John,

The typical timeline on these is 30 days. We'll do our best to beat that. Thanks,

Brian McCormick, PE
Dam Safety Engineer

Sorry, I know I haven't given you much time, but I believe this is the only thing we are missing for our submittal. Would it be possible to get this approval soon or do you have a timeframe that it could be ready by? I will answer any questions you might have immediately. Thank you,

John Fornander

John F.,

We've had some staff changes here - I'll give you updates for your contacts. Regardless, you got these NOIs to the right place.

Chris Grimes is Groundwater Commission and generally will not be involved with NOIs for NJ sized dams.

Doug Holister and Jacob Olson are still with DWR but no longer in District 10.

John Hunyadi is now Assistant State Engineer.

For future Notices of Intent for Non-Jurisdictional sized dams, you can send these to me. I'll distribute them to the appropriate Water District Commissioner and Division Office (for Div 2, District 10, Elizabeth Nosker is the Commissioner). I've copied Elizabeth and the Division 2 PA, Jessica Woodiuk on this reply. The three of us (Brian, Elizabeth, and Jessica) will review and process these. Chirs, Jacob, Doug, and John H. can be dropped from the string.

Elizabeth and Jessica - I'll forward the NOIs separately.

For each of these dams, we will need additional information to review. I'll need a grading plan and location map so that I can confirm key dimensions and hazard potential. Elizabeth will need the SDI data sheets (drawdown time) to ensure that downstream water rights are not injured by these ponds. Please submit grading plans and SDI data sheets for these ponds.

Contact me if you have any questions. Thanks,

Brian McCormick, PE
