Subject: Utility Trench Backfill, Curb and Gutter Sub-grade, CTS Preparation
and Placement Testing.
Within the Public Streets Rights of Ways of:

Hannah Ridge at Feathergrass Filing No.4
El Paso County, Colorado
Job No. 180563

Dear Mr. LaForce:

Representatives of Entech Engineering, Inc. periodically visited the site and performed field density testing during the subject construction processes. Testing was performed in general compliance with the frequency indicated in the El Paso County Standard Specifications. Results of field density tests have previously been provided. Field density tests were taken by Entech Engineering, Inc. personnel with test results presented in reports dated May 25, 2018 through January 24, 2019. Results generally indicate densities which meet those specified in the El Paso County Standard Specifications.

Representatives of Entech Engineering, Inc. also periodically observed the curb and gutter subgrade, the CTS preparation processes, and the asphalt placement for the street improvements. These materials appeared to be in general compliance with the specifications presented in the El Paso County Standard Specifications and appeared to be consistent with the materials assumed in the pavement design for the project.

If you have further questions regarding this letter, or the construction from a geotechnical point of view, please call.

Respectfully Submitted,

ENTECH ENGINEERING, INC.

Daniel P. Stegman
