Subject: Widefield Water and Sanitation District Drinking Water Mitigation System, Infrastructure Impact Report

Dear Ms. Ruiz,

AECOM was retained by the United States Army Corp of Engineers to perform the design and construction of the Drinking Water Mitigation System for the Widefield Water and Sanitation District, Colorado Springs, Colorado. Please see Project Summary and Construction Drawings for additional project details. The following is the Infrastructure Impact Report for construction.

Local Infrastructure Impact Report

Project impacts will include the installation of a waterline which may impact existing utilities that may cause inconveniences to the customers and surrounding residences. In addition, traffic control will be used during construction, and will disturb localized traffic patterns. Construction work will be completed to minimize potential public service or traffic interruptions. The Construction Contractor will submit a traffic control plan prior to work that will require traffic controls.

Sincerely,

Bill Wemmert, PE

Please provide
information that
outlines the potential
impacts to roadways,
water, fire, police, etc.
