Subject: Utility Trench Backfill, Curb and Gutter/Roadway Sub-grade Preparation, and
Asphalt Placement Testing
Within the Public Streets Rights of Ways of:

Forest Lakes, Filing No. 5
Colorado Springs, Colorado
Job No. 192273

Dear Ms. Morris:

Representatives of Entech Engineering, Inc. periodically visited the site and performed field density testing during the subject construction processes. Testing was performed in general compliance with the frequency indicated in the City of Colorado Springs Standard Specifications. Results of field density tests have previously been provided. Field density tests were taken by Entech Engineering, Inc. personnel with test results presented in reports dated June 17, 2020 through October 30, 2020. Results generally indicate densities, which meet those specified in the City of Colorado Springs Standard Specifications.

Representatives of Entech Engineering, Inc. also periodically observed the subgrade soil types and asphalt testing processes for the street improvements. Asphalt cores will be taken and tested at a later date. These materials appeared to be in general compliance with the specifications presented in the City of Colorado Springs Standard Specifications and appeared to be consistent with the materials assumed in the pavement design for the project.

If you have further questions regarding this letter, or the construction from a geotechnical point of view, please call.

Respectfully Submitted,

ENTECH ENGINEERING, INC.

Daniel P. Stegman
