RE: AT&T Site: COL02056 / 10101716 / TEMPLETON GAP  
**\*\*ELIGIBLE FACILITIES REQUEST\*\***  
Site Address: 7423 TEMPLETON GAP ROAD  
El Paso County File #: TWR249

This application is for a modification to an existing wireless communication facility. **This is an eligible facilities request.** AT&T is proposing to swap / add antennas and associated equipment on existing Wireless Communication Facility to improve existing service.

This will not be a substantial change and there will be no increase to the height of the existing 100' tower or to the size of the lease compound.

AT&T proposes to modify the existing mounts by adding a 2' stand-off to reduce interference caused by skewed antennas. AT&T will replace (6) 8' antennas with (3) new 8' antennas and (6) new stacked 2.5' antennas, remove (12) RRHs, (5) TMAs, and (4) diplexers. They will add (9) RRHs and (1) raycap.

On the existing equipment pad (ground) AT&T is proposing to replace (2) cabinets. All groundwork will take place on the existing pad. There will be no excavation needed for this project.

This existing site shall comply with all Federal, State, and Local requirements as well as with all requirements of the Federal Communications Commission (FCC) with respect to Radio Frequency emissions. This work does not constitute a substantial change.

Sincerely,

**Carrie Ann Powell**
