Please accept the following comments from El Paso County Public Health for the project referenced above:

- The property has an existing onsite wastewater treatment system (OWTS) that was permitted and installed for a 4-bedroom house in 2008. The soil treatment area (STA) for the existing house is located off the SE end of the house and must be located and protected from compaction associated with contractors' equipment yard.
- If an OWTS is planned for employee use, then a New OWTS Permit is required.
- No other public health issues noted with the proposed business.
