LOT TYPICAL

NOTES

- All streets shall be named and constructed to El Paso County Standards and any approved deviations. Upon acceptance by El Paso County, public streets shall be maintained by the County.
- Notwithstanding anything depicted in this plan in words or graphic representation, all design and construction related to roads, storm drainage and erosion control shall conform to the standards and requirements of the most recent version of the relevant adopted El Paso County standards, including the Land Development Code (LDC), the ECM, the Drainage Criteria Manual (DCM), and the DCM Volume 2. Any deviations from these standards must be specifically requested and approved in writing to be acceptable. The approval of this Preliminary Plan does not implicitly allow any deviations or waivers that have not been otherwise approved through the deviation approval process.
- Development of the property will be in accordance with the most recent version of the El Paso County Land Development Code for RR-5 Zoning.
- "The Subdivider(s) agrees on behalf of him/herself and any developer or builder successors and assignees that Subdivider and/or said successors and assigns shall be required to pay traffic impact fees in accordance with the El Paso County Road Impact Fee Program Resolution (Resolution No. 18-471), or any amendments thereto, at or prior to the time of building permit submittals. The fee obligation, if not paid at final plat recording, shall be documented on all sales documents and on plat notes to ensure that a title search would find the fee obligation before sale of the property."
- All existing buildings to be removed.
- No direct lot access to Vollmer Road.
- Fees in lieu of land dedication for regional park properties in the amount of \$5,160 at time of plat recording.
- A 10' public trail access easement to be maintained by the Black Forest Trails Association (BFTA) is provided.
- HOA to maintain drainage easements and stormwater quality ponds and easements for lots 4, 5, 7 and 9.
- Individual lot purchasers are responsible for constructing driveways including necessary drainage culverts per land development code section 6.3.3.C.2 and 6.3.3.C.3. Some lots within this subdivision will require larger culverts based on the approved final drainage report and shall be sized and designed by a professional engineer licensed in the state of Colorado. If a driveway is proposed to cross a drainage easement or a Wetland No Build Area, an engineered site plan prepared by a professional engineer licensed in the state of Colorado, will be required for county Building Permit approval.
- Constraints identified consist of Potentially Expansive Soils, Radon which is generally considered high in most of Colorado, Flooding and Surface Drainage, potentially Shallow Ground Water, and Erosion. All of these constraints can be properly mitigated or avoided through standard construction practices. Details for proper mitigation can be found in the Geohazard Report prepared by RMG.
- Bedrock was encountered throughout the site, none of the bedrock is considered steeply dipping bedrock therefore preservation is not proposed.
- Water Rights for the Redtail Ranches Subdivision are described in detail in the Declaration of Covenants for the subdivision, and further described in the July 18, 2018 Judgment and Decree affirming the June 26, 2018 Findings of Fact and Ruling of Referee granting underground water rights and approving a plan for augmentation, as entered by the District Court for Water Division 2, State of Colorado, in Case No. 18CW3003 (consolidated with Division 1 Case No. 18CW3002), as recorded at Reception No. 218082607 of the El Paso County Clerk and Recorder.
- No trail connection to Linwood Lane is provided due to drainage and grading constrains.
