

SOILS STATEMENT
MVE, Inc Project No. 61224
October 30, 2024

The Site Plan as submitted for the I68 Training Facility is Phased into Four Phases which includes only the shooting ranges, access drive and parking to be constructed. No Buildings (Facilities) will be constructed until Phase 4 which will require a new Site Plan for these improvements. These Buildings (Facilities) will require a Landscape Plan, a Lighting Plan, a Water Resources Report, an OWTS Design & Report, a Soils Report pursuant to Appendix C of the EMC once the final number and location on the Facilities are known.

Our opinion is that the Soils Report pursuant to Appendix C of the EMC is not be required at these first Four Phases of the proposed development of the site. We are requesting the removal of said Soils Report from this submittal.

We have requested Ryan Howser, Project Planner to remove said Soils Report from the submission items but he is out of town until November 5th, 2024.
