Post Construction Stormwater Management Applicability Evaluation Form

This form is to be used by the Engineer of Record to evaluate applicable construction activities to determine if the activities are eligible for an exclusion to permanent stormwater quality management requirements. Additionally Part III of the form is used to identify and document which allowable control measure design standard is used for the structure.

Part I. Project Information						
1. Project Name:						
2. El Paso County Project #: SF2427		3. ESQCP #:				
	Project Location: OLD STAGECOACH ROAD AND BLACK FOREST ROAD			Project Location in MS4 Permit Area (Y or N):		
5. Project Description:		•				
to the Stormwater Quality Coordinator for		<u>9 P P</u>				
Part II. Exclusion Evaluation: Determine				0		
are met. Note: Questions A thru K directly correlate t				0		
				0		
are met. Note: Questions A thru K directly correlate t mark Not Applicable in Part III, Question 2.	o the MS4 p	ermit Pa	rt I.E.4.a.i (A) thru Not	(K). If Yes, to any of the following questions, then Notes:		
are met. Note: Questions A thru K directly correlate t mark Not Applicable in Part III, Question 2. Questions A. Is this project a "Pavement Management Site" as defined in Permit	o the MS4 p	ermit Pa	rt I.E.4.a.i (A) thru Not	(K). If Yes, to any of the following questions, then Notes: This exclusion applies to "roadways" only. Areas used primarily for parking or access to parking are not		

		For redevelopment of existing roadways, only the area of the existing roadway is excluded from post-construction requirements when the site does not increase the width by two times or more. This exclusion only excludes the original roadway area it does NOT apply to entire project.
R	X	Activity can NOT permanently alter the terrain, ground cover or drainage patterns from those present prior to the activity
		Must be a single-residential lot or agricultural zoned land, <u>></u> 2.5 acres per dwelling and total lot impervious area < 10 percent.

Questions (cont'd)	Yes	No	Not	Notes
F. Do Non-Residential or Non-Commercial Infiltration Conditions exist? Post-development surface conditions do not result in concentrated stormwater flow or surface water discharge during an 80 th percentile stormwater runoff event.			Applicable	Exclusion does not apply to residential or commercial sites for buildings. A site specific study is required and must show: rainfall and soil conditions; allowable slopes; surface conditions; and ratios of imperviousness area to pervious area.
G. Is the project land disturbance to Undeveloped Land where undeveloped land remains undeveloped following the activity?				Project must be on land with no human made structures such as buildings or pavement.
H. Is the project a Stream Stabilization Site?				Standalone stream stabilization projects are excluded.
I. Is the project a bike or pedestrian trail?				Bike lanes for roadways are not included in this exclusion, but may qualify if part of larger roadway activity is excluded in A, B or C above.
J. Is the project Oil and Gas Exploration?				Activities and facilities associated with oil and gas exploration are excluded.
K. Is the project in a County Growth Area?				Note, El Paso County does not apply this exclusion. All Applicable Construction Activity in El Paso County must comply the Post-Construction Stormwater Management criteria.

Questions	Yes	No
	res	No
1. Is project an Applicable Construction Activity?		
2. Do any of the Exclusions (A-K in Part II) apply?		
If the project is an Applicable Construction Activity and no Exclusions apply t	hen Post-Construction	
(Permanent) Stormwater Management is required.		
Complete the applicable sections of Part IV below and then coordinate signat	ures for form and place	ce in
project file.		
If the project is not an Applicable Construction Activity, or Exclusion(s) apply	then Post-Construction	n

(Permanent) Stormwater Management is NOT required. Coordinate signatures for form and place in project file.

Even if your proposed BMPs are providing some TSS and Runoff Reduction, the drainage report only provides calculations for the WQCV standard with Pond B and Pond-13 with the MHFD calcs. Please only check these if these are the primary source of treatment and are supported with detailed calculations.

Part IV: Onsite PWQ Requirements, Documentation and Considerations			No		
1.	Check which Design Standard(s) the project will utilize. Standards align with Control Measure Requirements identified in permit Part I.E.4.a.iv.				
•					
	Water Quality Capture Volume (WQCV) Standard				
Β.	Pollutant Removal/80% Total Suspended Solids Removal (TSS)		X		
С.	Runoff Reduction Standard		X		
D.	D. Applicable Development Site Draining to a Regional WQCV Control Measure				
Ε.	Applicable Development Site Draining to a Regional WQCV Facility				
F.	Constrained Redevelopment Sites Standard				
G.	Previous Permit Term Standard				
2.					
	another MS4? The entire project area is within the County's MS4 permit, this should not	ot be selecte	d. 🗸		
	If Yes, you must obtain a structure specific maintenance agreement with the other		_ ^		
	MS4 prior to advertisement.				
3.	Will any of the project permanent stormwater control measures be maintained by a				
	private entity or quasi-governmental agency (e.g. HOA or Special District,				
	respectively)?				
	If Yes, a Private Detention Basin/Stormwater Quality Best Management Practice				
	Maintenance Agreement and Easement must be recorded with the El Paso County				
	Clerk and Recorder.				

Part V Notes (attach an additional sheet if you need more space)

will be constructed

Provide EDARP Project number for the designs of both Pond B and the modification to the existing Irrigation Reservoir.

Also discuss PBMP exclusions used.

Project design is complete to include the project Support the plans, drainage report, ments ar squired. The engineering, drainage specifications, and maintenance and acces Face considerations and information used to complete e sociarients is complete, true, and accurate to the best of my belief and knowledge.

One or the other should be checked. A Regional WQCV Control Measure means there is no conveyance from the project site to the regional control measure via Waters of the State. A Regional WQCV Facility is a facility where there is conveyance from the project site to the control measure occurs but the 8 conditions in the MS4 permit must be met. Verify which is applicable to the project and update.
