Pike Solar 1041, AASI-21-2

Please accept the following comments from El Paso County Public Health regarding the 1,170-acre solar energy facility project referenced above:

- **El Paso County Public Health understands the project will not require wastewater services after the construction of the facility has been completed. Portable sanitary facilities are for temporary use only and must be removed when the construction phase is completed.**
- **El Paso County Public Health also understands Colorado Springs will supply water service for the project. Water will be used for dust control during construction of the facility as required for permit compliance.**
- **Earthmoving activities greater than 25 acres require a Construction Activity Permit from the Colorado Department of Public Health and Environment, Air Pollution Control Division. Please contact the Air Pollution Control Division at for permit information <https://www.colorado.gov/pacific/cdphe/air-permits-contacts>**
- **The water quality basins must have mosquito control responsibilities included as a part of the construction design and maintenance plan to help control mosquito breeding habitat and minimize the potential for West Nile Virus.**
