Subject: Utility Trench Backfill - Roadway/Curb/Gutter/Sidewalk Subgrade Preparation,  
and Base Course and Asphalt Placement  
Within the Public Streets Rights of Ways of:

Trails at Aspen Ridge Filing No. 2  
El Paso County, Colorado  
Job No. 200979

Dear Mr. LaForce:

Representatives of Entech Engineering, Inc. periodically visited the site and performed field density testing during the subject construction processes. Testing was performed in general compliance with the frequency indicated in the El Paso County Standard Specifications. Results of field density tests have previously been provided. Field density tests were taken by Entech Engineering, Inc. personnel with test results presented in reports dated July 7, 2021 through October 23, 2023. Results generally indicate densities, which meet those specified in the El Paso County Standard Specifications.

Representatives of Entech Engineering, Inc. also periodically observed the roadway, curb and gutter and sidewalk subgrade and the asphalt paving processes for the street improvements. These materials appeared to be in general compliance with the specifications presented in the El Paso County Standard Specifications and appeared to be consistent with the materials assumed in the pavement design for the project.

If you have further questions regarding this letter, or the construction from a geotechnical point of view, please call.

Respectfully Submitted,

ENTECH ENGINEERING, INC.

Daniel P. Stegman
