Thank you, Sophie! I appreciate you following up with me and providing this information. I will include it with the other materials and upload them into our Tracking and Intergrates Logging System.

Have a great weekend,

Jen

Dr. Jen,

Thank you for following up about review of this project. I took a look at the referral documents sent in Nov. 2020 and confirmed with our design engineer whether any changes have been made since then. Blocks were shifted no more than 500 feet in a few sections; these slight modifications were made for scour and drainage avoidance.

I can confirm that no areas of change coincide with the locations of recorded biological resources per the biological resources report. Below is a snip of the current project layout highlighting in green the locations where changes were made since November, which show no impact to biological resources when compared with the biological resources report's mapped findings (snip included further below):

Please let me know if you have any questions on the above or would like to see more details on the minor changes made since November 2020.

Thank you,

Sophie Kiepe

Sophie- I am having the agency upload their comments in EDARP (AASI212); I don't think they knew how to do it so we never received them...

Hi, Kari -

We are trying to resolve some recordkeeping on our end. Regarding the project referenced below in your email, we had already reviewed and submitted a response on this project on December 7, 2020. Please see attached files, which contain all correspondence and information from that first request.

Had any components of the project changed between when El Paso County first submitted the request for review on November 10, 2020, and the request that was submitted on April 21, 2021?

Did you ever receive comments from the Service for the April 21, 2021, request? I thought that George San Miguel had submitted comments to the EDARP site on May 11, 2020, but he said that at present, no comments from the Service are showing on the EDARP site for this project.

If you could help us resolve these issues, I would greatly appreciate it. If they are the same project and no further comments are needed, I will close out both projects in our system. If the project changed between November and April and you still need comments from us, I will get comments to you as soon as possible.

Thank you,

Jen
