Re: Temporary Water Service to Pike Solar Project

Dear Mr. Vickers,

Colorado Springs Utilities has procedures in place for the provision of 4,475,000 gallons of temporary use construction water. Colorado Springs Utilities will negotiate, in good faith, to provide such water through an applicable contract to supply the necessary water for construction of the Pike Solar Project. Colorado Springs Utilities will make this water available in compliance with applicable laws, tariffs, and regulations.

Sincerely,

A handwritten signature in black ink, appearing to read "D Longrie", with a long horizontal flourish extending to the right.
