Site Location, Size, Zoning:

How many lots and tracts? How many acres in

The applicant, behalf of the Developer/Owner, is respectfully submitting a final plat application for Skyline at Lorson Ranch Filing 1 to implement the approved recorded Skyline at Lorson Ranch PUD and preliminary plan. The 15.764 acre final plat area is located within the north-central portion of Lorson Ranch east of the East Tributary of Jimmy Camp Creek. Skyline at Lorson Ranch Final Plat implements an approved component of the phased Lorson Ranch Development. Skyline at Lorson Ranch is currently zoned PUD per (PCD File No. PUDSP-21-002) which has been approved by the Planning Commission and BOCC and recorded xxxxxx/2021 under Reception No. xxxxxx.

The parcels included in the final plat are currently vacant with no structures except a small water pumpstation. As part of previous developments within Lorson Ranch, a detention pond was previously graded and underground utilities were completed to include storm sewer, sanitary sewer and water main extensions to the site. The existing detention facility located offsite to the east and shall remain and will continue to be owned and maintained by the Lorson Ranch Metropolitan District. Widefield Water and Sanitation District owns the sewer/water utilities. There also an existing 325' electric transmission line easement that shall remain. The proposed development will not interfere with this easement and will meet all necessary requirements.

Request & Justification:

The purpose of this application is to request approval of a final plat for Skyline at Lorson Ranch Filing 1 project located within Lorson Ranch. The PUD Development and Preliminary Plan identified the detailed design of the single-family detached residential lots as well the development standards for the proposed uses, the lot sizes, transportation systems, public rights-of-way, and easements necessary for the development. Pre-development site grading was requested with the PUD/preliminary plan approvals to permit grading operations to begin after approval of the PUD/ Preliminary Plan and prior to Final Plat. The approved and recorded final plat will create 85 new single-family lots and 8 tracts on 15.764 acres at a density of 5.39 DU/ Acre. The site layout predominately includes a minimum lot size of 35' x 85' (3,825 SF) with several areas containing larger lot sizes particularly along open space, cul-de-sacs, and along roadway knuckles. Corner lots were designed with additional lot width to accommodate both the increased corner lot setback requirements.

And a tract for a utility pump station/maintenance building. A site development plan will be submitted for the pump station by the Widefield Water Sanitation District.

The site is bordered by vacant land in Lorson Ranch to the east and southeast, Lorson Ranch East Filing No. 3 to the west, and vacant land owned by Eagle Development Company to the north.

Fontaine Boulevard, Lorson Boulevard, Grayling Drive, and Lamprey Drive have been constructed which will provide access to this site. A traffic impact analysis was completed and is included with this submittal.

The community is designed to provide for functioning automobile and pedestrian connectivity while also taking advantage of surrounding land uses, particularly the open space areas along the electric easement. Within Skyline at Lorson Ranch development, open space and community connections are planned providing easy access to open space along the electric easement as well secondary, internal sidewalk connections to interior parks. The final plat will create 3.75 acres of open space which is 23% of the total site acreage where only 10% of open space is required within the PUD zoning district. see chart below

The project will be completed in one phase with roadways, utilities, drainage, and necessary improvements to be constructed in the most optimal and efficient manner.

As with previous Lorson Ranch developments, Skyline at Lorson Ranch will be developed and advanced per the Sixth Amended Development Agreement Lorson Ranch. The 6th Amended Development agreement outlines updated access, road impact fees, and future road ROW issues with previous agreements remaining in effect.

No Policy Plan or small area plan is applicable for applications submitted after May 27, 2021; address the New Your EPC Master Plan, Water Master Plan, Parks plan

El Paso County Final Plat Approval Criteria, 1998 El Paso County Policy Plan,:

Skyline at Lorson Ranch Filing 1 Final Plat, supporting documents, and reports are in conformance with the review and approval criteria for final plats. Findings of conformity with the Master Plan as well as findings of sufficient water quality, quantity, and dependability were made with the PUD/preliminary plan approvals. However, the following policies from the El Paso County Policy Plan have been provided with a summary analysis of each for reference:

Policy 6.1.3 Encourage new development which is contiguous and compatible with previously developed areas in terms of factors such as density, land use and access.

Skyline at Lorson Ranch Filing 1 conforms to the approved sketch plan and Skyline at Lorson Ranch PUD / Preliminary Plan. Skyline at Lorson Ranch Final Plat is compatible with both the existing and allowed land uses found within Lorson Ranch. The submittal continues and maintains the single family detached residential housing development already found throughout Lorson Ranch which includes the recently approved Lorson Ranch East project located to the east. The new development will be in and continue the harmony of the existing surrounding character of the site and natural environment as the area has seen a significant change in character.

Policy 6.1.6 Direct development toward areas where the necessary urban-level supporting facilities and services are available or will be developed concurrently.

The plat is within the overall Lorson Ranch development for which utility and infrastructure improvements have been provided to meet existing and planned development needs. Additional extensions of these facilities will be provided with the development of this final plat area. The proposed density and lot sizes are similar and compatible to existing residential development within Lorson Ranch. The proposed facilities and public services can support the proposed housing units as these services were designed, planned, and constructed to accommodate proposed densities.

Policy 6.1.8 Encourage incorporating buffers or transitions between areas of varying use or density where possible.

Buffers are provided per the PUD/Preliminary Plan as well as additional areas of open space and transitions to the east within the electric transmission lines which create a natural amenity and buffer between Lorson Ranch neighborhoods.

Policy 6.0.11 Continue to limit urban level development to those areas served by centralized utilities.

The subject property is located within Region 7, Fountain Area, which is expected to have the largest growth demand in the County by 2060. Specifically, the Plan states: "Areas projected to develop by 2040 are located south of Fountain (City) on the north and south sides of Link Road. Areas northwest of Fountain along the east and west sides of Marksheffel Road are also expected to grow by then, as well as the area south of Fountain on the west side of I-25."

The proposed development is located east of Marksheffel Road, which is a developing area as identified in the Water Master Plan. The Widefield Water and Sanitation District has provided a water and wastewater commitment letter to serve the development. The District has recently upgraded their water infrastructure by replacing water lines in the area to increase efficiency for deliverable water to the 374-acre Pikes Peak National Cemetery to the north, the overall Lorson Ranch Development, and to the Peaceful Valley located south of Lorson Ranch. The water resource report indicates the District has ample supply of water to serve this development and future developments within the District. The report also identified that the District has a renewable water supply. This geographical area within the District's service area has not experienced groundwater contamination like other locations within the service area. See the Water section of the water resource report for a summary of the water findings and recommendations for the proposed development in regard to water quantity, dependability, and quality.

School District:

fees will be paid in the amount of at plat recording

Lorson Ranch is within the Widefield School District #3 and is subject to the provisions of the amended School Site Dedication Agreement recorded at Reception No. 21202170.

Total Number of Residential Units, Density, and Lot Sizes: 85 Single-Family Detached Residential Units for a density of 5.39 DU/ Acre. The site layout includes minimum lot sizes of 35' x 85' (3,825 SF). Corner lots were designed with additional lot width to accommodate both the increased corner lot setback requirements and potential three-car garage housing types.

Total Number of Industrial or Commercial Sites:

There are no industrial or commercial sites proposed with this project.

one for a utility building and use

Phasing Plan and Schedule of Development:

This project will be developed in one phase with the overall grading and utilities for the entire development occurring in one phase as well.

There are existing easements including the electric transmission easements that shall remain. Any existing watermain/sanitary sewer easements located with ROW and buildable portions of lots will be vacated by separate instrument prior to recording the plat as necessary and new easements will be dedicated as appropriate.

is the utility building to be constructed when? No sit dev plan has been set up or submitted

Approximate Acres and Percent of Land Set Aside for Open Space:

3.75 acres of open open space which is 23% of the total site acreage where only 10% of open space is required within the PUD zoning district.

SITE DATA TABLE:

TOTAL SITE ACREAGE	15.764 AC
PROPOSED SINGLE-FAMILY DWELLING UNITS	85 D.U.
PROPOSED GHRS DENSITY	5.39 D.U./AC

SITE DATA TABLE:

TYPE OF USE	# ACRES PROVIDED	% OF PROPERTY
SINGLE FAMILY RESIDENTIAL (85 LOTS)	7.819 AC	49.6%
OPEN SPACE / LANDSCAPE / PARK	1.084 AC	6.9%
WWSO FUTURE PUMPSTATION TRACT	0.707 AC	4.5%
POWERLINE EASEMENT (OPEN SPACE)	2.569 AC	16.2%
PUBLIC STREETS RIGHTS-OF-WAY	3.585 AC	22.7%
TOTAL	15.764 AC	100.0%

NOTE: TOTAL OPEN SPACE REQUIRED IS 10% OF TOTAL ACREAGE, 15.764 AC X .10 = 1.576 ACRES
TOTAL OPEN SPACE PROVIDED IS 23.2% = 3.663 ACRES

The PUD and Preliminary Plan were approved with 3.75 acres of open space which is 23% of the total site acreage. The final plat will implement the creation of these open space tracts in conformance with the approved PUD/preliminary plan. Much of the proposed open space will be contiguous open space under the electric transmission line easement in the westerly areas of the development. Per the EPCLDC PUD requirements, the minimum amount of required open space is 10% of the project or 1.57 acres. Of this, 20% or 0.31 acres must be contiguous and usable. This site contains 3.10 acres (82%) in useable form which includes one urban park located in Tract F and walking trails under the electric line in Tracts G & H. Construction of the park will apply as credits against the urban park fees. The open space will also include walking trails located in Tracts G & H. The Lorson Ranch Metropolitan District will own and maintain the open space and parks. The final plat will create ample open space acreage of which nearly all is contiguous. The total open space is part of the cumulative open space of the overall Lorson Ranch development in accordance with the Lorson Ranch Sketch Plan Minor Amendment and the Lorson Ranch Overall PUD Development and Phasing Plan, as amended.

Traffic Engineering:

Skyline at Lorson Ranch Filing No. 1 will gain public access from Fontaine Boulevard, Lamprey Drive, Grayling Drive, Walleye Drive, and Lorson Blvd. constructed as part of the Lorson Ranch East and The Hills at Lorson Ranch developments. Both Fontaine and Lorson Boulevard connect to Marksheffel Road and both cross the Jimmy Camp Creek main channel and the east tributary. Lorson Blvd., Grayling Drive, and Lamprey Drive are residential collector streets and Fontaine Blvd. is an arterial street within Lorson Ranch constructed as part of Lorson Ranch East Filing No. 1. There will be no direct lot access to any arterial or collector roadways with the exception of Tract D which is a water pumpstation. There are no traffic related deviations being requested at this time.

Park Lands Agreement was approved on XXXX recorded at XXX

Proposed Services:

1. Water/ Wastewater: Widefield Water and Sanitation District
2. Gas: Black Hills Energy
3. Electric: Mountain View Electric
4. Fire: Security Fire Protection District
5. School: Widefield District #3
6. Roads: El Paso County Road and Bridge
7. Police Protection: El Paso County Sheriff's Department

Application is entering the PID no 2 reception no.____FYI
Pump station/maintenance bldg is subject to fees at building permit

Floodplain: There are no portions of this property located within a designated FEMA floodplain as determined by the flood insurance rate map, community map number '08041C0976G', effective date 'December 7, 2018'.

The Jimmy Camp Creek East Tributary has been reconstructed and is owned and maintained by the Lorson Ranch Metropolitan District No. 1.

- ❑ **EXISTING AND PROPOSED FACILITIES, STRUCTURES, ROADS, ETC:** Existing facilities consist of existing sanitary sewer, storm sewer, and watermain in Fontaine Boulevard, Lorson Boulevard, Grayling Drive, and Lamprey Drive. Proposed facilities consist of local residential roads, extensions of Fontaine Boulevard, Lorson Boulevard, and collector roads approved with CDR20-007, watermain, sanitary sewer, storm sewer, electric, gas, telecommunications. The existing detention/WQ pond (Pond C4) will serve this site. The East Tributary of Jimmy Camp Creek is located west of this plat and has been stabilized within Lorson Ranch. All proposed facilities will be in accordance with El Paso County design standards which includes previously approved modifications. Existing utility easements encroaching into proposed ROW dedication will be required to vacate those encroached portions of the easement prior to recordation of the plat.

this old checklist format has been revised. see emailed list that the LOI list include

- ❑ **WAIVER REQUESTS (IF APPLICABLE) AND JUSTIFICATION:** No waivers requested
- ❑ **NUMBER OF INDUSTRIAL OR COMMERCIAL SITES PROPOSED:** None.
- ❑ **APPROXIMATE FLOOR AREA OF INDUSTRIAL AND/OR COMMERCIAL USES:** None.
- ❑ **NUMBER OF MOBILE HOME UNITS AND DENSITIES:** None.
- ❑ **TYPE OF PROPOSED RECREATIONAL FACILITIES:** Public sidewalks for general pedestrian circulation and access to open spaces and trails will be constructed along all interior roads. All open space tracts will be maintained by the Lorson Ranch Metropolitan District 1.
- ❑ **IF PHASED CONSTRUCTION IS PROPOSED, HOW WILL IT BE PHASED?** This plat will be for the entire project
- ❑ **HOW WATER AND SEWER WILL BE PROVIDED?** Water and sanitation will be provided through the Widefield Water & Sanitation District. A passive underdrain system is proposed and will be owned/maintained by the Lorson Ranch Metro District. Any existing water/sewer easements with public road ROW being platted on top of them will be vacated or made subordinate to the ROW prior to county acceptance of the roads.
- ❑ **PROPOSED USES, RELATIONSHIP BETWEEN USES AND DENSITIES:** The proposed use is Residential Single Family with associated accessory and appurtenant uses.
- ❑ **TRAFFIC IMPACT FEE:** This final plat will be included in the El Paso County PID No. 2 and will pay the associated fee at the time of building permits for each residential lot in the final plat.
- ❑ **MAILBOX LOCATION:** Skyline at Lorson Ranch Filing No. 1 will utilize centralized location (cluster) for mailboxes which is shown on the construction drawings and final plat. The mailbox clusters will be located within the street ROW and easements.
- ❑ **SCHOOL SITE DEDICATION:** Dedication of a school site was completed as part of the Pioneer Landing at Lorson Ranch Filing No. 2 Final Plat which satisfied the school dedication requirement for final plats within Lorson Ranch and in accordance with the recorded Lorson Ranch School Land Bank Agreement. The school is constructed and is operational. Lorson Ranch East Filing No. 1 plat adjusted the previously platted school site to accommodate school site plan changes and ROW requirements for the roundabout at Fontaine/Lamprey. The modified school site is a 25.11-acre site (Tract J) located East of the East Tributary of Jimmy Camp Creek.

Irrelevant fees are due

Final Plat Review Criteria:

1. *The subdivision is in conformance with the goals, objectives, and policies of the Master Plan; Per the Highway 94 Comprehensive Plan Map 8.1, the northern most portion of Skyline at Lorson Ranch is within Sub-Area 4 of the 2003 Highway 94 Comprehensive Plan. This area of the project is located north of Fontaine Blvd. Sub-Area 4 is characterized as the Colorado Centre and calls for higher intensity land uses that will blend with the existing Colorado Springs character. The approved PUDSP highlighted in more detail consistency with existing Master Plan and Comp Plan policies.*
2. *The subdivision is in substantial conformance with the approved preliminary plan; The subdivision is in substantial conformance with the approved PUDSP including lot size,*

density and public improvements.

3. *The subdivision is consistent with the subdivision design standards and regulations and meets all planning, engineering, and surveying requirements of the County for maps, data, surveys, analyses, studies, reports, plans, designs, documents, and other supporting materials;* The subdivision is in substantial conformance with the approved PUDSP including lot size, density and public improvements. The Lorson Ranch Minor Sketch Plan Amendment approved April 21, 2016 (SKP-15-001) illustrates the proposed PUDSP area as RLM (Residential Low/ Medium) with a permitted density of 4-6 DU/ Acre. The approved PUDSP remained consistent with the approved Sketch Plan Amendment by maintaining the approved residential zoning designation and approved densities of 85 new single family lots on 15.764 acres for a density of 5.39 DU/ Acre.
4. *Either a sufficient water supply has been acquired in terms of quantity, quality, and dependability for the type of subdivision proposed, as determined in accordance with the standards set forth in the water supply standards [C.R.S. § 30-28-133(6)(a)] and the requirements of Chapter 8 of this Code, or, with respect to applications for administrative final plat approval, such finding was previously made by the BoCC at the time of preliminary plan approval;* Skyline at Lorson Ranch is located within the Widefield Water and Sanitation District's (WWSD) boundaries and will rely upon municipal services for water supply. These municipal services have been provided in previous Lorson Ranch filings and will be extended to this proposed development. There are no proposed wells or individual septic systems within Skyline at Lorson Ranch. The WWSD has provided letters of intent to serve commitment letters for Skyline at Lorson Ranch. The district has also provided the water quality report as required by El Paso County. Sufficiency of water finding was provided with approval of the PUDSP permitting administrative review of this final plat.
5. *A public sewage disposal system has been established and, if other methods of sewage disposal are proposed, the system complies with State and local laws and regulations, [C.R.S. § 30-28-133(6)(b)] and the requirements of Chapter 8 of this Code;* A public wastewater system will be provided for by the Widefield Water and Sanitation District. District provided commitment letters have been provided as part of the approved PUDSP indicating capacity to provide wastewater disposal services for this development.
6. *All areas of the proposed subdivision which may involve soil or topographical conditions presenting hazards or requiring special precautions have been identified and that the proposed subdivision is compatible with such conditions [C.R.S. § 30-28-133(6)(c)];* A Geology and Soils Report was prepared by RMG-Rocky Mountain Group and is included with the submittal package. As part of this report, exploratory test borings were completed. There are no significant geological hazards found to be present on the site including the lack of ground water which was not encountered on site. Geologic constraints found to be present include expansive soils and bedrock; hydrocompactive soils; faults; seismicity; radon; erosion; steep slopes; and fill soils. These geologic and engineering conditions are relatively common to the area, and, can be satisfactorily mitigated through proper engineering design, and construction practices. Bedrock was also encountered in the majority of test borings performed and is anticipated to be encountered in the building excavations or utility trenches for this development. It may be necessary to design and implement mitigation alternatives on a lot by lot basis. Refer to the soils report for more detailed information.
7. *Adequate drainage improvements are proposed that comply with State Statute [C.R.S. § 30-28-133(3)(c)(VIII)] and the requirements of this Code and the ECM;* Adequate drainage improvements; complying with State law, this Code and the ECM are proposed and illustrated on the drawings. A Final Drainage Report for this development was

included for review and approval by El Paso County.

8. *Legal and physical access is provided to all parcels by public rights-of-way or recorded easement, acceptable to the County in compliance with this Code and the ECM; Legal and physical access will be provided to all parcels by public rights-of-way.*
9. *Necessary services, including police and fire protection, recreation, utilities, and transportation systems, are or will be made available to serve the proposed subdivision; All necessary public services will be available to serve the proposed subdivision as this area has been master planned with anticipation of development such as this for several years.*
10. *The final plans provide evidence to show that the proposed methods for fire protection comply with Chapter 6 of this Code; The proposed subdivision complies with the fire protection standards of Chapter 6 including water supply, roads and access. A fire protection report illustrating the available fire protection measures was provided with the approved PUDSP submittal. In addition, a fire protection district commitment to serve this development has also been provided.*
11. *Off-site impacts were evaluated and related off-site improvements are roughly proportional and will mitigate the impacts of the subdivision in accordance with applicable requirements of Chapter 8; Primary access to Skyline at Lorson Ranch will be via existing Fontaine and Lorson Boulevard. All roadways are to be public owned and maintained by El Paso County. Internal streets will provide for a looped circulation pattern through the development.*
12. *Adequate public facilities or infrastructure, or cash-in-lieu, for impacts reasonably related to the proposed subdivision have been constructed or are financially guaranteed through the SIA so the impacts of the subdivision will be adequately mitigated; Public improvements will be constructed as necessary including municipal utilities, roadways, and pedestrian sidewalks. Any required SIA documents will be provided as necessary.*
13. *The subdivision meets other applicable sections of Chapter 6 and 8; The proposed subdivision meets other applicable design standards of Chapter 6 and 8 of this Code, including any proposed deviation request.*
14. *The extraction of any known commercial mining deposit shall not be impeded by this subdivision [C.R.S. §§ 34-1-302(1), et seq.] There are no known commercial mining deposits found on site.*
