RE: Sprint Upgrade – 4496 E Blaney Road – DN72XC020

Ms. Ruiz,

SAC Wireless, on behalf of Sprint, is requesting the necessary approvals for our scope of work at an existing Sprint telecommunications facility in El Paso County. The facility, located at 4496 E Blaney Road, is a 260' lattice tower with Sprint equipment mounted at the 204' RAD center. Sprint is proposing to add (1) IBR (Integrated Backhaul Radio) and associated cabling to the existing equipment attached to Sector 2. There will be no other modifications to the equipment on the tower and no ground work involved. RF Engineers have determined this minor modification is required to help increase the network for the residents and the workforce within El Paso County by offering faster data transfer speeds, fewer dropped calls, and higher capacity.

Thank you for your help with this upgrade and please reach out should you have any questions.

Best Regards,

Charlie Shoemaker
