Wireless Facility Site Address: 7545 Sunny View was also known as 7100 Goldfield Drive Fountain, CO
Re: Eligible Facility Request to Modify Existing Cell Site

Parcel: 5520119002

I wanted to thank you for working with me on this submittal for a modification to a cell site located in Fountain. On behalf of T-Mobile, I am submitting an application with the El Paso County to swap four (4) antennas and keep the antenna count at seven (7). T-Mobile will be adding RRU's (remote radio units) at the antennas with no new mounts (or Hardware). All the cabinets and radio work will be within our lease area inside the existing fence area the T-Mobile equipment is housed on the ground. The site is not landscaped and there are no plans on landscaping.

T-Mobile is proposing to add new technology to the existing cell site on the water tank. This is a response to unprecedented customer demand for dependable wireless communication services. To meet this demand, T-Mobile is constantly improving its coverage areas and expanding its network capacity to handle the growing number of customer calls and data transmissions.

These upgrades will increase the operating efficiency of the site while reducing the carbon footprint allowing T-Mobile to improve wireless coverage. The net results are better service for residents, business and visitors in your local area and a greener cell site.

In addition to convenience and enjoyment, wireless communications play an important role in personal and public safety: last year (2019) over 240 million calls to E911 were made each year on wireless phones. In fact, over half of all emergency calls each year are made on cell phones.

Please contact myself for any information you should need 303.601.7241 or via e-mail Annie.Mackiewicz@T-Mobile.com.
