

Saddlehorn Ranch Preliminary Plan

FEMA, LOMR, CLOMR

The Saddlehorn Ranch Preliminary Plan has 3 major drainageways that traverse the site: Haegler Ranch Main Stem 6 (MS-06), Haegler Ranch Tributary 6 (T-6), and Geick Ranch West Fork – Reach 7A (WF-R7A).

Haegler Ranch Main Stem 6 (MS-06), Haegler Ranch Tributary 6 (T-6) had BFE's established in the Santa Fe Springs – Haegler Ranch Drainage Basin LOMR.

In the northeast corner of the preliminary plan, the proposed development borders the Zone A boundary of the Geick Ranch West Tributary (WF-R7A). BFEs will be established along this stretch of channel for all lots that touch the Zone A boundary using a HEC-RAS analysis. A LOMR will not be presented for this small portion of the Geick Ranch West Tributary that traverses the site.
