

12/8/17

I am requesting a 5 foot encroachment on left side of my property as you look at the front of the house/garage which will allow me to put in a storage shed 20 feet from the property line on the left side of the property. I will not need an encroachment on any other side of the building. The reason for my request is so that I do not have to take down trees.

Regards,

*Shawn Turnbow*

LOI should address intended direction for the drainage from the roof of the proposed structure. Drainage from the proposed structure shall not adversely impact the adjacent property owner. Water from the roof of the proposed structure should run across your property or a designated drainage easement then to the public ROW.
