OWNER, APPLICANT, AND ENGINEER DECLARATION

To the best of my knowledge, the information on this application and all additional or supplemental documentation is true, factual and complete. I am fully aware that any misrepresentation of any information on this application may be grounds for denial. I have familiarized myself with the rules, regulations and procedures with respect to preparing and filing this application. I also understand that an incorrect submittal will be cause to have the project removed from the agenda of the Planning Commission, Board of County Commissioners and/or Board of Adjustment or delay review until corrections are made, and that any approval of this application is based on the representations made in the application and may be revoked on any breach of representation or condition(s) of approval.

DEVIATION REQUEST (Attach diagrams, figures, and other documentation to clarify request)

A deviation from the standards of or in Section **ECM section 2.2.4 Roadway Functional Classifications** of the Engineering Criteria Manual (ECM) is requested.

Identify the specific ECM standard which a deviation is requested:

The 824 acre Curtis Road Development Traffic Impact Analysis indicates Judge Orr Road is classified as a "4 Lane Minor Arterial" in the El Paso County 2040 Major Transportation Corridors Plan. The ECM currently has no standard cross section for a 4 lane minor arterial. It is assumed that a 4 lane minor arterial (rural) cross section would add a 12 ft travel lane in each direction to Figure 2-5 Typical Rural Minor Arterial Cross Section (two lane). See Exhibit A

State the reason for the requested deviation:

The reason for the requested deviation for the 4-lane minor arterial cross section is that additional ROW would need to be obtained in order to build the full street section. At this time, Saddlehorn Ranch is dedicating an additional 40' of ROW to facilitate this in the future, however; no additional ROW is being obtained on the north side of Judge Orr Road. Therefore, we propose to leave Judge Orr Road in its existing condition.

Explain the proposed alternative and compare to the ECM standards (May provide applicable regional or national standards used as basis):

The proposed alternative is to leave Judge Orr in its existing condition (12' paved travel lanes with 4' gravel shoulder), compared to the ECM standard for a 4-lane minor arterial. See Exhibit A for available ECM cross sections and See Exhibit B for the existing Judge Orr Road cross section.

LIMITS OF CONSIDERATION

(At least one of the conditions listed below must be met for this deviation request to be considered.)

- ☐ The ECM standard is inapplicable to the particular situation.
- ☒ Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- ☐ A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

Provide justification:

ROW must be obtained on the north side of the road in order to construct a 4-lane minor arterial. Existing ROW is not adequate.

CRITERIA FOR APPROVAL

Per ECM section 5.8.7 the request for a deviation may be considered if the request is **not based exclusively on financial considerations**. The deviation must not be detrimental to public safety or surrounding property. The applicant must include supporting information demonstrating compliance with **all of the following criteria**:

The deviation will achieve the intended result with a comparable or superior design and quality of improvement.

This request is not based on financial considerations. There is not enough ROW to accommodate a 4-lane minor arterial street section. Per Table 10 of the Traffic Impact Study, Judge Orr is MTCP Project No. C15 and applicant will pay into the Fee program traffic impact fees to participate in funding the project. See Exhibit C

The deviation will not adversely affect safety or operations.

The deviation will not adversely affect safety or operations as Judge Orr Road is an existing, operable roadway

The deviation will not adversely affect maintenance and its associated cost.

Maintenance of the roadways will not be impacted as the existing roadway will be left in its existing condition.

The deviation will not adversely affect aesthetic appearance.

The deviation has no bearing on the aesthetic appearance.

The deviation meets the design intent and purpose of the ECM standards.

Yes, the deviation meets the design intent and purpose of the ECM standards. Once ROW can be obtained, the road can be built out to the full 4-lane minor arterial street section.

The deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit, as applicable.

Yes, the deviation meets the control measure requirements of Part I.E.3 and Part I.E.4 of the County's MS4 permit.

1.1. PURPOSE

The purpose of this resource is to provide a form for documenting the findings and decision by the ECM Administrator concerning a deviation request. The form is used to document the review and decision concerning a requested deviation. The request and decision concerning each deviation from a specific section of the ECM shall be recorded on a separate form.

1.2. BACKGROUND

A deviation is a critical aspect of the review process and needs to be documented to ensure that the deviations granted are applied to a specific development application in conformance with the criteria for approval and that the action is documented as such requests can point to potential needed revisions to the ECM.

1.3. APPLICABLE STATUTES AND REGULATIONS

Section 5.8 of the ECM establishes a mechanism whereby an engineering design standard can be modified when if strictly adhered to, would cause unnecessary hardship or unsafe design because of topographical or other conditions particular to the site, and that a departure may be made without destroying the intent of such provision.

1.4. APPLICABILITY

All provisions of the ECM are subject to deviation by the ECM Administrator provided that one of the following conditions is met:

- The ECM standard is inapplicable to a particular situation.
- Topography, right-of-way, or other geographical conditions or impediments impose an undue hardship on the applicant, and an equivalent alternative that can accomplish the same design objective is available and does not compromise public safety or accessibility.
- A change to a standard is required to address a specific design or construction problem, and if not modified, the standard will impose an undue hardship on the applicant with little or no material benefit to the public.

1.5. TECHNICAL GUIDANCE

The review shall ensure all criteria for approval are adequately considered and that justification for the deviation is properly documented.

1.6. LIMITS OF APPROVAL

Whether a request for deviation is approved as proposed or with conditions, the approval is for project-specific use and shall not constitute a precedent or general deviation from these Standards.

1.7. REVIEW FEES

A Deviation Review Fee shall be paid in full at the time of submission of a request for deviation. The fee for Deviation Review shall be as determined by resolution of the BoCC.

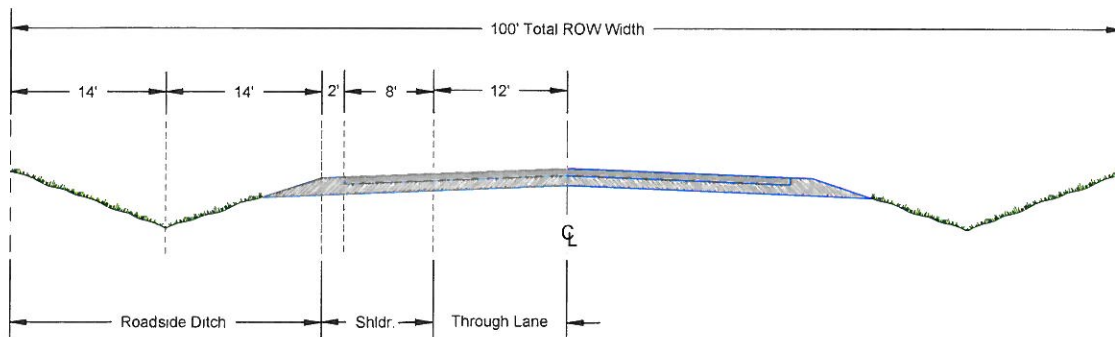

Figure 2-4. Typical Rural Principal Arterial Partial Cross-Section (4 Lane)

3. Minor Arterial

Minor arterials serve high-speed and high-volume traffic over medium distances, or are anticipated to serve this kind of traffic within a twenty-year period. Access is restricted through prescribed distances between intersections, use of medians, and no full movement parcel access (See Figure 2-5). Minor arterial status is assigned to rural roadways where the probability of significant travel demand in the future is high. Rights-of-way, easements, setbacks, and access limitations shall be pursued through the land development process on properties adjacent to minor arterials.

Figure 2-5. Typical Rural Minor Arterial Partial Cross Section

4. Major Collector

Major collectors serve as links between local access and arterial facilities over medium-to-long distances. Major collectors are managed to

Table 2-3. Roadway Design Criteria Continued

Criteria	Concern	Guideline
Minimize Space Devoted to Road Use	It is desirable to minimize local road mileage, thereby reducing construction and maintenance costs, as well as permitting the most efficient use of land. Roads should also have an appearance commensurate with their function.	Roads should be designed to complement local character.
Relate Road to Topography	Local roads are more attractive and economical if constructed to closely adhere to topography (minimize cut and fill).	The important role that roads play in the overall storm drainage system can be enhanced by closely following existing topography.
Layout Road to Achieve Optimum Subdivision of Land	The arrangement of roads should allow for economical and practical patterns, shapes, and sizes of adjacent lots. Roads as a function of land use must not unduly hinder the development of land.	Distances between roads, number of roads, and related elements all have a bearing on efficient subdivision of an area. Access to adjoining properties should also be encouraged.

2.3.2 Design Standards by Functional Classification

Section 2.2.4 of these standards identifies the Roadway Functional Classifications recognized and used by the County. Table 2-4 through Table 2-7 summarize many of the minimum roadway design standards by category and functional classification. Detailed road Standard Drawings are provided in Appendix F.

Item #	Improvement	Timing	Responsibility
Offsite Intersections			
US Highway 24/Judge Orr Intersection			
	Realignment of Judge Orr Road at US Highway 24 per CDOT Hwy 24 FEL Study	Future (the PEL study identified this as high priority project with a time frame of less than 5 years)	CDOT
	Southwest-bound right-turn deceleration lane on US 24 approaching Judge Orr Road	As required by other development(s) or with realignment of US 24/ Judge Orr	CDOT or by others
	Construct southwest-bound right-turn acceleration lane on US 24 at Judge Orr Road	As required by other development(s) or with realignment of US 24/ Judge Orr	CDOT or by others
	Eastbound left-turn lane on Judge Orr Road approaching US 24	With realignment of US 24/ Judge Orr	CDOT
	Westbound dual left-turn lanes on Judge Orr Road approaching US 24	With realignment of US 24/ Judge Orr	CDOT
	Northeast-bound right-turn deceleration lane on US 24 approaching Judge Orr Road	With realignment of US 24/ Judge Orr	CDOT
	Eastbound right turn deceleration lane on Judge Orr Road approaching US 24	As required by other development(s) or with realignment of US 24/ Judge Orr	CDOT or by others
US Highway 24/Stapleton Intersection			
	Signalize the intersection	once warrants are met	CDOT is collecting Escrow from area developments impacting this intersection with each subdivision filing
Curtis Road/Falcon Highway			
	Lengthen eastbound left-turn lane to ECM Standards on Falcon Highway approaching Curtis Road	Currently warranted by ECM	Escrow for pro-rata share of improvement or construction at the time of Phase 2 development (Fee program credit per Fee program provisions)
	Long Term: In the case of a future signalized intersection - Construct southbound right-turn deceleration lane on Curtis Road approaching Falcon Highway	Upon Signalization	Escrow for pro-rata share of improvement or construction if warranted at the time of development (Fee program credit per Fee program provisions)
	Long Term: Reconstruct Intersection as a modern roundabout (or signalize the intersection)	Once LOS of AWSC drops below acceptable levels (roundabout), or once signal warrants are met (for conversion to a signal or roundabout)	El Paso County. This intersection will be fee-program eligible for a signal/roundabout and applicant will pay Fee program traffic impact fees
Adjacent County Arterial Roadway ROW Requirements			
	General roadway segment widening of adjacent Curtis Road (other than within the limits of any required auxiliary lane projects) for purposes of upgrading an existing adjacent "unimproved" arterial roadway to current ECM Arterial standards.	To be discussed at the Preliminary Plan and/or Final Plat stages. This would likely involve whether the development project would trigger (based on total and relative proportion of site-generated traffic or other criteria) or otherwise be required to complete a significant roadway upgrade project (with credit and reimbursement through the Countywide Fee program) or if payment of the roadway improvement fees would be sufficient.	
	Judge Orr ROW Dedication - 4 Lane Minor Arterial: Rural 130' to 150' estimated ROW Dedication (Note: 4-lane Rural Principal is 180')	Shown in 2040 MTCP	Applicant
	Judge Orr - 4 Lane Minor Arterial - Beyond above dedication, no additional ROW Preservation needed	Shown in 2060 Corridor Pres Plan	Applicant
	Curtis Road - 2 Lane Rural Principal Arterial: 130' to 150' estimated ROW Dedication (Note: 4-lane Rural Principal is 180')	Shown in 2040 MTCP	Applicant

	Judge Orr Road - Widen to Four Lane Rural Minor Arterial	Shown in 2040 MTCP	MTCP Project No. C15. Details TBD - applicant will pay Fee program traffic impact fees
	Curtis Road - Upgrade to Two Lane Rural Principal Arterial	Shown in 2040 MTCP	MTCP Project No. U1. Details TBD applicant will pay Fee program traffic impact fees
Internal Subdivision Roadways			
	Construct internal streets to County Rural Local Standards	As development occurs and as needed for access	Applicant
Adjacent Intersection and Access Intersections			
Judge Orr/Curtis Road Intersection			
	Westbound Right Turn Deceleration Lane	Once peak hour westbound right turn volume exceeds 50 vehicles per hour	Escrow for improvement or construction if warranted at the time of development (Fee program credit per Fee program provisions)
	Eastbound Right Turn Deceleration Lane	Currently warranted by ECM	Escrow for improvement or construction at the time of Phase 2 development (Fee program credit per Fee program provisions)
	Potentially sign for All Way Stop Sign Control	Once Warrants for AWSC are met	El Paso County
	Long Term: Reconstruct Intersection as a modern roundabout (or signalize the intersection)	Once LOS of AWSC drops below acceptable levels (roundabout), or once signal warrants are met (for conversion to a signal or roundabout)	El Paso County. This intersection will be fee-program eligible for a signal/roundabout and applicant will pay Fee program traffic impact fees
	Long Term: In the case of a future signalized intersection: lengthening of northbound and southbound left turn deceleration lanes	As needed based on future speed limit and turning volume/stacking length criteria	Escrow for improvement or construction if warranted at the time of development (Fee program credit per Fee program provisions)
Judge Orr/Site Access Points			
	No Auxiliary Turn Lanes Required		
Curtis Road/North Site Access			
	Construct southbound left turn deceleration lane on Curtis Road approaching the site access	With site development	Applicant
	Construct northbound right-turn deceleration lane on Curtis Road approaching the site access	With site development	Applicant
Curtis Road/South Site Access			
	Construct northbound right-turn deceleration lane on Curtis Road approaching the site access	With site development	Applicant
*Note	It is anticipated that conditions will likely be made at the time of final platting to require the developer to construct improvements as outlined in this table. The most likely improvements potentially needing to be constructed by the developer of this site would be auxiliary turn lanes associated with both the Falcon Highway and the Judge Orr Intersections. Additionally, this developer may be responsible for intersection construction if triggered by this development of either/or both adjacent intersections (Judge Orr/Curtis, Curtis/Falcon Highway).
