UTE PASS STORAGE
FINANCIAL ASSURANCE ESTIMATE MEMORANDUM
February 15, 2018

Based on the total disturbed area remaining under one acre and the minimal developed drainage impact associated with this re-development site, no stormwater detention is proposed. Furthermore, there are no public improvements proposed as part of this project. As such, there is no need for a Financial Assurance Estimate.

If an ESQCP is being submitted, then a financial assurance estimate is required for the grading and erosion control BMPs.
