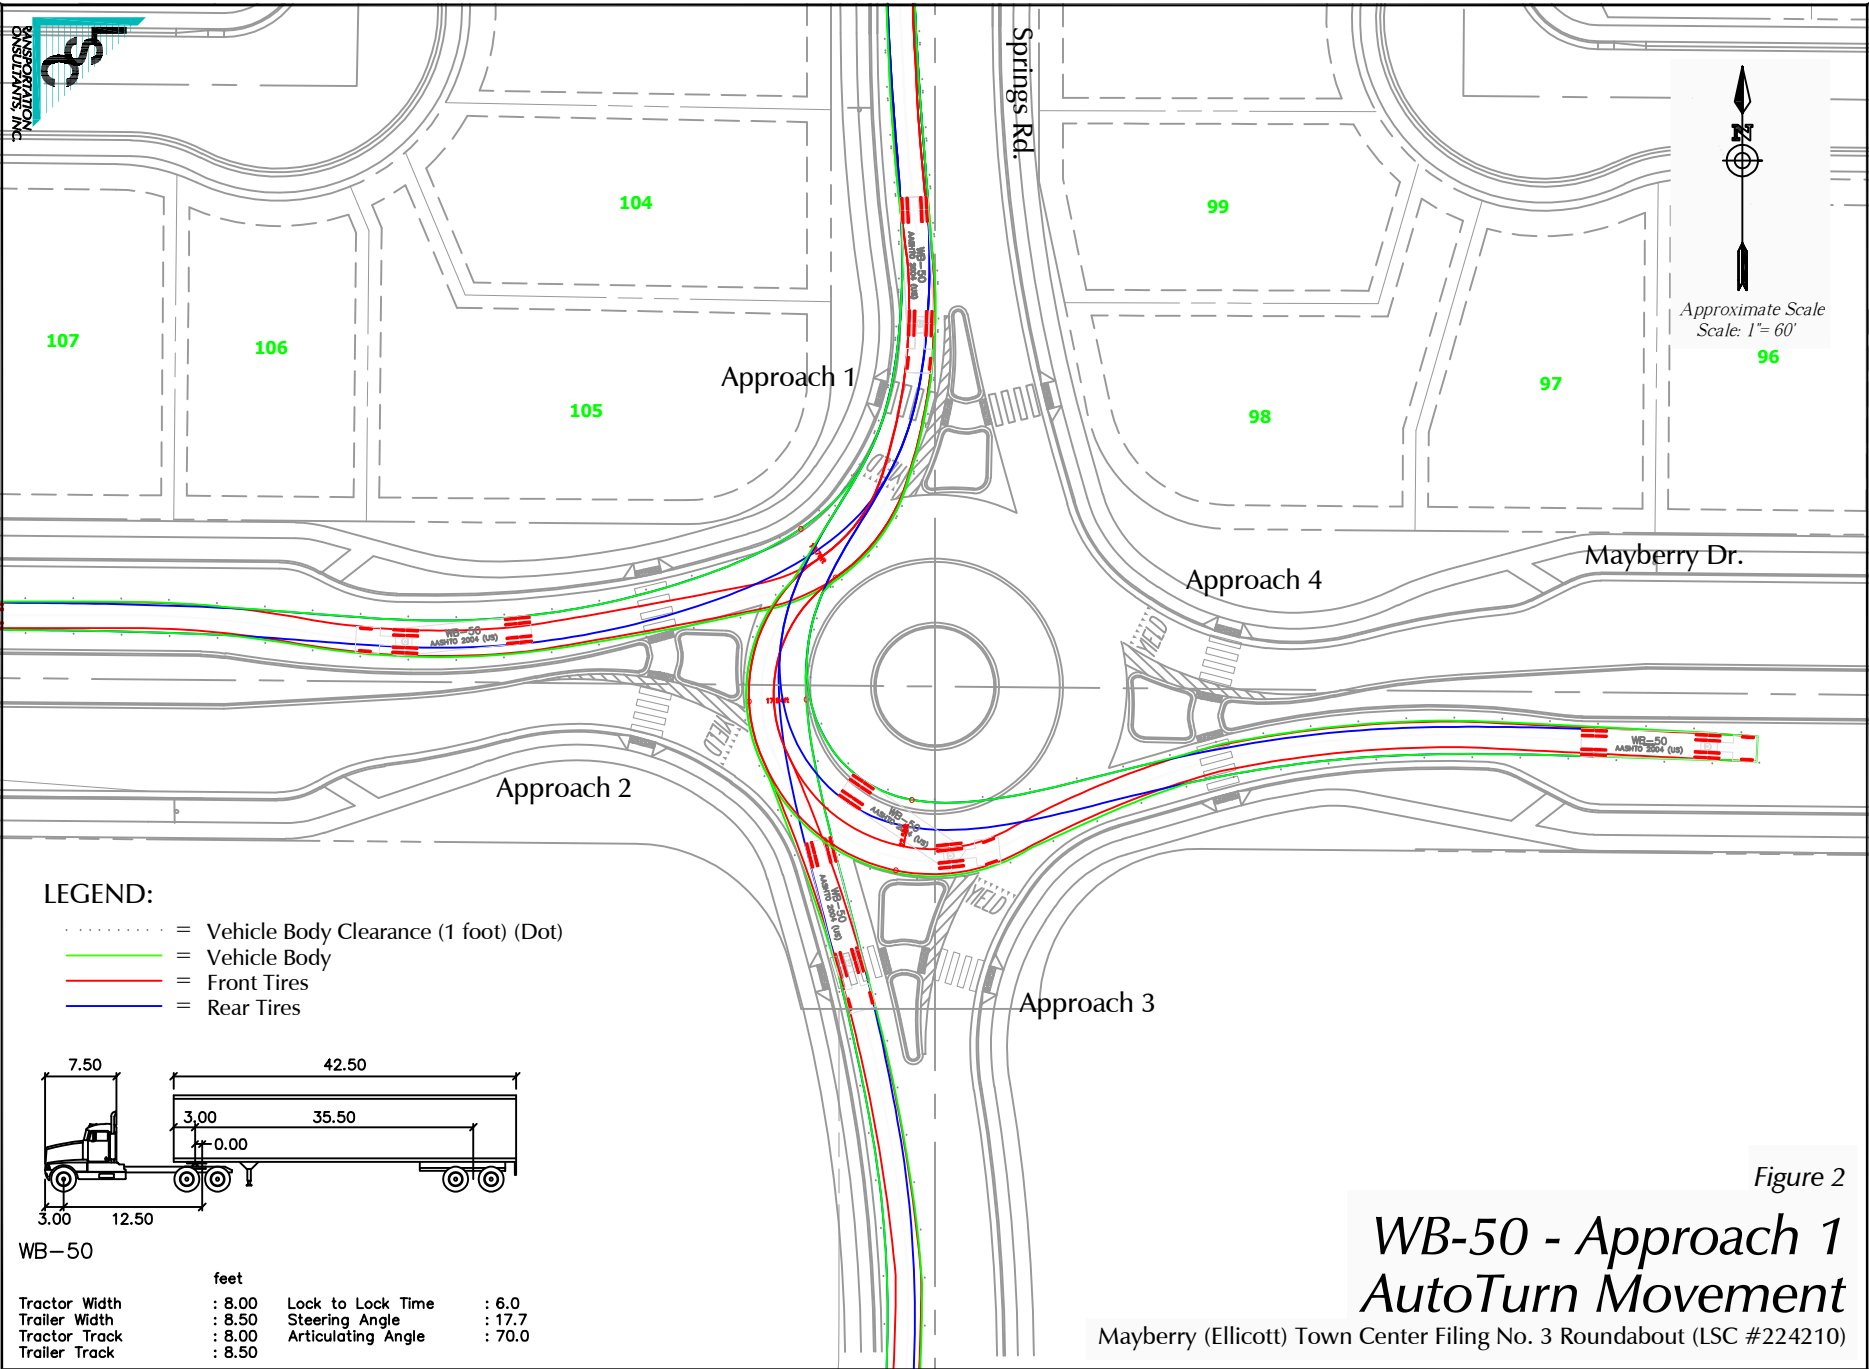

The reviewer's signature on this document indicates that the design has been reviewed and is in general compliance with good roundabout principals. The critical design elements have been addressed. The project design engineer in responsible charge of final plan development will stamp the plans when applicable.

Note: Center island and splitter islands are raised with vertical curb.

16	Eastbound Left Turn Deceleration Lane	Upcoming CDOT project <b>UPDATE: This improvement has been completed by CDOT.</b>	To be constructed by CDOT
17	Westbound Right Turn Acceleration Lane (for southbound to westbound right turning traffic)	Upcoming CDOT project <b>UPDATE: It appears that this improvement was omitted from the CDOT project.</b>	To be constructed by CDOT
18	Westbound Right Turn Deceleration Lane - 500' plus taper	Escrow Fair Share Amount toward future construction (See Item #19 below for details)	Applicant
19	Escrow fair share percentage of the cost of future westbound right turn and left turn deceleration lanes; estimated cost: \$125,000 (allocated \$75,000 to left and \$50,000 to right). Please refer to separate Escrow Tables 8 and 9** for details.	- Filing 1 amount can be deferred and paid with Filing 2. - Filing 2, 3, and 4 Escrows due with corresponding access permits (Notice-to-proceed stage). Please refer to separate Escrow Tables 8 and 9** for details. <b>UPDATE: The left-turn lanes have been completed by CDOT.</b>	Applicant
20	Escrow fair share percentage of the cost of a future traffic signal; current signal cost are about \$500,000. Please refer to separate Escrow Table 7** for details.	- Filing 1 amount can be deferred and paid with Filing 2. - Filing 2, 3 and 4 Escrows due with corresponding access permits (Notice-to-proceed stage). Please refer to separate Escrow Table 7** for details.	Applicant
<b>CDOT - Ellicott Highway/SH 94 Intersection Improvements</b>			
21	Eastbound Right Turn Deceleration Lane and Taper	Fair Share Escrow Amount (deferred) toward future construction (See Item #22 below for details)	Applicant
22	Escrow fair share percentage of the cost of a 273-ft eastbound right turn lane. Please refer to separate Escrow Table 11** for details.	- Filing 1, Filing 2 and Filing 2A amounts can be deferred and paid with either - Filing 3 (or potentially Filing 4) or future filings beyond Filing 4. This would be determined with the Filing 3 (or potentially Filing 4) access permit application process. - Filing 4: Determination of the requirement to escrow or allow further deferral would be made with the Filing 3 (or potentially Filing 4) access permit application. Please refer to separate Escrow Table 11** for details. ***	Applicant
23	Escrow fair share percentage of the cost of a future traffic signal; current signal cost are about \$500,000. Please refer to separate escrow Table 10 for details)	- Filing 1, Filing 2 and Filing 3 (or potentially Filing 4) amounts can be deferred and paid with either Filing 3 (or potentially Filing 4) or future filings beyond Filing 4. This would be determined with the Filing 3 (or potentially Filing 4) access permit application process. - Filing 3: Determination of the requirement to escrow or allow further deferral would be made with the Filing 3 (or potentially Filing 4) access permit application. Please refer to separate Escrow Table 10 for details.***	Applicant
<b>CDOT - Future ROW Preservation for SH 94</b>			
24	Per CDOT: It is requested that 80-foot pavement section with 4-foot shoulders on EB/WB travel lanes along the property frontage to Hwy 94 be preserved for future highway expansion in accordance with the El Paso County 2060 Corridor Preservation Plan.	With Each Plat	Applicant
*Prior CDOT comments from 2006 indicate that the left-turn deceleration lane should be designed to accommodate future year left-turn volume. However, the applicant would prefer to phase the lane length with development phasing.			
** These tables are contained in the June 2020 TIS Report for the Ellicott Town Center Rezone (Note: The access permits for Filings 1 and 2 were prepared and issued after the original tables in the June 2020 TIS report).			
*** This was from the original table in the June 2020 TIS for the commercial rezone. Filing 3 is now out in front of Filing 4 and a site specific development plan for Filing 4 is not being submitted at this time.
