

Hey all... this is Petra. We have a weird lot (see below). Is the north lot line really a rear? We just love these pie shaped lots.

Christian Haas 12:15 PM

CH **Lot Line, Rear** — The boundary line opposite and most distant from the front lot line. *A triangular lot has 2 side lot lines but no rear lot line.* For other irregularly shaped lots, the rear lot line is all boundary lines that are most nearly opposite the front lot line.

thinking it should be treated as the side

Ryan Howser 12:23 PM Edited

RH Christian is correct - the front is the lot line the driveway comes off and there is no rear lot line
