**PLAN CONTENTS:** *continued from previous page.*

Applicant Planner

- Existing streams and other natural features as shown in the approved Land Suitability Analysis. Show preservation easements and/or protection areas.
- Existing historic sites and resources
- Existing and proposed topography at two-foot maximum contour intervals
- Show existing and proposed easements, indicating dimensions, use and maintenance information
- Location and dimensions of building and landscape setbacks and buffers
- Subdivision name labels for all lots adjacent to the site
- Show the locations of any water quality features

**STREETS & ALLEYS:**

- Existing and proposed streets, intersections, street names, classifications with the exact location and widths of right-of-ways and pavement types, curb types and other street improvements
- Identify all streets as "public" or "private"
- Show and label all access points to the property from adjacent streets and alleys
- Show and label all speed line of sight visibility areas at all street intersections
- All existing and proposed medians, traffic islands, traffic control devices, and roundabouts. Provide dimensions and size and identify maintenance responsibilities
- Show all existing and proposed acceleration and deceleration lanes, including dimensions, length and width
- Show any existing or proposed encroachments into the public right-of-way that require a [Revocable Permit](#)
- Provide typical cross-sections for all proposed streets and alleys

**SIDEWALKS & TRAILS:**

- Show all existing and proposed locations, dimensions and surface materials of all sidewalks, trail and bicycle pathways. Note the condition of these facilities.
- Show pedestrian ramps at all pedestrian crossings, at all intersections with reference made to City standard type
- Show any and all sidewalks connecting building entries to exterior and public sidewalks
- Show and label existing and proposed public improvement easements for sidewalks and pedestrian ramps outside of dedicated right-of-way areas
- For detached sidewalks, show the distance from the back of curb to the edge of sidewalk
- If applicable, show the size and location and provide a detail of bicycle storage/parking racks

**INTERNAL TRAFFIC CIRCULATION, DRIVEWAYS, AISLES, & FIRE LANES:**

- Provide location, grade, dimensions and pavement material for all access travel-ways including driveways, drive aisles, fire lanes, curb cuts, and intersections. Call out City standard details if within City right-of-way or easements.
- Show and label any access easements, existing or proposed
- Show the location and dimensions of all loading and maneuvering areas and stacking lanes. Provide pavement type, as well.
- Identify location and type of any curbs and/or sides of roadways and extents thereof to be marked as fire lane(s)
- For residential projects, indicate the minimum length of driveways from garage door to property line and to back of sidewalk
- Show any noise mitigation methods (i.e. sound barrier walls, etc.), if applicable

**PARKING LOTS, AREAS, & SPACES: *n/a***

- Location and dimensions of parking lots/areas and drive aisles. Indicate pavement material.
- Location and number of all regular, compact, and handicapped spaces and access aisles.
- Provide a typical or detail with dimensions of typical regular and compact parking spaces types

**PLAN CONTENTS:** *continued from previous pages*

**SITE LIGHTING:** *n/a*

<input type="checkbox"/> Location of all site exterior light fixtures including freestanding and those attached to a building if known (if attached to a building, show also on the elevation drawings)	<input type="checkbox"/>
<input type="checkbox"/> Indicate the type of light (e.g. metal halide)	<input type="checkbox"/>
<input type="checkbox"/> Ensure all lighting is full cut-off and provide a detail of each light with mounting or pole height details, wattage and lumens of each fixture	<input type="checkbox"/>
<input type="checkbox"/> Show the type and location of existing and proposed street-lights, if this information is available	<input type="checkbox"/>
<input type="checkbox"/> A photometric plan may be required for certain uses that are adjacent to other less intensive uses, uses that are often extensively lit, such as gas canopies, convenience food stores, and auto sales. This plan will be required on a case by case basis, and the planner will notify the applicant as early in the process as possible	<input type="checkbox"/>
<input type="checkbox"/> If no exterior lights are proposed, then a note shall be added to specifically state that no site lighting will be provided for the project	<input type="checkbox"/>

**PHASING PLAN:** *n/a*

<input type="checkbox"/> Phase area boundaries and sequence	<input type="checkbox"/>
<input type="checkbox"/> Provide phase timing and sequencing information for the construction of the project and the construction and installation of public utilities, facilities, and site improvements for each phase area.	<input type="checkbox"/>
<input type="checkbox"/> Show barriers at edges of each phase to prevent vehicles from entering and parking on unpaved areas (if applicable)	<input type="checkbox"/>

**Development Plan Review Criteria**

The City will review the development plan using the following criteria. No development plan shall be approved unless the plan complies with all the requirements of the zone district in which it is located, is consistent with the intent and purpose of this Zoning Code and is compatible with the land uses surrounding the site. Alternate and/or additional development plan criteria may be included as a part of an FBZ regulating plan.

1. The details of the use, site design, building location, orientation and exterior building materials are compatible and harmonious with the surrounding neighborhood, buildings and uses, including not-yet-developed uses identified in approved development plans.
2. The development plan substantially complies with any City- adopted plans that are applicable to the site, such as master plans, neighborhood plans, corridor plans, facilities plans, urban renewal plans, or design manuals.
3. The project meets dimensional standards, such as but not limited to, building setbacks, building height and building area set forth in this chapter, or any applicable FBZ or PUD requirement.
4. The project grading, drainage, flood protection, stormwater quality and stormwater mitigation comply with the City's Drainage Criteria Manual and the drainage report prepared for the project on file with the City Engineering Department.
5. The project provides off-street parking as required by this chapter, or a combination of off-street or on-street parking as permitted by this chapter.
6. All parking stalls, drive aisles, loading/unloading areas, and waste removal areas meet the location and dimension standards set forth by this chapter.
7. The project provides landscaped areas, landscape buffers, and landscape materials as set forth in this chapter and the Landscape Design Manual.
8. The project preserves, protects, integrates or mitigates impacts to any identified sensitive or hazardous natural features associated with the site.
9. The building location and site design provide for safe, convenient and ADA-accessible pedestrian, vehicular, bicycle, and applicable transit facilities and circulation.
10. The number, location, dimension and design of driveways to the site substantially comply with the City's Traffic Criteria Manual. To the extent practicable, the project shares driveways and connects to drive aisles of adjoining developments.
11. The project connects to or extends adequate public utilities to the site. As required by Colorado Springs Utilities, the project will extend the utilities to connect to surrounding properties.
12. If necessary to address increased impacts on existing roadways and intersections, the project includes roadway and intersection improvements to provide for safe and efficient movement of multi-modal traffic, pedestrians and emergency vehicles in accordance with the City's Traffic Criteria Manual, public safety needs for ingress and egress and a City accepted traffic impact study, if required, prepared for the project.
13. Significant off-site impacts reasonably anticipated as a result of the project are mitigated or offset to the extent proportional and practicable. Impacts may include, but are not limited to light, odor and noise.

**CONDITIONAL USE REVIEW CRITERIA**

The Planning Commission may approve and/or modify a conditional use application in whole or in part, with or without conditions, only if all three (3) of the following findings are made:

- A. Surrounding Neighborhood: That the value and qualities of the neighborhood surrounding the conditional use are not substantially injured.
- B. Intent of Zoning Code: That the conditional use is consistent with the intent and purpose of this Zoning Code to promote public health, safety and general welfare.
- C. Comprehensive Plan: That the conditional use is consistent with the Comprehensive Plan of the City.

**USE VARIANCE REVIEW CRITERIA**

The following criteria must be met in order for a Use Variance to be granted:

1. That there are exceptional or extraordinary circumstances or conditions applicable to the property involved or to the intended use of the property that do not apply generally to the property or class of uses in the same zone so that a denial of the petition would result in undue property loss; and
2. That such variance is necessary for the preservation and enjoyment of a property right of the petitioner; and also,
3. That such variance will not be detrimental to the public welfare or convenience nor injurious to the property or improvements of other owners of property.

## MEADOWWORKS FILINGS 1-4

### PROJECT STATEMENT

SEPTEMBER 2021

#### REQUEST

N.E.S. Inc. on behalf of Nor'Wood Development, LLC requests approval of a Development Plan and four Final Plat filings for a Single-family detached residential development comprised of 358 lots and 16 Tracts on approximately 90.63 acres of land. The developer is requesting that all final plat filings have the same expiration date as the Development Plan, which is six (6) years from the date of approval.

#### SITE LOCATION & DESCRIPTION

The site is located east of Marksheffel Road, just south of Drennan Road, and on both sides of Horizonview Drive. The site has frontage on Marksheffel Road, however, access to the property is from Horizonview Drive. The surrounding land to the east, south and the majority of the land to the north is in the County, and the land to the west is in the City. The surrounding land includes single-family residential uses and vacant land to the north, single-family residential uses and vacant land owned by the Widefield School District to the east, single-family residential uses to the south, and vacant land across Marksheffel Road to the west.

## **PROJECT DESCRIPTION**

### **Zoning**

The property is currently vacant and zoned R1-6000, Single-Family Residential and AO, Airport Overlay. The surrounding land to the east, south and the majority of the land to the north is in the county and subject to county zoning, which includes RS-6000 (Residential Suburban 6,000 sf) to the north and RS-5000 (Residential Suburban 5,000 sf) to the east and south. These areas are also zoned CAD-O, Commercial Airport Overlay District. The remainder of the land to the north is within the City and zoned PBC (Planned Business Center)/APZ2 (Airport Zone 2). The land to the west is within the City and zoned PIP2, Planned Industrial Park, which provides for a limited group of professional, administrative, research, manufacturing and industrial uses.

The Development Plan proposes a single-family residential development within the R1-6000 and AO zones. Single-family residential is a permitted use in the R1-6000 zone. The AO zone is Airport Overlay, which allows the permitted uses of the underlying R1-6000 zone. The site is outside both the APZ-1 and APZ-2 subzones.

All lots meet the minimum dimensional requirements and accommodate minimum setback and maximum lot coverage requirements of the R1-6000 zone. The minimum required lot area of 6,000 square feet and lot widths of 50' to 60' are compatible with surrounding land uses and zoning, and provide adequate transition from adjacent County RS-5000 and RS-6000 zoning.

### **Project Composition**

The project proposes 358 single-family detached homes on lots 50' to 60' in width. The project will be developed in four (4) filings, consisting of 85, 91, 92, and 90 lots respectively, as well as 16 Tracts for open space, landscape and other improvements, public access, and utility purposes. A mix of home types, all of which will meet the height and lot coverage requirements of the R1-6000 zone, are proposed. Each unit will have garage parking to meet the minimum parking requirements of one parking space per dwelling and will also provide driveway parking.

The project includes one 3.84 AC centrally located park, as well as several green spaces throughout. Provisions for pedestrian circulation include sidewalk along both sides of all streets, a trail along the west boundary of the property adjacent to Marksheffel Blvd, and multiple internal trail connections.

One on-site water quality detention pond is provided and an existing drainage easement along the southeast side of the development is accommodated.

---

## Setbacks and Buffers

All lots are planned to accommodate required building setback and meet maximum lot coverage standards. A landscape buffer is provided along the east side of Horizonview Dr. to buffer between the single-family lots and the roadway. Greenspace buffering is provided along southeast side of the development to accommodate a drainage easement, along the southwest side of Horizonview Dr., and along the north line of the development west of Horizonview Dr. A landscape buffer and trail are provided along the west side of the development between the single-family homes and Marksheffel Road.

Noise will be mitigated by installation of a 6' sound wall adjacent to Marksheffel Rd. as shown in the Development Plan. Further, residential structures will have a minimum setback of 50' from Marksheffel Road due to a 25' buffer area and 25' building setback.

These mitigation measures meet the BMPs of the City's Noise Mitigation Policy, therefore a Noise Impact Study is not required. Horizonview Dr., though not subject to the Noise Mitigation Policy, will have a 6' privacy fence and structures will have a minimum setback of 35' from the street due to a 10' landscape setback and a 25' building setback.

## Park and Open Space

The project includes one 3.826 AC centrally located park. Additional green spaces throughout the development include a green corridor along the east side of the development to accommodate existing drainage, a green space shown as a dog park along the westerly north line of the property and along the adjacent west side of Horizonview Dr., green space along the northeast side of Horizonview Dr., and a green space adjacent to the detention pond in the southwest corner of the development.

## Access

There will be three points of access on Horizonview Dr. A north and south access will be located central to the development, the north end of which will connect to an extension of Peaceful Meadow Street. A second southern access will be located in the northwest portion of the development. An easterly access will be located at the very north end of the development, which will connect at its east terminus to Chai Dr. Chai Dr. will provide access and frontage for the School District property east of the development, a connection for future development to the north, and intersect with and terminates at Peaceful Meadow Street. There will be no access to Marksheffel Road, except for a trail connection and trail along its east side.

Sidewalk will be constructed on both sides of Horizonview Dr., Chai Dr., and all local streets. A sidewalk/trail will be constructed along Marksheffel Road, and there will be a trail connection therefrom to the centrally located park. There will be multiple green corridors in alignment with streets and between lots and blocks to provide additional connectivity within the development.

---

## PROJECT JUSTIFICATION

### DEVELOPMENT PLAN REVIEW CRITERIA (SECTION 7.5.502 E.)

- 1. The details of the use, site design, building location, orientation and exterior building materials are compatible and harmonious with the surrounding neighborhood, buildings and uses, including not-yet-developed uses identified in approved development plans.**

The project proposes single-family residential development compatible with the lot size, building size, and orientation of surrounding existing single-family residential development. The development will be compatible, harmonious, beneficial and connected to the adjacent school when it develops. The development provides a trail along Marksheffel Road as well as internal connections to that trail, which will provide pedestrian connectivity to the surrounding area.

- 2. The development plan substantially complies with any City- adopted plans that are applicable to the site, such as master plans, neighborhood plans, corridor plans, facilities plans, urban renewal plans, or design manuals.**

The property is part of the approved 2015 Banning Lewis Ranch Master Plan. The plan designates the property as Residential Low Density, which is consistent with the single-family development proposed. The project uses existing infrastructure for access and utilities, and provides new stormwater management facilities and trails to enhance existing infrastructure. The development is consistent with Plan COS goals which call for "Housing for All"; as well as with goals for Future Neighborhoods and Emerging Neighborhoods, which call for diverse land uses (housing, parks, sidewalks/trails, schools), gathering places (park and open space), and a safe sense of connection (walkability, trails).

- 3. The project meets dimensional standards, such as but not limited to, building setbacks, building height and building area set forth in this chapter, or any applicable FBZ or PUD requirement.**

The single-family development proposed meets the minimum lot width, area, and coverage requirements of the R1-6000 zoning district. The homes will be placed on lots to meet setbacks and maximize remaining lot area for use by those who live there.

- 4. The project grading, drainage, flood protection, stormwater quality and stormwater mitigation comply with the City's Drainage Criteria Manual and the drainage report prepared for the project on file with the City Engineering Department.**

The property has gentle slopes across the site. The development provides stormwater a management pond in the southwest corner of the development, and accommodates existing utility and drainage easements over the property. Final grading, drainage, stormwater quality and stormwater mitigation plans will comply with the City's Drainage Criteria Manual and the Drainage Report prepared for the project, and included with this submittal.

- 5. The project provides off-street parking as required by this chapter, or a combination of off-street or on-street parking as permitted by this chapter.**

The parking requirement for single-family development is one parking space per unit. The homes will include a garage as well as space in the driveway for parking.

**6. All parking stalls, drive aisles, loading/unloading areas, and waste removal areas meet the location and dimension standards set forth by this chapter.**

The development will have garage and driveway parking. There is no plan for centralized trash handling, and no need for loading/unloading areas.

**7. The project provides landscaped areas, landscape buffers, and landscape materials as set forth in this chapter and the Landscape Design Manual.**

A landscape setback and streetscape are required and provided along the west line of the development along Marksheffel Road and along both sides of Horizonview Drive due to double frontage lots. A landscape setback is required and provided along the portion of the north boundary of the development due to adjacency to a non-street zone boundary. The Development Plan shows a detention pond, trail, and green space along the west line of the development adjacent to Marksheffel Road, a landscape buffer and park along the west side of Horizonview Drive, and a landscape buffer along the east side of Horizonview Drive. The landscape plans for these areas comply with the standards set forth in the Zoning Code and the Landscape Design Manual.

**8. The project preserves, protects, integrates or mitigates impacts to any identified sensitive or hazardous natural features associated with the site.**

There are no identified sensitive or hazardous natural features associated with the site.

**9. The building location and site design provide for safe, convenient and ADA-accessible pedestrian, vehicular, bicycle, and applicable transit facilities and circulation.**

The development proposes three streets connecting to Horizonview Drive. These streets provide safe, convenient and ADA accessible access to the internal park and green space areas and the future school site. A trail is provided along Marksheffel Road which connects to internal trails leading to the park. Sidewalk will be provided along both sides of Horizonview Drive, Chai Dr., and all local street. Chai Dr. provides a connection to future development to the north as well as access and frontage to the future school property.

**10. The number, location, dimension and design of driveways to the site substantially comply with the City's Traffic Criteria Manual. To the extent practicable, the project shares driveways and connects to drive aisles of adjoining developments.**

The project complies with the City's Traffic Criteria Manual.

**11. The project connects to or extends adequate public utilities to the site. As required by Colorado Springs Utilities, the project will extend the utilities to connect to surrounding properties.**

The project will extend and connect to existing utilities in place in the adjacent residential developments. Existing stormwater facilities and drainage will be accommodated and expanded on site. Please refer to the Utility Plans enclosed with the application packet.

**12. If necessary to address increased impacts on existing roadways and intersections, the project includes roadway and intersection improvements to provide for safe and efficient movement of multi-modal traffic, pedestrians and emergency vehicles in accordance with the City's Traffic Criteria Manual, public safety needs for ingress and egress and a City accepted traffic impact study, if required, prepared for the project.**

The development proposes three streets connecting to Horizonview Drive and the extension of Chai Dr. from the north. These streets provide safe, convenient and ADA accessible access to all internal residential lots, parks and the future school site. The roadways will be designed to safely and conveniently accommodate multi-modal traffic, pedestrians, and emergency vehicles. The cul-de-sacs are designed to provide for adequate maneuvering and turn-around of passenger, multi-modal vehicles and emergency vehicles.

**13. Significant off-site impacts reasonably anticipated as a result of the project are mitigated or offset to the extent proportional and practicable. Impacts may include, but are not limited to light, odor and noise.**

The single-family development is not anticipated to create excessive light, odor or noise.
