### Templeton Gap Storage, PPR-17-015

Please accept the following comments from El Paso County Public Health regarding the project referenced above:

- The existing on-site wastewater treatment system (OWTS) must be evaluated by a Colorado Registered Professional Engineer for adequacy in terms of commercial use and hydraulic loading. The OWTS must be adequate for any projected increase in use by customers accessing the new indoor storage building. The evaluation report must be submitted to El Paso County Public Health (EPCPH) for approval.
- The OWTS must meet all current OWTS regulations including installation setbacks. There must be adequate area for replacement of the soil treatment area (STA) should a future addition or replacement of the STA be necessary. The STA areas must be protected from vehicular traffic.

Respectfully,

Mike McCarthy, R.E.H.S.
